**ACES Electronics Co., Ltd.**

Slimline 24G Cable for Server/Data Storage/Workstation

OVERVIEW

■ Our newest rollout of next generation cables to support Gen 3 and future Gen 4 PCIe and SAS4 storage equipment applications.

■ Up to 24Gb/s supported speeds and the newest different style allow users the greatest flexibility and highest density applications in the storage industry.

■ Our innovative designs will help your robust and uniquely built product capable of taking the solutions to the next level.

Features

■ Smaller size connector and cable saves device space
■ Provide four channels signal transmission as per industry standard
■ Data speed: 24Gbps for SAS and 8GT/s for PCIe per channel
■ Meet SAS4.0 and Ultraport SlimSAS SFF-8654 specification
