I. Letter to Shareholders

First of all, on behalf of the management team of ACES Electronics Co., Ltd., I would like to express our sincere gratitude for all shareholders for the unwavering support and concern for the company over the years. Looking back on the past year, due to ongoing geopolitical tensions worldwide, high interest rates, high inflation, and the slowdown of the Chinese economy, global demand for end products has weakened. However, there have been changes globally and within the electronics industry driven by the acceleration of AI digitalization, 5G communication transmission driving server demand, and the development of automotive electronics driven by electric vehicles.

In response to changes in the industry, the Company has gradually shifted our focus from traditional product design and manufacturing to joint design and development of systems and modules with customers in the development layout of connectors and connecting lines; at the same time, by integrating the technical capabilities of the group, we aim to acquire more growth momentum in the future. This transformation will have a significant impact on our future industrial competitiveness.

Looking ahead, the global macro economy is predicted to remain fluctuating drastically this year. The Company will pay close attention to changes in the industrial environment, face the challenges prudently, and continue to enhance market competitiveness in the future.

In terms of implementation results of the business plan

In terms of consolidated financial statements for 2023, the consolidated net operating revenue amounted to NT\$8.486 billion, consolidated operating net profit was (NT\$0.331) billion, consolidated pre-tax net profit was (NT\$0.27) billion, and consolidated net profit for the current period was (NT\$0.267) billion (attributable to the net profit of the parent company's shareholders), translating to basic earnings per share after tax of (NT\$1.98).

In terms of research and development

In response to market demand trends, in terms of connector development, the Company continues to develop high-end connectors with fine-pitch, low-profile, high-frequency, and high-power. In terms of cable development, the Company is focusing on high-speed transmission cables for server internal cables and data center external cables, and chassis for data centers, auxiliary driving systems for automotive electronics, intelligent cabins, car networking, etc., as well as the assemblies of professional cables with high current and high power for industrial use. The Company has rapid development capabilities in product R&D and design, which shortens product development time, and can provide customized connectors and cable products according to customer needs; meanwhile, with the support of the overseas marketing network, the Company promotes new designs and new products to large international customers to meet their comprehensive needs and continue to achieve high growth goals.

This year's business plan, business policy, and future outlook

The Company has always adhered to the concept of "knowledge, vision, value, attitude, commitment, and execution", operates with integrity, and strives to improve the operating efficiency of the group. In order to meet the long-term strategic development needs and promote the maximum value and efficiency of each business entity, and focus on overseas markets and the mainland market. The Company's overseas sales bases cover the United States, Japan, Germany, Philippines, Vietnam, and Singapore. Deeply cultivating regional industrial development and enhancing penetration rates to target customers, providing connectors, cables, electromagnetic shielding covers, internal mechanical components, external casings, and complete assembly and testing services needed for consumer electronics, automotive electronics, cloud servers, industrial control industries, etc., to provide higher value-added products and services and increase growth momentum.

In terms of production and manufacturing, the Company has built a research and development headquarters building in Taoyuan, Taiwan for long-term development since April 2022. The construction is expected to complete in the first half 2024, expanding the production capacity of Taiwan's product line in the future and enhance the group's competitiveness. The Company has also established strong production capacity in Asia with manufacturing factories located in Taiwan, mainland China (Kunshan, Dongguan), Philippine and Vietnam. We will continue to implement the process lean plan and optimize the cost structure by increasing the proportion of automated production, and strive to reach the goal of becoming the preferred supplier for international customers.

Looking forward to this year (2024), we are still facing a market environment full of variables and fierce competition. The Company will continue to adopt a pragmatic attitude, face future challenges prudently, maintain our existing competitive advantages, and strive to achieve this year's operational growth goals. We hope to gradually become a leading brand in the connectivity industry in the future.

Finally, we hope that all shareholders can continue to give encouragement and guidance to the management team by upholding the love and support for the Company in the future.

Wishing you all good health and all the best.

Chairman: Yuan Wan-Ting

General Manager: Huang Tien-Fu Accounting Supervisor: Lee Shu-Yun

II. Company Profile

(1) Establishment date November 7th, 1996

(2) Company history

Company 1	■ In November, ACES ELECTRONICS CO., LTD. was established with a paid-in
1,7,0	capital of NTD 5 million. Its main business is the design, development,
	manufacturing, and sales of electronic connectors.
1997	■ In September, a cash capital increase of NTD 5 million was conducted, raising the
100.	paid-in capital to NTD 10 million.
2000	■ ISO 9001 international quality system certification was approved.
2001	■ A cash capital increase of NTD 19.5 million was conducted, raising the paid-in
2001	capital to NTD 29.5 million.

Note 1: There have been no occurrences of the following situations within the two years before the appointment and during the period of service:

- (1) Being an employee of the Company or its affiliated enterprises.
- (2) Being a director or supervisor of the Company or its affiliated enterprises (except for independent directors appointed in accordance with this Act or local laws and regulations who concurrently serve as directors of a parent company, subsidiary, or a subsidiary of the same parent company).
- (3) The individual, their spouse, minor children, or natural person shareholders who hold more than 1% of the total issued shares or are among the top ten shareholders of the Company under another person's name.
- (4) The manager listed in (1), relatives within the second degree of kinship, direct lineal blood relatives within the third degree of kinship, or spouses of the personnel listed in (2) and (3).
- (5) Being a director, supervisor, or employee of a corporate shareholder that directly holds more than 5% of the total issued shares, is among the top five shareholders, or has appointed a representative in accordance with Article 27, Paragraph 1 or 2 of the Company Act to serve as a director or supervisor of the Company (except for independent directors appointed in accordance with this Act or local laws and regulations who concurrently serve as directors of a parent company, subsidiary, or a subsidiary of the same parent company).
- (6) Being a director, supervisor, or employee of another company or institution where the same individual controls over half of the Company's voting rights or where over half of the company's board seats or voting rights are held by the same individual (except for independent directors appointed in accordance with this Act or local laws and regulations who concurrently serve as directors of a parent company, subsidiary, or a subsidiary of the same parent company).
- (7) Being a director, supervisor (auditor), or employee of another company or institution where the chairman of the board, general manager, or a similar position of the Company and the individual or their spouse hold the same position or where the director-general or a similar position of the Company and the individual or their spouse are directors (supervisors), supervisors (auditors), or employees (except for independent directors appointed in accordance with this Act or local laws and regulations who concurrently serve as directors of a parent company, subsidiary, or a subsidiary of the same parent company).
- (8) Being a director, supervisor (auditor), manager, or shareholder who holds more than 5% of the shares of a specific company or institution with financial or business dealings with the Company.
- (9) Being a professional, sole proprietor, partner, company, or institution that provides relevant services such as auditing, legal, financial, or accounting services to the Company or its affiliated enterprises and has not received cumulative compensation of more than NTD 500,000 in the past two years, as well as their spouses, owners, partners, directors, supervisors (auditors), and managers. However, this does not apply to members of the remuneration committee, public tender offer review committee, or merger and acquisition special committee who perform their duties in accordance with the Securities Exchange Act or the Company Mergers and Acquisitions Act.

(C) Board Diversity and Independence:

a. Board Diversity

According to Article 20 of the Corporate Governance of the Company, the board of director structure should consider the Company's business development scale and the shareholding situation of its major shareholders, and take into account practical operational needs to determine an appropriate number of directors of five or more.

The composition of the board of directors should consider diversity and develop appropriate diversity policies based on its operations, business models, and development needs, including but not limited to the following two major aspects:

- (a) Basic conditions and values: Gender, age, nationality, culture, etc.
- (b) Professional knowledge and skills: Professional background (such as law, accounting, industry, finance, marketing, or technology), professional skills, industry experience, etc.

Board members should generally possess the knowledge, skills, and qualities necessary to perform their duties. To achieve the ideal goal of corporate governance, the overall abilities that the board should possess are as follows:

- (a) Operational judgment ability.
- (b) Accounting and financial analysis abilities.
- (c) Business management abilities.
- (d) Crisis management abilities.
- (e) Industry knowledge.
- (f) International market perspective.
- (g) Leadership abilities.
- (h) Decision-making abilities.

Diversity policies and implementation status of current board members are as follows:

Core elements	Basic c	composit			Professio	nal backgro	ound				Industry	experience		
of diversity Job title Name	Nationality	Gender	Age	Business management	Engineering	Finance / Accounting	Foreign languages	Education	Rucinace	Information /Technology	Finance / Accounting	Social engagement	Education	Operation management

Independent director Sheen Gwo-Ji	R.O.C	Male	61~70	✓	✓		√	√	✓	✓	✓	✓	✓	✓

Our current board of directors consists of 7 members, including 3 independent directors, with expertise in various professional fields such as industry, finance, accounting, and technology. Collectively, they possess abilities in operational judgment, business management, crisis management, industry knowledge, international market perspective, leadership, and decision-making.

All of our current board members are citizens of the Republic of China, and independent directors account for 43% of the board. The age distribution includes 2 directors in the 51-60 age range, 4 directors in the 61-70 age range, and 1 director in the 71-80 age range. There is one female director.

The Company places importance on gender equality in the composition of the board of directors and aims to increase the proportion of female board members to one-third. Efforts will be made in the future to increase the number of female board members to achieve this goal.

b. Independence of the board of directors

Our current board of directors has 7 members, including 3 independent directors. 2 directors are relatives within the second degree of kinship. However, among the independent directors or between the independent directors and the directors, there are no spouses or relatives within the second degree of kinship, which complies with the provisions of Article 26-3, paragraphs 3 and 4 of the Securities and Exchange Act.

B. General Manager, Deputy GM, Associate, and Supervisors of each department and branch:

^{1.} The policy, system, standards, and structure of remuneration payment for independent directors, as well as the correlation between the responsibilities, risks, input time, and the amount of remuneration paid:

The remuneration of the directors and supervisors of the Company is determined in accordance with the provisions of the company's articles of association. As independent directors are also members of the board of directors, their remuneration is included in the remuneration of directors and supervisors and is handled in accordance with the Company's articles of association. In addition, the articles of association also stipulate that the Company shall allocate an amount not exceeding 3% of its annual profit as remuneration for directors and supervisors. The payment of remuneration to independent directors is handled in accordance with the "Principles for the Payment of Remuneration to Directors and Supervisors" of the Company.

Moreover, if an independent director serves as a member of a functional committee of the board of directors, such as the audit committee, remuneration, and remuneration committee, etc., the actual expenses incurred in carrying out their duties, in addition to transportation expenses, are reimbursed on an actual expense basis.

^{2.} In addition to the disclosure in the above table, the remuneration received by the Company's directors for providing services (such as serving as a consultant to non-employee subsidiaries/financial reporting of all companies/venture businesses) in the most recent fiscal year was None.

Note 1: The Company has not made any actual payments of retirement benefits to directors or made any provision for retirement benefit expenses.

Note 2: Refers to the relevant business execution expenses of directors in the current fiscal year (including travel expenses, special allowances, various subsidies, dormitories, vehicle allocations, and other tangible benefits provided).

- C. Comparison and explanation of the analysis of the ratio of total remuneration (paid to the Directors, Supervisors, General Manager, and Deputy General Managers of the Company by the Company and all the companies in the consolidated statements in the last two years) to net profit after tax and the correlation among the remuneration payment policy, standards, and combinations, the procedures for setting the remuneration, the business performance and future risks
 - (A)Analysis of the ratio of the total remuneration paid by the Company and Companies in the consolidated financial report to its Directors, Supervisors, General Manager, and Deputy General Managers in the last two years to net profit after tax on parent company only or consolidated financial reports is as follows:

	Remuneration to Net Income Ratio							
	2	022	2023					
Title	The Company	All companies within the consolidated financial statements	The Company	All companies within the consolidated financial statements				
Director	6.24%	6.24%	(3.09%)	(3.09%)				
Supervisor	0.24%	0.24%	Note	Note				
General Manager & Deputy General Manager	5.65%	5.65%	(4.73%)	(4.73%)				

Note: On June 29, 2022, the shareholders' meeting elected three independent directors to establish an audit committee to replace the duties of the supervisor.

(B)The Company's policy, standards, and composition of remuneration, the establishment of remuneration procedures, and the correlation with operational performance and future risks.

Director remuneration of the Company is governed by Article 24 of the Company's Articles of Association, which allows for remuneration of directors within the limit of not exceeding 3% of the profit for the year. The procedure for determining remuneration follows the assessment of the performance of the company's directors. This assessment considers not only the overall operational performance of the company, industry future operating risks, and development trends but also factors such as individual attendance at board meetings, personal performance achievement rates, and contributions to the Company's performance. It also takes into account industry standards to provide reasonable compensation and nomination for reelection.

Article 24 of the Company's Articles of Association sets a profit threshold of not less than 1% for employee remuneration for the year. The remuneration of company managers is evaluated based on the scope of responsibilities within the Company and their contributions to operational performance. The "Performance Appraisal Management Measures" of the company are used as a reference for evaluation. In addition to considering the overall operational performance of the company and the results of individual performance evaluations, factors such as managers' target achievement rates, profitability, operational efficiency, and contribution levels are considered to calculate their remuneration proportion, aiming to provide reasonable compensation.

The Company will review the remuneration system for directors and managers in a timely manner based on actual operating conditions and relevant laws and regulations. The reasonableness of related compensation is subject to review by the Compensation Committee to balance the Company's sustainable operation and risk management.

(4) Implementation of Corporate Governance

A. Operation of the board meeting

(A) In the past fiscal year (2023), the board of directors held 7(A) meetings. The attendance of directors and supervisors is as follows:

or unrect.	orb and super visors is as	10110 1151			
Title	Name	Actual no. of meetings attended (B)	No. of meetings with entrusted attendance	Actual attendance rate (%) [B/A]	Remarks
Chairman	Yuan Wan-Ting	7	0	100%	
Director	Weiji Investment Co., Ltd. Representative: Huang Wen-Cheng	7	0	100%	
Director	Hsieh Han-Chang	5	2	71%	
Director	Hsu Chang-Fei	7	0	100%	
Independent director	Lee An-Chen	7	0	100%	
Independent director	Liaw Dar-Lii	7	0	100%	
Independent director	Sheen Gwo-Ji	7	0	100%	

Other matters to be recorded:

- 1. The operation of the board of directors should be disclosed if any of the following situations occur, including the date and term of the board meeting, the content of the resolution, the opinions of all independent directors, and the Company's handling of the opinions of the independent directors:
 - (1) Matters listed in Article 14-3 of the Securities and Exchange Act.

 The Company has established an audit committee and is not subject to the provisions of Article 14-3 of the Securities and Exchange Act. For related information, please refer to the operation of the audit committee on page 20 of this annual report.
 - (2) Except for the above items, there were no other board meeting resolutions that the independent directors opposed or reserved their opinions on, and had records or written statements: None.
- 2. Disclosure of the execution status of directors' recusal from interested transactions shall include the names of the directors, the contents of the transactions, the reasons for the recusal, and the voting participation status: None.
- 3. The assessment cycle and period, scope, method, and content of the board of directors' self-assessment (or peer evaluation) should be disclosed: Please refer to page 19 of this year's annual report for information on the execution of the board of directors' self-evaluation.
- 4. Assessment of the achievement of the goals to strengthen the functions of the Board of Directors during the current and recent fiscal years (such as the establishment of an audit committee, enhancement of information transparency, etc.):
 - (1)The Company has established the "Board of Directors Performance Evaluation Procedure" which evaluates the performance of the board of directors, individual directors, and functional committees at the end of each fiscal year. The evaluation results are submitted to the most recent board of directors for review and improvement and are publicly disclosed on the company's website. The results of the 2023 fiscal year's board of directors' performance evaluation will be reported to the board on January 19, 2024, and publicly disclosed on the Company's website.
 - (2)The Company purchases liability insurance for all directors and supervisors on a regular basis every year to reduce and distribute the risk of significant damages caused to the company and shareholders due to errors or omissions of the directors. We regularly review the policy content to ensure that the insurance compensation amount and coverage are suitable for our needs, and the latest report was presented to the most recent board of directors after the insurance was purchased.

(B) The execution and results of the board evaluation for the year 2023 are as follows:

Evaluation cycle	Internal performance evaluations are conducted annually at the end of each fiscal year, and the evaluation results are submitted to the board for review and improvement by the end of March of the following fiscal year.
Evaluation period	2023/1/1~2023/12/31
Evaluation scope	The Board of Directors, individual board members, and functional committees.
Evaluation method	Internal self-assessment of the Board of Directors, individual self-assessment of board members, and internal self-assessment of each functional committee.
Evaluation content	 Board of Directors performance evaluation items: Participation in company operations. Improving the quality of board decisions. Board composition and structure. Selection and continuous education of directors. Internal controls. Individual board member performance evaluation items: Understanding of company goals and missions. Understanding of board responsibilities. Participation in company operations. Management of internal relationships and communication. Professionalism and continuous education of directors. Internal controls. The measurement items for the performance evaluation of functional committees include the following five aspects: Degree of participation in company operations Understanding of the responsibilities of functional committees Enhancement of the decision-making quality of functional committees Internal controls
	 Board of Directors: The overall average score is 4.70 (out of 5), with slightly lower scores in the aspects of "participation in company operations" and "selection and continuing education of directors" compared to other aspects. The Company will continue to improve in these areas. Individual Board Members:
Reporting date to the	<u> </u>

B. The operation of the Audit Committee:

The Audit Committee held 6 meetings during the most recent fiscal year (A), and the

attendance of independent directors is as follows:

Title	Name	Actual no. of meetings attended (B)	No. of meetings with entrusted attendance	Actual attendance rate (%) (B/A)	Remark
Independent Director	Liaw Dar-Lii	6	0	100%	
Independent Director	Lee An-Chen	6	0	100%	
Independent Director	Sheen Gwo-Ji	6	0	100%	

Other matters to be recorded:

A. The items listed in Article 14-5 of the Securities and Exchange Act.

Date of Audit	Agenda	Content of	Audit	The
Committee Meeting (Session)	<u> </u>	dissenting opinions, reservations, or significant recommendations made by independent directors	Committee decision	Company's handling of the Audit Committee's opinions.

(2) Has the company set up other types of functional committees voluntarily in addition to the Remuneration committee and the audit committee according to law?		√		The company has not set up any other functional committees at present and will evaluate the need for such
committee and the addit committee according to law:			for future committees will be evaluated based on the company's needs.	committees in the future.
(3) Has the company set up a performance appraisal method and an assessment method for the board of directors and conducted performance appraisals on a regular basis every year?			(3) The company has established the "Board of Directors Performance Evaluation Procedure" which conducts an annual performance evaluation of the Board of Directors, including both the overall performance of the board and the individual performance of its members. The results are quantified based on evaluation indicators and submitted to the latest Board of Directors meeting for reporting. The compensation of the Board of Directors is determined in accordance with Article 24 of the company's articles of association, which states that the remuneration of directors shall not exceed 3% of the profits earned during the fiscal year. The procedure for determining the remuneration is based on the performance evaluation of the Board of Directors, which considers both the overall operating performance of the company and the future business risks and trends in the industry. Additionally, it also takes into account the individual director's actual attendance rate, personal performance achievement rate, and contribution to the company's performance, and takes into account industry standards and gives reasonable compensation and nomination for re-election accordingly. Article 24 of the Company's articles of association stipulates that employee compensation shall not be less than 1% of the annual profits. The compensation of our company's executives is evaluated based on their job responsibilities and contribution to the company's operational performance. Our "Performance Appraisal Management Regulations" are used as a reference for evaluation, and we consider the overall operational performance of the company, individual performance evaluations, as well as the target achievement rate, profit margin, operational efficiency, and contribution of the directors and executives, and taking into account industry standards. We calculate their compensation ratio	Corporate Governance Best-Practice

		between sustainable business operations and risk management. All related compensation is reviewed and approved by the Remuneration Committee.	
(4) Does the company regularly assess the independence of the audit firm?		(4) The Company conducts an annual assessment of the independence and suitability of the audit firm, and the evaluation process is as follows: 1. Reviewing the personal qualifications of the auditor. 2. The auditor issues a statement of independence. 3. Evaluating relevant independence standards based on the Code of Ethics for Professional Accountants No. 10 " Independence in Auditing and Review Services." The main independence standards evaluated include whether the auditor is a director, shareholder, or other related parties of the Company, confirming that there is no financial interest or business relationship with stakeholders. In addition, the rotation of auditors is also carried out in compliance with relevant laws and regulations. In 2023, the audit quality indicators (AQIs) provided by the reference auditor were evaluated based on 5 dimensions and 13 indicators, including professionalism, quality control, independence, supervision, and innovation. The auditor and the audit firm were evaluated on their auditing experience, training hours, turnover rate, professional support, quality control review, and quality control support capabilities. The results showed that both the auditor's and the audit firm's capabilities were comparable to or better than those of their peers. In recent years, they have also been promoting digital innovation tools in auditing to enhance efficiency and quality. According to the above evaluation of the auditor's independence and Audit Quality Indicators (AQI), the auditor engaged by the Company complies with the independence and competence requirements, and the matter has been submitted for review and approval by the Audit Committee and the Board of Directors On March 24th, 2023.	
4. Is the listed company equipped with sufficient and appropriate corporate governance personnel and designates a corporate governance officer to be responsible for corporate governance		The Company has established a corporate governance unit as the General Administration Department. On March 24th, 2023, the board of directors passed a resolution to establish the position of Corporate	Corporate Governance Best-Practice

			Implementation Status	Deviations from "the Corporate

matters (including but not limited to providing necessary information for the directors and supervisors to perform their duties, assisting the directors and supervisors in complying with laws and regulations, handling matters related to board meetings and shareholder meetings in accordance with the law, preparing minutes of board meetings and shareholder meetings, etc.)?			Governance Officer, which will be concurrently held by the Deputy General Manager of the Finance Department of the company. The incumbent has over three years of experience in executive positions related to finance, equity, and corporate governance in publicly traded companies. The corporate governance unit of our company is responsible for the following corporate governance matters: 1. Handle matters related to the board of directors and shareholders' meetings in accordance with the law. 2. Prepare minutes of the board of directors and shareholders' meetings. 3. Assist directors and supervisors in their appointment and continuous education. 4. Provide information necessary for directors and supervisors to carry out their duties. 5. Assist directors and supervisors in complying with laws and regulations. 6. Report to the board of directors on the review results of the qualifications of independent directors in nomination, appointment, and during their tenure in compliance with relevant laws and regulations. 7. Handle matters related to changes in the board of directors. 8. Other matters as stipulated in the company's articles of incorporation or contracts.	
5. Has the company established a communication channel with interested parties (including but not limited to shareholders, employees, customers, and suppliers), set up an interested party page on the company's website, and responded appropriately to interested parties concerning important corporate social responsibility issues?			A dedicated section for stakeholders has been set up on the Company's website, and the company has responded appropriately to important corporate social responsibility issues that stakeholders are concerned about.	Corporate Governance Best-Practice Principles for Listed Companies.
6. Does the company appoint a professional stock agency to handle shareholders' meeting-related affairs?	√			Governance Best-Practice Principles for Listed Companies.
7. Information disclosure (1) Has the company set up a website to disclose financial and corporate governance information?	✓		 The Company has established an online filing system for public information and designated a dedicated person to collect and disclose company information. The company has also established a spokesperson system with a spokesperson and proxy spokesperson to improve the accuracy and timeliness of major information disclosure. The Company has set up a website and established an "Investor" 	for Listed Companies.

			Implementation Status	Deviations from "the Corporate
Evaluation Item	Yes	No	Summary Description	Governance Best Practice Principles for TWSE/TPEx Listed Companies" and Reasons
			Relations" section to regularly disclose financial and business-related information as well as corporate governance information for the reference of investors.	
(2) Does the company adopt other information disclosure methods (such as setting up an English website, appointing a dedicated person responsible for the collection and disclosure of company information, implementing the spokesman system, and posting the company's corporate briefing process on the website, etc.)?	✓		 (2)1. A designated person is responsible for the collection and disclosure of information: The shareholder services unit and finance department of the Company are responsible for information collection and disclosure, and the operation is smooth. 2. The spokesperson system is implemented: The Company has designated the vice president of the finance department as the spokesperson. 3. Corporate briefing information is posted on the Company website. 	Governance Best-Practice Principles
(3) Has the company announced and filed its annual financial report within two months after the end of the accounting year, and provided early announcement and filing of its first, second, and third quarterly financial reports and monthly operational results within the prescribed deadline?		√	(3) The Company has many subsidiaries that are included in the consolidated financial statements, which require more time for verification. Therefore, we are unable to announce and file the annual financial report within two months after the end of the accounting year and to announce and file the quarterly financial reports and monthly operational information ahead of the prescribed deadline.	Governance Best-Practice Principles
8. Does the Company have any other important information (including but not limited to employees' rights, employee care, investor relations, supplier relationship, equity of interested parties, training for directors and supervisors, implementation of risk management policies and risk measurement standards, implementation of customer policies, the Company's purchase of liability insurance for directors and supervisors, etc.)?	\		(1) Employee equity and employee care Through the convening of labor-management coordination meetings, the Company can prioritize employee rights and express care for our employees. We have established an employee complaint mailbox which is handled by dedicated personnel who deal with employee feedback. We also hold quarterly employee meetings where employee opinions can be expressed and the Company can respond and communicate explanations. In addition, we organize expert lectures and health seminars to make our functions more diverse and enriching. We hold monthly birthday parties to allow employees to relax and strengthen their sense of belonging to the Company. The employee welfare committee organizes various activities for employees to benefit their physical and mental health, and also participates in donations to disadvantaged groups. We prioritize employee workplace safety and health issues and hold regular environmental and safety inspection meetings each month with the goal of continuous improvement. Outstanding colleagues who perform well at work are recognized and rewarded each year through a selection process	In compliance with the Corporate Governance Best-Practice Principles for Listed Companies.

		110	Summary Description	and Reasons	
			for outstanding employees. We also promote various forms of		
			public welfare activities under the name of outstanding		
			employees. This motivational approach towards our employees		
			instills a sense of satisfaction and happiness, allowing them to		
			work smarter and live healthier lives.		
			In addition, the Company has established an employee retirement		
			policy in accordance with the Labor Standards Act and formed a		
			Labor Retirement Preparation Fund Supervision Committee. We		
			allocate 2% of the total monthly salary amount to set aside for the		
			Labor Retirement Preparation Fund, which is deposited in a		
			special account at the Bank of Taiwan. This fund is intended for		
			future payment of employee retirement benefits. Starting from		
			July 1, 2005, the Company has established a retirement policy		
			based on the Labor Pension Act, and for those employees who		
			choose to apply for the Labor Pension Act, we contribute no less		
			than 6% of their monthly salary to their account with the Bureau		
			of Labor Insurance. Retirement benefits are paid out as either		
			monthly installments or a lump sum payment, based on the		
			amount accumulated in the employee's retirement account and		
			accrued earnings. All regulations and measures related to		
			labor-management relations in the Company are implemented in		
			compliance with relevant laws, and any new or revised measures		
			related to labor-management relations are only established after		
			sufficient consultation and agreement between labor and		
			management. The Company regularly sends employees to		
			participate in safety and health lectures, as well as providing		
			pre-employment education and training, management courses,		
			professional skills, self-improvement, and other training		
			programs. We aim to provide a comfortable and safe working		
			environment for our employees and to support their ongoing		
			learning and development within the organization.		
			(2) Investor Relations		
			The Company adheres to the principles of fairness and		
			transparency in dealing with all shareholders. Every year, we		
			convene a shareholders' meeting in accordance with the Company		
			Act and relevant laws and regulations and notify all shareholders		
			to attend the meeting in accordance with the relevant rules. We		
			encourage shareholders to actively participate in the election of		
			directors and supervisors and the amendment of the Company's		
			articles of association, as well as to be informed of major financial		
			transactions such as the disposal of assets. We also provide

				and Reasons		
			shareholders with ample opportunities to ask questions or make			
			proposals to achieve balance and fairness. The Company has			
			established rules for shareholder meetings in accordance with the			
			law, properly preserves the minutes of shareholder meetings, and			
			discloses relevant information on the Market Observation Post			
			System (MOPS). To ensure that shareholders have the right to be			
			fully informed, participate, and make decisions on important			
			matters of the company, the Company has established the position			
			of spokesperson and proxy spokesperson. We also have dedicated			
			personnel to handle shareholder suggestions, questions, and			
			disputes.			
			Since its public listing, the Company has upheld the principle of information transparency and has disclosed information in			
			accordance with the regulations of the Public Offering Company's			
			Disclosure Checklist and the Taiwan Stock Exchange's			
			Verification and Disclosure Procedure for Major Information of			
			Listed Companies. We have established an online system for			
			reporting and disclosing public information, and have assigned			
			personnel to be responsible for collecting and disclosing company			
			information. After the relevant departmental managers review and			
			confirm the information, we promptly announce and report			
			relevant information, providing timely and comprehensive			
			information to investors that may impact their investment			
			decisions.			
			(3) Respect for Stakeholders' Rights and Interests			
			The Company complies with the law and regulations to honestly			
			and openly disclose company information, to safeguard the basic			
			rights and interests of investors. We maintain open			
			communication channels with our banks, employees, consumers,			
			and suppliers, and respect and uphold their legal rights and			
			interests. We have spokespersons and proxy spokespersons to			
			answer investor questions and provide high levels of transparency			
			in our financial and business information for investors and			
			stakeholders. In addition, the Company has established procedures			
			for group organizational management, supervision and			
			management of subsidiaries, and management of related-party			
			transactions. All transactions between related companies are			
			carried out in accordance with these procedures. Furthermore, we			
			have explained the restrictions on the competitive activities of our			
			directors in the shareholders' meeting.			

			Deviations from "the Corporate	
Evaluation Item	Yes	No	Gov	vernance Best Practice Principles TWSE/TPEx Listed Companies" and Reasons
			(4) The Company purchases liability insurance for all directors and supervisors on a regular basis every year. This is done to reduce and distribute the risks associated with errors or omissions committed by directors, which could potentially cause significant damage to the company and its shareholders. We periodically review the content of the insurance policy to ensure that the coverage and compensation amount are sufficient and meet our needs. The most recent report on the board of directors was made after the purchase of insurance.	
			(5) Succession Planning for Board Members and Key Management Personnel The purpose of succession planning is to ensure that the company has a pool of talented individuals to succeed in key management positions, thereby maintaining depth in the management bench and meeting the long-term human resource needs of the organization. In planning for succession, the Company evaluates candidates based not only on their professional skills and execution capabilities, but also on their fit with the company's culture, work values, and personal qualities. A candidate with cross-functional experience is preferred to ensure a broad perspective on the business. 1. Succession Planning and Implementation for Board Members: The Company has a Board of Directors consisting of 7 members (including 3 independent directors) who possess expertise in management, finance, and R&D. The future composition and member background of the board of directors will continue to follow the current structure. We have a strong network of connections and will also seek suitable talent from external sources to assume positions as needed. In addition, independent directors are required by law to have work experience in business, R&D, legal, accounting, or corporate affairs. Therefore, the direction of future succession planning will focus on professionals with expertise in each field. 2. Succession Planning and Implementation for Key Management Personnel: The Company's succession plan is currently in progress. The general managers of the Company and its subsidiaries are the successors to the general manager and chairman. Through	
			managing the Company, they cultivate their succession capabilities. The group's various company executives are all professional staff who fully endorse the company's business

			certain amount of seniority within the group. Their				
			performance, professional expertise, and business acumen have				
			all been recognized. Some of the designated successors are				
			already members of the board of directors of various companies				
			within the group, and they are expected to learn about the				
			operations of the board of directors in the coming years. The				
			goal is for them to take over leadership positions in 8 to 10				
			years. The Company's succession plan is not limited to senior				
			management, but will also be extended to lower levels to ensure				
			that each level has qualified successors. The Company will also				
			cultivate successors for departmental senior managers through				
			its proxy system, job rotation, and functional training. The				
			selection of suitable successors will be evaluated through				
			on-the-job learning, self-study, job experience, and the				
			Company's existing performance appraisal system. The				
			retention rate of key talents will be used as an important				
			performance indicator for the management department on a				
			monthly basis.				
			In addition, the Company conducts job rotations and				
			promotions for key talents based on future development				
			strategies, investment plans, technology roadmaps, employee				
			performance evaluations, and retirement situations, to				
			effectively transfer professional experiences and cultivate				
			suitable management talent for succession.				
			(6) The Common and the state of				
			(6) The Company provides at least one training session per year to				
			our directors, managers, and employees on the prevention of insider trading in accordance with relevant laws and regulations.				
			The company provides education and promotion on the prevention of insider trading at least once a year to directors, managers, and				
			employees. The education and training also cover new employees				
			and include topics such as the definition of insider trading,				
			internal significant information, and its public disclosure,				
			prohibition of insider trading, and penalties for violations. The				
			Company conducted relevant education on preventing insider				
			trading to current directors and managers on December 19th,				
			2023, and made the course materials available for employees to				
			refer to at any time via the Company's internal system.

^{9.} Please explain the improvement made based on the corporate governance evaluation results released by the Corporate Governance Center of Taiwan Stock Exchange Corporation for the latest fiscal year, and propose priority areas and measures for those who have not yet improved. (Companies that have not been evaluated need not be filled in.)

We have made the following improvements based on the corporate governance evaluation results released in the 10th assessment (the fiscal year 2023):

1. We have established internal rules that prohibit our directors, employees, and other insiders from using non-public information to profit from the market. We have disclosed these rules on our company's website and ensured their implementation.

In the fiscal year 2024, we will prioritize the following areas for further strengthening:

1. Invited (self-initiated) to hold at least two corporate briefings, with the first and last briefings of the evaluated year spaced more than three months apart.

- D. The composition and operation of the Company's remuneration committee are as follows:
 - (A) On December 29, 2011, the board of directors of the Company approved the establishment of a remuneration committee. The members of the current remuneration committee are independent directors Mr. Liaw Dar-Lii, Mr. Lee An-Chen, and Mr. Chu Ming-Ching. Their term of office is from August 10, 2022, to June 28, 2025. Mr. Liaw Dar-Lii, an independent director, serves as the convener of the committee.
 - (B) The professional knowledge and independence of the members of the current remuneration committee are as follows:

Identity (Note1)	Term Name	Professional qualifications and experience (Note 2)	Independence status (Note 3)	The number of remuneration committee memberships held concurrently in other publicly listed companies.

Note 1: In the two years before the appointment and during the term of office, the member shall not have any of the following circumstances:

- (1) An employee of the Company or its affiliated enterprises.
- (2) Director or supervisor of the company or its affiliated enterprises (except for independent directors appointed mutually by the company and its parent company, subsidiary, or subsidiary of the same parent company according to this law or local laws and regulations).
- (3) The member, his/her spouse, minor children, or any natural person shareholder who holds 1% or more of the Company's issued shares or is among the top ten shareholders in the name of others.
- (4) Manager listed in (1) or spouse, relatives within two degrees of kinship, or direct blood relatives within three degrees of kinship of the personnel listed in (2) or (3).
- (5) Director, supervisor, or employee of the corporate shareholder who directly holds 5% or more of the total issued shares of the Company, is among the top five shareholders or is appointed as a director or supervisor of the company by the corporate shareholder according to Article 27, Paragraph 1 or 2 of the Company Act (except for independent directors appointed mutually by the company and its parent company, subsidiary, or the subsidiary of the same parent company according to this law or local laws and regulations).
- (6) Director, supervisor, or employee of another company or organization that controls more than half of the seats or voting rights of the Company's board of directors, but not including independent directors appointed mutually by the Company or its parent company, subsidiary, or the subsidiary of the same parent company according to this law or local laws and regulations.
- (7) Director (trustee), supervisor (supervisor), or employee of another company or organization, who is the same person or spouse of the company's chairman, general manager, or equivalent position (except for independent directors appointed mutually by the Company and its parent company, subsidiary, or the subsidiary of the same parent company according to this law or local laws and regulations).
- (8) Director (trustee), supervisor (supervisor), manager, or shareholder holding 5% or more of the shares of a specific company or organization that has financial or business dealings with the Company.
- (9) Professional, sole proprietor, partnership, company, or organization providing related services in commerce, law, finance, accounting, and other fields to the company or its affiliated enterprises, and whose total remuneration received in the past two years does not exceed NT\$500,000, as well as their spouses, enterprise owners, partners, directors (trustees), supervisors (supervisors), managers, and their spouses. However, members of the remuneration committee, public tender offer review committee, or merger special committee who perform duties in accordance with the Securities and Exchange Act or the Company Merger and Acquisition Act are not subject to this restriction.

- (C) Information on the operation of the remuneration committee
 - a. The remuneration committee of our company consists of three members.
 - b. The term of office for the current committee is from August 10, 2022, to June 28, 2025. In the most recent fiscal year, the remuneration committee held two meetings (A), and the qualifications and attendance of the members were as follows:

Title	Name	Actual no. of meetings attended (B)	No. of meetings with entrusted attendance	Actual attendance rate (%) (B/A)	Remarks
Convener	Liaw Dar-Lii	2	0	100%	
Member	Lee An-Chen	2	0	100%	
Member	Chu Ming-Ching	2	0	100%	

Other matters to be recorded::

- 1. If the board of directors did not adopt or amend the suggestion of the remuneration committee, please indicate the date and session number of the board meeting, the contents of the motion, the result of the resolution, and the company's handling of the suggestion of the remuneration committee (if the remuneration passed by the board is better than the suggestion of the remuneration committee, please state the difference and the reasons): Nil.
- 2. If any member had objections or reservations about the resolution of the remuneration committee and there is a record or a written statement, please indicate the date and session number of the remuneration committee meeting, the contents of the motion, all the opinions of the members and how the opinions were handled:
 - (1) Resolutions of the Remuneration Committee for the fiscal year 2023 are as follows:

		conditions.	

(2) Items decided by the compensation committee, with members having recorded or written dissenting or reserved opinions: None.

3. Duties of the Remuneration Committee:

The functions of the Company's Remuneration Committee are regulated by relevant laws and regulations. The committee takes a professional and objective stance to evaluate the compensation policies and systems for our company's directors and managers. Generally, the committee holds at least two meetings per year and may convene additional meetings as necessary. The committee also submits proposals to the board of directors for reference in decision-making.

(1) Duties of the Remuneration Committee:

- a. Regularly review and propose amendments to the organization regulations of the committee.
- b. Establish and regularly review the performance evaluation criteria for directors and managers, as well as the policies, systems, standards, and structures for compensation and benefits. The evaluation criteria should be disclosed in the annual report.
- c. Regularly assess the achievement of performance goals for directors and managers and determine individual compensation and benefits based on the evaluation results.
- (2) When fulfilling its duties, the Remuneration Committee adheres to the following principles:
 - a. The performance evaluation and compensation and benefits for directors and managers should reference the industry's standard compensation practices for similar-sized companies and take into consideration their performance, the company's operating performance, and the future risk implications.
 - b. The committee should not encourage directors and managers to engage in activities that exceed the company's risk appetite for the sake of compensation and benefits.
 - c. The proportion of short-term incentive compensation and the timing of payment of variable compensation for directors and senior managers should be determined based on industry characteristics and the company's business nature.
 - d. Committee members should recuse themselves from discussing and voting on any matters related to their compensation and benefits to ensure fairness and objectivity.

E. The implementation status of sustainable development promotion1. The implementation status of sustainable development promotion and the differences between the sustainable development best practice principles for TWSE/TPEx listed companies, as well as the reasons for these differences.

				companies
			occupational safety and health management system. The companies within our group supervise and exchange experiences with each other. Regular fire drills and safety education and training are conducted every year to cultivate employees' emergency response and self-safety management abilities. Product Quality The Company obtained the QC080000 Hazardous Substance Process Management System certification in 2014. All of our products comply with government regulations and meet the requirements of the EU RoHS directive, with no hazardous substances present. Through strict quality system management, we provide our customers with stable product quality. To ensure customer service quality and satisfaction, we conduct regular customer satisfaction surveys and strengthen our cooperation with customers.	
			B. The Company adheres to the principle of integrity and feedback to society, and in pursuing sustainable business and profits, we fulfill corporate social responsibility, value	
			the rights and interests of stakeholders, and pay attention to	
			environmental, social, and corporate governance issues,	
			which are incorporated into our management policies and operations to achieve the goal of sustainable management.

			emissions of exhaust gas, wastewater, waste, noise, and	

			Execution status	Differences and reasons for the
Item	Yes	No	Description	implementation of sustainable development practices compared to the best practice principles for TWSE/TPEx listed companies
			chemical substances generated during the Company's processes. (B) Setting targets and managing the use of resources such as electricity, water, and air conditioning. (C) Submitting reports for the "Energy User Energy Conservation Audit System" as required by energy management regulations. (D) Having obtained certification for ISO 14001 Environmental Management System, ISO 45001 Occupational Health and Safety Management System, QC080000 Hazardous Substance Process Management System, and conducted an inventory and third-party verification of Scope 1, 2, and 3 greenhouse gas emissions under ISO 14064-1.	
(B) Is the company committed to improving energy efficiency and using low-impact renewable materials to reduce its environmental footprint?	\		(B) The company actively maximizes the efficient use of resources, uses environmentally-friendly materials that are pollution-free and non-toxic in all products produced during our processes and improves our process and operation management to reduce waste and lower production costs. Regarding waste and defective products generated during the production process, we calculate the amount produced through effective management procedures and recycle them. The recycled waste and defective products are then handed over to qualified waste recyclers to be reported to the Environmental Protection Bureau and disposed of and recycled in accordance with the law.	Complies with the Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies.
(C) Has the company assessed the potential risks and opportunities of climate change for its current and future operations, and taken relevant measures in response?			(C) The Company continuously monitors the impact of climate change on operational activities, adhering to the belief in "coexistence with nature and a people-centered approach" and the spirit of "protecting the Earth and employee health." Additionally, referencing the recommendations for climate-related financial disclosures issued by the Financial Stability Board's Task Force on Climate-related Financial Disclosures (TCFD), the Company initially conducts risk analyses on the impacts of climate change and plans corresponding measures. Future communications will outline the company's climate change response plans within the TCFD framework. A preliminary identification of risks and opportunities related to climate change has already been completed. For detailed information, please refer to Note 1	Complies with the Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies.

			Execution status	Differences and reasons for the
Item	Yes	No	Description	implementation of sustainable development practices compared to the best practice principles for TWSE/TPEx listed companies
			(P.51).	
(D) Has the company calculated its greenhouse gas emissions, water usage, and total waste generation over the past two years, and developed policies for reducing greenhouse gas emissions, water usage, or other waste management?			D. The Company's greenhouse gas emissions, water usage, and total waste generation over the past two years are as follows: (A) Some of the Company's factories have conducted greenhouse gas inventories, and the data is as follows: a. The total greenhouse gas emissions for the year 2023 were 5,985.338 metric tons of CO2 equivalent (CO2e). The total greenhouse gas emissions for the year 2022 were 5,381.703 metric tons of CO2 equivalent (CO2e). 2023's total greenhouse gas emissions increased by 603.635 metric tons of CO2e compared to 2022, primarily due to increased production capacity and the inclusion of additional Scope 3 upstream transportation emissions this year. Starting in 2021, the Company has for the first time included some Scope 3 categories in our inventory and verification, including employee business travel, employee commuting, downstream transportation and distribution of goods, waste disposal, and upstream emissions from fuel and electricity. The Company's greenhouse gas inventory for fiscal year 2023 has been completed and has obtained third-party certification. (For detailed information, please refer to the ACES's ESG Report) b. The target for total greenhouse gas emissions in 2023 is set based on the 2022 data, with a yearly reduction target of 1%, which will be achieved through the following aspects: (a) Air conditioning and lighting: i. Setting the temperature of the workplace and office at 26-28°C, with designated personnel responsible for turning on and turning off the air conditioning. ii. Lighting switches are subdivided and controlled by area. Time-controlled switches are used to manage lighting in public areas. All factory lighting fixtures have been replaced with LED lighting to reduce electricity waste.	Development Best Practice Principles for TWSE/TPEx Listed Companies.

	Execution status Differences and reasons for the				
Item	Yes	No	Description	implementation of sustainable development practices compared to the best practice principles for TWSE/TPEx listed companies	
			 (b) Electricity usage for air compressors: Regular inspections are conducted to check for air leaks in the company's air ducts and repairs are made promptly to avoid increasing the load on the air compressors due to air leaks, thus achieving energy savings in the use of air compressors. The company has fully replaced its air compressors with variable frequency drives. Optimizing the fuel consumption of official vehicles and making advance arrangements for carpooling. Waste sorting is implemented within the factory, and all waste is processed by qualified vendors with clear records of the disposal process. Energy management - Promoting environmental protection measures such as digital energy-saving, waste reduction, and recycling, and providing training and promotion on energy-saving and emission reduction measures. Comparison and explanation of water usage and total waste generation: Comparison and explanation of water usage: Total water usage in 2023: 21,810 cubic meters Based on the statistics for the two fiscal years, the water usage in 2023 increased by 2,277 cubic meters compared to 2022. The primary reason is that an increase in production capacity led to a concurrent increase in water usage. (For more details, please refer to the ACES's ESG Report) Comparison and Explanation of Total Waste Generation: Total waste generated in 2023: 18.62 metric tons (municipal solid waste) Total waste generated in 2022: 20.4 metric tons (municipal solid waste) According to the statistics for the two years, waste generation decreased by 1.78 metric tons. (For more details, please refer to the ACES's ESG Report)

Item		No	Description	implementation of sustainable development practices compared to the best practice principles for TWSE/TPEx listed companies
D. Social issues (A) Does the company develop relevant management policies and procedures in accordance with relevant laws and international human rights conventions?			(A) The Company has developed the "Macroblock Electronic Corporate Social Responsibility Policy" by reference to the International Bill of Human Rights, which includes policies to protect human rights, including the International Covenant on Economic, Social, and Cultural Rights and the International Covenant on Civil and Political Rights, both of which are United Nations human rights conventions. In order to fulfill our corporate social responsibility and protect the basic human rights of all employees, customers, and stakeholders, we follow the principles outlined in the United Nations Universal Declaration of Human Rights, the United Nations Guiding Principles on Business and Human Rights, the United Nations Global Compact, and the International Labour Organization's human rights conventions, to respect internationally recognized basic human rights, including freedom of association, caring for vulnerable groups, prohibiting child labor, eliminating all forms of forced labor, eliminating employment and job discrimination, and complying with labor-related laws and regulations in the country or region where the company operates, to protect the legitimate rights and interests of employees, and establish appropriate management methods and procedures. (1) Provide employees with a reasonable salary and bonus system. (2) Provide employee education and training programs. (3) Implement insurance plans and leave systems. (4) Set aside retirement benefits in accordance with the law. In terms of labor-management coordination meetings, we can attach importance to employee rights and express concern for employees. We have also set up physical and online employee suggestion boxes to receive employee complaints and suggestions, and value two-way communication and coordination. In addition, the Company follows the international trend and adopts the Code of Conduct formulated by the Responsible Business Alliance (RBA) (formerly known as the Electronic Industry Citizenship Coalition (EICC)) as an important behavioral norm	Development Best Practice Principles for

			Execution status	Differences and reasons for the
Item	Yes	No	Description	implementation of sustainable development practices compared to the best practice principles for TWSE/TPEx listed companies
			code of conduct developed by the Responsible Business Alliance (RBA) (formerly known as the Electronic Industry Citizenship Coalition, EICC) as an important behavior norm for all its business activities. The basic principle of using this code of conduct is that all business operations must fully comply with the laws, regulations, and legal requirements of the countries in which they operate, and encourage participants to actively use internationally recognized standards to promote social and environmental responsibility, business ethics, and ensure the safety of the working environment for the entire supply chain and subcontractors, respect for each employee, and compliance with moral principles in business operations. The Company is committed to continuously self-checking its performance in labor, health, safety, environmental, and ethical aspects, accepting on-site audits by third-party verification agencies, and proactively requiring suppliers to adopt RBA tools and standards. To demonstrate this commitment and create a sustainable business environment, we will uphold an attitude and position of integrity and non-compromise, establish relevant RBA policies, and strive tirelessly for the rights and welfare of practitioners and communities in the electronics industry supply chain. The Company has also undergone the RBA Validated Assessment Program (VAP) in 2022, which involves a site audit conducted by an independent third-party organization. We are proud to have received a high score of 200 points (out of a maximum of 200) and have been awarded Platinum Status. The Company is committed to promoting human rights protection policies, and in addition to policy formulation, we have also implemented human rights assessments, risk mitigation measures, and related education and training. Measures to mitigate human rights risks: The Company is committed to ensuring that the human rights of its employees and those in its supply chain are respected and that their working environment is safe. To fulfill this commitme	

			Execution status	Differences and reasons for the
Item	Yes	No	Description	implementation of sustainable development practices compared to the best practice principles for TWSE/TPEx listed companies
			with the RBA Code of Conduct. Human Rights Assessment: Every year, the Company conducts a hazard identification and risk assessment of labor ethics to control risks. Education and training on human rights protection: [Labor and Ethics Education and Promotion] New employees are provided with training on relevant legal compliance and promotion content, including the prohibition of forced labor, prohibition of child labor, anti-discrimination, anti-harassment, working hour management, and protection of humane treatment. [Sexual Harassment Prevention and Education] Sexual harassment prevention education includes understanding the concept of sexual harassment, preventing sexual harassment, and the company's handling procedures for sexual harassment incidents. [Provide a complete series of occupational safety training] The Company provides comprehensive occupational safety training programs tailored to the specific needs of different employee categories and the situations they may encounter in the workplace. These programs include fire safety training, emergency response training, first aid training, general safety and health education training, and more.	
(B) Does the company establish and implement reasonable employee welfare measures (including salaries, leaves, and other benefits), and appropriately reflect the business performance or results in employee compensation? (C) Does the company provide employees with a safe and healthy			 (B) The Company has established work rules and related personnel management regulations, covering basic wages, working hours, leave, retirement benefits, labor, and health insurance benefits, occupational accident compensation, etc., for the employed workers, and all related policies are in compliance with the relevant provisions of the Labor Standards Act. In addition, the company has also set up a labor welfare committee, which is operated by elected welfare commissioners to handle various welfare matters, such as employee travel. The Company's remuneration policy is based on individual abilities, contributions to the company, individual performance, and the correlation with the company's business performance. (C) The Company is committed to providing a safe and healthy 	Development Best Practice Principles for TWSE/TPEx Listed Companies.

			Execution status	Differences and reasons for the

working environment, and regularly conduct safety and health education for employees?			working environment for employees. In addition to arranging health checks for new employees, we also hold regular health checks for existing employees. For direct personnel engaged in production line work, we arrange special health checks for occupational disease prevention under labor insurance. Before new employees start their jobs, we provide them with safety and health education and training and conduct related training in accordance with the Occupational Safety and Health Act. In addition, our company has established the "Precautions for Prevention and Handling of Sexual Harassment" and provided channels for complaints to maintain a healthy work environment. We also provide accident and medical insurance for employees to ensure their safety at work and to mitigate the company's management risks. Emergency response procedures are in place to carry out safety maintenance and disaster emergency response training. Every year, we invite local fire departments or professional fire consultants to provide fire training and drills. According to the regulations of the Occupational Safety and Health Act, we employ qualified nurses and contract occupational medicine specialists to provide on-site health services in compliance with legal requirements. The Company applied for ISO140001 and ISO45001 in 2015 and obtained the relevant certificates in January 2017, with annual verifications to date. There were no occupational accidents or fire incidents in 2023.	Development Best Practice Principles for TWSE/TPEx Listed Companies.
(D)Does the company establish an effective career development training program for employees?	~		(D) The company is committed to promoting continuous learning and self-improvement among employees through the motto "The Power of Knowledge," and spares no effort in investing in employee training. A comprehensive training system has been established for new employees, including basic and professional training, to help them quickly adapt to the new environment and feel a sense of belonging. In-service employees can continuously challenge themselves and grow through various training channels, such as internal and external training, on-the-job training (OJT) provided by supervisors or peers, and monthly library reading. In addition, career planning and development are integrated through job series/levels planning, job rotation, project assignments, and overseas assignments, enabling colleagues to jointly enjoy the joy of intellectual growth and create a better	Development Best Practice Principles for

			Execution status	Differences and reasons for the
Item	Yes	No	Description	implementation of sustainable development practices compared to the best practice principles for TWSE/TPEx listed companies
			future. The Company has established an education and training management procedure to plan the training courses according to the professional and functional requirements of employees. This is to enhance the knowledge and skills of employees, improve their overall quality, and promote business performance. We provide leadership, organizational management, and teamwork training courses and activities for managerial staff to enhance their management and leadership capabilities. For marketing and sales staff, we offer a product or sales-related professional training to strengthen their marketing skills. For R&D staff, we offer specialized training courses such as product development and design, APQP, and problem analysis and resolution. As the company expands globally, language learning courses are also provided to strengthen language skills. With the advent of Industry 4.0 and smart manufacturing as a global trend, we have invited the Smart Manufacturing Research Center of National Central University to conduct a 25-week professional training program on engineering, data applications, information security, and management for our company. We execute the following relevant training courses in accordance with the annual education and training plan: (1) New employee pre-service training: includes company culture and regulations, intellectual property overview, basic operating system operations, quality management awareness, no harmful substance policy promotion, personal job responsibilities explanation, professional skills training, etc. Our company has a "New Employee Mentorship System", where new employees follow a plan to receive complete pre-service education and training, and with the guidance of a dedicated mentor, assist new employees in quickly familiarizing themselves with and integrating into their work positions. (2) Professional skills training: A. Internal Training: Department heads or senior staff members serve as instructors, and courses are arranged based on the technical and professional training

(F)	Does the company have a supplier management policy that requires suppliers to comply with relevant regulations and standards on issues such as environmental protection, occupational health and safety, and labor rights, and monitors their implementation?			(F) The Company has established a "Supplier Evaluation and Control Procedure" which requires suppliers to complete a quality system evaluation form before transacting with us. We also conduct on-site evaluations of their compliance with environmental, safety, and health regulations. Their records and impacts on the environment and society are also important evaluation criteria.	Development Best Practice Principles for TWSE/TPEx Listed Companies.
E.	Does the company refer to internationally recognized reporting standards or guidelines to prepare non-financial reports such as sustainability reports? Have these reports obtained confirmation or assurance opinions from third-party verification units?			Since 2021, our company has prepared a sustainability report based on the GRI Standards and obtained moderate assurance according to Type 1 of the AA1000 through external verification by TUV Rheinland Taiwan Ltd.	Development Best Practice Principles for

- F. If the company has its sustainability guidelines based on the "Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies," please describe how these guidelines differ from the company's operation and the established guidelines.
 - The Company's Board of Directors passed a revision on November 10th, 2022, to rename the "Corporate Social Responsibility Best Practice Principles" to "Sustainable Development Best Practice Principles" and made amendments to some of its articles. This serves as our company's guiding principle for promoting CSR, and there are no major differences in its operation and the spirit and principles governed by the "Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies."
- G. Other important information that helps to understand the implementation of sustainable development:
 - (A) Recognizing the importance of environmental protection measures, our company has taken the following actions to promote environmental and occupational health and safety:
 - a. Promotion of Restrictions of Hazardous Substances (RoHS) and Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH) regulations.

 The RoHS came into effect on July 1st, 2006, and prohibits the sale of products containing six hazardous substances, including lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyls, and polybrominated diphenyl ethers, to the EU. On July 22nd, 2019, four phthalates (DEHP, BBP, DBP, DIBP) were added to the list. Our company actively promotes green production and procurement and has achieved compliance with hazardous substance-free products in our production process. We have also received recognition from our major customers for meeting their requirements.
 - b. Resource recycling and waste reduction plan
 - The Company actively promotes the full and effective utilization of resources to reduce waste and production costs. In addition to improving processes and operational management to reduce scrap material generation, we also develop and select non-polluting and low-polluting processes to minimize waste. Moreover, metal waste generated during production is calculated and recycled through an effective management program. The recycled waste metal is then sold to waste recycling businesses, reducing the wastage of resources.
 - (B) The Company upholds the philosophy of taking from society and giving back to society, continuously contributing to society through participation in public welfare activities and fulfilling our social responsibilities. Our achievements are as follows:
 - a. Based on the desire to let children in remote areas of Taiwan experience the joy of reading, the Company has been donating mobile book trucks to local governments with remote areas under their jurisdiction in the name of outstanding employees since 2018. This effort aims to reduce the disparity in reading resources between urban and rural areas in Taiwan. In fiscal year 2023, another mobile book truck was donated to Zhudong Town, Hsinchu County, hoping to inspire further public interest in philanthropy and enhance the reading capabilities of children in remote areas.
 - b. With the hope of allowing children in remote areas throughout Taiwan to experience the joy of reading, our company has been donating mobile book trucks to county and city governments since 2018 in the name of outstanding employees. This is to help reduce the gap in reading resources between urban and rural areas and fulfill our social responsibilities. As an example, in

			Execution status	Differences and reasons for the
				implementation of sustainable development

				companies

2023, we plan to donate a total of three mobile book trucks to Miaoli County, Hsinchu County, and Pingtung County. The donation ceremony for Hsinchu County's mobile book truck will be held on July 19th at the Jianshi Township Office, followed by the Miaoli County mobile book truck donation ceremony on November 2nd at the outdoor plaza of the Miaoli County Government. The donation of the mobile book truck to Pingtung County is also expected to be completed in the first quarter of 2023, hoping to inspire more public welfare activities through our efforts.

- c. In response to World Oceans Day on June 8, the Company organized a beach cleaning event on June 10, 2023, led by the chairman and involving employees, their families, and friends to take practical action for environmental protection. This effort contributed to sustainable development for the planet. On that day, we collected 1,273 kilograms of trash and reduced carbon emissions by 2.622 tons! Following the beach cleaning, an internal memo was circulated across the entire group to promote environmental awareness and foster the belief that "everyone can participate in environmental protection."
- d. As Christmas approached in December of the year 2023, the Company continued its three-year collaboration with the well-known charity organization World Vision, launching a Christmas Wish Gift drive within the Company. The event received enthusiastic responses from colleagues and gathered many gifts for children in orphanages and disadvantaged middle and elementary school students, totaling over a hundred Christmas gifts. This year, the initiative also included the collection of nearly 30 "love red envelopes," helping families in difficulty have an opportunity for change. Additionally, in the name of that year's three outstanding employees, scholarships were donated through charitable organizations like the Mustard Seed Mission to several disadvantaged students in Taoyuan, aiming to provide them with peace of mind to focus on their studies.

Note 1: ACES identifies the key risks associated with climate change.

	Climate change's main risks	Potential operational and financial impacts.	Strategic direction to response		
Market risk	 Customers demanding process improvements and setting carbon reduction targets. If the company is unable to meet these requirements, it may impact its operational performance. As consumer awareness of carbon reduction increases and the demand for low-carbon products grows, additional costs for product development and production are incurred. 	 Increased operating costs A decline in business performance Changes in market demand 	 Choose suppliers that align with sustainability concepts to accelerate the company's progression towards low-carbon production. Actively monitor market trends and conduct thorough market research to ensure products align with low-carbon sustainability concepts. 		
Policy and legal risks	 Gradual limitation of greenhouse gas emissions by national policies Regulations requiring power plants to use a certain proportion of renewable energy 	 Increased operating costs Increased R&D expenses 	 Actively cooperate with government policies, and set greenhouse gas reduction targets year by year. Understanding the current renewable energy planning in Taiwan, setting an annual electricity saving target of 1%, and gradually increasing the usage rate of green electricity. 		
Extreme weather events	 Power shortage may cause the company unable to operate normally, affecting product production and increasing operating costs. Typhoons, heavy rain, floods, and other climate change-related disasters may affect the shipment of raw materials or cause damage to the Company, resulting in the Company's unable to operate normally and increasing operating costs. 	 Reduced operational efficiency Increased operating costs Decreased customer satisfaction Employee safety concerns 	 Diversify the sources of raw materials to reduce risks. Diversify the sources of raw materials to reduce risks. Strengthen environmental safety and health education and training. 		

Identification of major opportunities by ACES regarding climate change impacts.

	ain opportunities of climate change.	Challenges and opportunities	Strategic direction to response
Opportunities for market changes	 Customers have a high demand for products that are energy-efficient and have a low environmental impact. Developing low-carbon products that meet market demand. 	Increase in revenueProduct innovation	Actively invest in developing low-carbon products.
Policy and legal changes	The government has passed incentive measures to promote the use of alternative energy.	Lower operating costsProduct innovation	Align with customer supply chain mentoring programs.
Resource efficiency.	 Replacing outdated equipment Improving resource efficiency to reduce environmental impact 	 Cost reduction in product development Establishment of corporate image 	Monitor energy consumption of equipment and establish a plan to replace outdated devices. Develop and implement an energy-saving plan.

2. Climate-related information.

(1) Implementation status of climate-related information.

Iteı	n	Implementation status
1.	Describe the board of directors and management's	1. To strengthen the sustainability competence of the highest governance level, the board members have been participating in continuous education training on corporate sustainability
	oversight and governance of climate-related risks	and climate risk since 2022. In 2023, four directors completed a total of 24 hours in courses
	and opportunities.	related to sustainable finance and climate change issues. Additionally, the sustainability
		development committee regularly (quarterly) reports the progress and promotion of
		climate-related issues to the board, with a total of four sustainability progress reports presented
		in 2023.
2.	Detail how identified climate risks and	2. Identified climate risks and opportunities include risks—market risk, policy and legal risks,
	opportunities impact the business, strategy, and	and extreme climate disasters; opportunities—market changes, policy and legal changes, and
		resource efficiency. Corresponding actions and financial impacts include short-term—trend
	finances (short-term, medium-term, long-term).	compliance monitoring, energy-saving measures and the introduction of energy management
		systems, response to customers' low-carbon supply chains, and internal procedure management
		and optimization; mid-term—low-carbon manufacturing, increasing renewable energy ratios,
		low-carbon product research and development; long-term—establishing and optimizing a
		sustainable value chain, energy transition, and green products.
3.	Describe the financial impacts of extreme weather	3. The Company has begun to assess the establishment of renewable energy and energy
	events and transition actions.	management systems to reduce the impact of climate risks.
4.	Explain how the processes for identifying,	4.In response to corporate sustainability development, the company plans to establish a
	assessing, and managing climate risks are	sustainability office to assist and promote related activities by the sustainability development
	integrated into the overall risk management	committee. Future issues such as climate risks will be incorporated into the company's internal

system.

- If scenario analysis is used to assess resilience to climate change risks, disclose the scenarios, parameters, assumptions, analytical factors, and primary financial impacts used.
- 6. If there is a transformation plan to manage climate-related risks, describe the plan's content, and the indicators and targets used to identify and manage physical and transition risks.

- 7. If internal carbon pricing is used as a planning tool, explain the basis for price setting.
- 8. If climate-related goals are set, explain the activities covered, scope of greenhouse gas emissions, planning period, and annual progress achieved; if carbon offsets or Renewable Energy

audit and existing risk systems for discussion by the sustainability development committee.

5. The company is currently conducting preliminary risk factor analysis based on the TCFD and plans to hold internal discussions on scenario analysis in 2024.

- 6.Policy regulations related to energy transition and operational costs represent one of the major climate risks for the company. In the short to medium-long term, the company adheres to environmental compliance, aiming to save 1% on annual electricity usage as a short-term goal. In the future, the ISO 50001 energy management system will be introduced as a management tool to reduce energy consumption, identify energy and carbon hotspots for measures and equipment replacement, and set feasible electricity saving and emission reduction targets. Additionally, according to the transition process, the use of renewable energy will gradually increase, with related quantitative targets to be set and discussed after system implementation and review.
- 7. The Company has not yet introduced an internal carbon pricing system, which will be developed and implemented in accordance with company policy by the sustainability development committee in the future.
- 8. Except for the Dongguan and Vietnam factories, all other locations of the company, including the Taiwan headquarters (covering scopes 1 to 3, with others covering scopes 1 and 2), have completed carbon inventory. Due to future business adjustments and strategic consolidation, other factories and subsidiaries are expected to conduct carbon inventory by 2025; the company's carbon baseline year is 2021, with targets to reduce carbon emissions per unit

Certificates (RECs) are used to meet these goals, detail the sources and quantities of carbon reduction or the number of RECs.

9. Greenhouse gas inventory and assurance situations, reduction targets, strategies, and specific action plans (to be filled in 1-1 and 1-2).) •

revenue by 5% by 2023 and 10% by 2025 compared to the baseline year. Currently, the company has not utilized carbon offsets or renewable energy certificates.

9. See sections 1-1 and 1-2 for details.

1-1 Recent two fiscal years' greenhouse gas inventory and verification status

1-1-1 Greenhouse gas inventory information

Describe the greenhouse gas emissions for the past two years (tons of CO2e), intensity (tons of CO2e per million NTD), and the scope of the data covered.

The company's organizational boundary-setting method is the "Operational control approach". the data coverage includes no. 13, Dongyuan Road, Zhongli District, Taoyuan (headquarters and factory), and no. 530-6, section 2, Guoling Road, Zhongli District, Taoyuan (factory). all emission sources disclosed by the Company's internal floor use are fully owned by the Company, and this method is used to summarize the facility-level greenhouse gas emissions and removals, covering the annual greenhouse gas emissions.

In 2023, direct emissions were 238.4736 metric tons CO2e, energy indirect emissions were 4216.9170 metric tons CO2e, energy indirect emissions caused by transportation were 442.0590 metric tons CO2e, energy indirect greenhouse gas emissions generated by the organization's use of products were 839.1676 metric tons CO2e, energy indirect greenhouse gas emissions caused by the use of products from the organization were 248.7211 metric tons CO2e, totaling 5985.338 metric tons CO2e, the intensity was 1.44 metric tons CO2e.

In 2022, direct emissions were 218.8880 metric tons CO2e, energy indirect emissions were 3900.4136 metric tons CO2e, energy indirect emissions caused by transportation were 416.2466 metric tons CO2e, energy indirect greenhouse gas emissions generated by the organization's use of products were 685.6718 metric tons CO2e, energy indirect greenhouse gas emissions caused by the use of products from the organization were 160.4830 metric tons CO2e, totaling 5381.703 metric tons CO2e, the intensity was 1.20 metric tons of CO2e.

- Note 1: Direct emissions (Scope 1, directly from sources owned or controlled by the company), energy indirect emissions (Scope 2, from purchased electricity, heat, or steam resulting in indirect greenhouse gas emissions), and other indirect emissions (Scope 3, emissions generated by company activities that are not energy indirect emissions, but from sources owned or controlled by other companies).
- Note 2: Greenhouse gas inventory standard: Greenhouse Gas Protocol (GHG Protocol) or the International Organization for Standardization (ISO) issued ISO 14064-1.
- Note 3: The intensity calculation of greenhouse gas emissions is based on the sum of scope 1 and scope 2 emissions divided by the annual revenue of ACES Taiwan(in NT\$ millions).

1-1-2 Greenhouse gas assurance information

Describe the assurance situation for the two most recent years up to the date of the annual report publication, including the assurance scope, assurance institution, assurance standards, and assurance opinions.

The data verification institution for 2023 is DQS TAIWAN INC., based on the ISO 14064-1: 2018 standard. The verification scope covers No. 13, Dongyuan Road, Zhongli District, Taoyuan (headquarters and factory), and No. 530-6, Section 2, Guoling Road, Zhongli District, Taoyuan (factory). Under the condition of no reservations, the verification conclusion states that the assurance level of the audited data is reasonable for Category 1 and Category 2.

The data verification institution for 2022 is Alphano International Co., Ltd., based on the ISO 14064-1: 2018 standard. The verification scope covers No. 13, Dongyuan Road, Zhongli District, Taoyuan City (headquarters + factory), and No. 530-6, Section 2, Guoling Road, Zhongli District, Taoyuan City (factory). Under the condition of no reservations, the verification conclusion states that the assurance level of the audited data is reasonable for Category 1 and Category 2.

1-2 Greenhouse gas reduction targets, strategies, and specific action plans

Describe the baseline year and its data for greenhouse gas reduction, reduction targets, strategies, and specific action plans, as well as the achievement of the reduction targets.

The Company has set the year 2021 as the emission baseline year, aiming to reduce carbon emissions per unit of revenue by 5% by 2023 and 10% by 2025 compared to the baseline year. Taking the emission baseline year 2021 as an example: direct emissions were 129.7515 metric tons CO2e, energy indirect emissions were 4214.9518 metric tons CO2e, energy indirect emissions caused by transportation were 204.6149 metric tons CO2e, energy indirect greenhouse gas emissions generated by the organization's use of products were 784.4948 metric tons CO2e, and energy indirect greenhouse gas emissions caused by the use of products from the organization were 277.5466 metric tons CO2e, totaling 5611.360 metric tons CO2e.

To achieve these targets, specific energy-saving and carbon-reduction measures are implemented in the following areas:

- A. Air conditioning and lighting:
- a. Set the temperature of work and office spaces to 26-28°C, with a designated person responsible for managing the operation of air conditioning.
- b. Lighting switches are controlled by specific areas, with time-controlled switches for public areas, and all factory lighting has been replaced with LED lights to reduce electricity waste.
- B. Energy use in air compressors:
- a. Regularly check for and repair leaks in company air ducts to avoid increasing the load on air compressors, thereby saving energy used by air compressors.
- b. The Company has completely replaced all air compressors with variable frequency models.
- C. Optimize fuel usage in company vehicles by arranging carpool solutions in advance.
- D. Implement waste sorting within the factory, with all waste processed by qualified vendors and recorded flow.
- E. Energy management promote digital energy saving, waste reduction, resource recycling, and other environmental measures. Conduct training and promotions related to energy saving and emission reduction.

In 2023, direct emissions amounted to 238.4736 metric tons CO2e, energy indirect emissions were 4216.9170 metric tons CO2e, energy indirect emissions caused by transportation were 442.0590 metric tons CO2e, energy indirect greenhouse gas emissions generated by the organization's use of products were 839.1676 metric tons CO2e, and energy indirect greenhouse gas emissions caused by the use of products from the organization were 248.7211 metric tons CO2e, totaling 5985.338 metric tons CO2e.

The total greenhouse gas emissions in 2023 increased by 373.978 metric tons CO2e compared to 2021. The main reasons for the increase include a rise in production capacity and the inclusion of additional scope 3 upstream transportation emissions this year.

F. The state of the company's performance in the area of ethical corporate management, any deviation from the Ethical Corporate Management Best Practice Principles for TWSE/TPEx Listed Companies, and the reason for any such deviation

- (I) The following items should be disclosed regarding the implementation status of the internal control system:
 - a. Internal Control Statement: Please refer to page 63 of this year's annual report.
 - b. If the company has entrusted an accountant to conduct a special review of its internal control system, the accountant's review report should be disclosed: Not applicable.

ACES ELECTRONICS CO., LTD.

Internal Control System Statement

Date: March 12th, 2024

Based on our self-assessment, we hereby declare the following regarding the Internal Control System Statements of the Company for the fiscal year 2023:

- 1. The Company acknowledges that it is the responsibility of the Board of Directors and management to establish, implement, and maintain an internal control system. The Company has established such a system intending to achieve effective and efficient operations (including profitability, performance, and safeguarding of assets), reliable and timely reporting, transparency, and compliance with relevant regulations and laws. This is to provide reasonable assurance.
- 2. The internal control system has inherent limitations, and no matter how well designed, an effective internal control system can only provide reasonable assurance regarding the achievement of the three objectives mentioned above. Furthermore, due to changes in the environment or circumstances, the effectiveness of the internal control system may change. However, the Company's internal control system includes a mechanism for self-monitoring, and if any deficiencies are identified, corrective action will be taken.
- 3. The Company evaluates the effectiveness of the internal control system based on the "Regulations Governing the Establishment of Internal Control Systems by Public Companies" (hereinafter referred to as the "Regulations"). The internal control system evaluation criteria used in the "Regulations" are based on the process of management control, which divides the internal control system into five components: 1. Control Environment, 2. Risk Assessment, 3. Control Activities, 4. Information and Communication, and 5. Monitoring. Each component includes several items. Please refer to the "Regulations" for details on these items.
- 4. The Company has already adopted the aforementioned internal control system evaluation criteria to assess the effectiveness of the design and implementation of the internal control system.
- 5. Based on the evaluation results mentioned above, the Company believes that its internal control system (including the supervision and management of subsidiaries) as of December 31st, 2023, is effective in terms of understanding the achievement of operational objectives in terms of efficiency and effectiveness, reliable and timely reporting, transparency, and compliance with relevant regulations and laws. Therefore, it can provide reasonable assurance in achieving the above-mentioned objectives.
- 6. This statement will become a major part of the Company's annual report and public disclosure document and will be made available to the public. If any of the above publicly disclosed content is found to be false, concealed, or involve illegal activities, it may incur legal liabilities under Securities and Exchange Act Articles 20, 32, 171, and 174.
- 7. This statement was approved by the Board of Directors of the Company on March 12th, 2024. Among the seven attending directors, there were no dissenting opinions, and all agreed to the contents of this statement. This statement is hereby declared.

ACES ELECTRONICS CO., LTD.

Chairman: Yuan Wan-Ting

General Manager: Huang Tien-Fu

- (J) If there has been any legal penalty against the company or its internal personnel, or any disciplinary penalty by the company against its internal personnel for violation of the internal control system, during the most recent fiscal year or during the current fiscal year up to the publication date of the annual report, where the result of such penalty could have a material effect on shareholder equity or securities prices, the annual report shall disclose the penalty, the main shortcomings, and condition of improvement: Nil.
- (K) Material resolutions of a shareholders meeting or a board of directors meeting during the most recent fiscal year or the current fiscal year up to the date of publication of the annual report:

a. The important resolutions adopted by the shareholders' meeting and their implementation status should be disclosed.

Date	Important resolutions	Implementation status

- Note 1: List the highest and lowest market price of common shares in each fiscal year and calculate the average market price by weighing transacted prices against transacted volumes in each respective fiscal year.
- Note 2: Calculate the net worth per share based on the number of outstanding shares at year-end. Calculate the amount of distribution based on the amount resolved by the board of directors or resolved in the next year's shareholders' meeting.
- Note 3: If retrospective adjustments are required because of the issuance of stock dividends, the earnings per share should be disclosed in the amounts before and after the retrospective adjustments.
- Note 4: If equity securities are issued with terms that allow undistributed dividends to be accrued and accumulated until the year the Company makes a profit, the amount of cumulative undistributed dividends up until the current year should be disclosed separately.
- Note 5: Price/earnings ratio = average closing price per share for the year/earnings per share.
- Note 6: Price/dividend ratio = average closing price per share for the year/cash dividends per share.
- Note 7: Cash dividend yield = cash dividend per share / average closing price per share for the year.
- Note 8: Net worth per share and earnings per share are based on audited (auditor-reviewed) data as of the latest quarter before the publication date of the annual report. For all other fields, calculations are based on the data for the current year as of the date of publication of the annual report.

(6) Company's dividend policy and implementation thereof

A. Dividend policy as stipulated in the Company's articles of incorporation

If the Company has profits in the annual financial statements, it shall first pay the taxes and make up for previous losses. 10% of the profits shall be appropriated as a legal reserve, except when the legal reserve has reached the amount of the paid-in capital. In addition, the company may set up special reserves according to its operating needs and legal regulations. If there are still profits remaining after setting aside reserves, the board of directors shall propose a profit distribution plan to the shareholders' meeting for approval, together with any undistributed profits from the previous year.

The above profit distribution plan authorizes the board of directors, with the attendance of two-thirds or more of the directors and the resolution of a majority of the attending directors, to distribute all or part of the dividends, statutory reserves, and capital reserves in the form of cash payments, in accordance with Article 241 of the Company Act, and report to the shareholders' meeting.

The distribution of dividends by the company is based on the principle of stable dividends in accordance with the profit situation of the current year. Based on the company's future funding needs and long-term financial planning, the cash

dividends distributed from the above shareholder dividends shall not be less than 20% of the total dividends, but the shareholders' meeting may adjust it based on the actual profit situation and future financial planning of the current year.

B. Specific and clear dividend policy:

Based on the past dividend distribution and estimation for the next three years, the dividend policy is expected to be a total dividend amount not less than 30% of the after-tax net income of the current year, with cash dividends not less than 20% of the total dividend amount.

- C. Proposed dividend distribution for this shareholders' meeting For the fiscal year 2023, it is proposed not to distribute dividends, pending approval at the annual shareholders' meeting in 2024.
- D. Explanation of expected significant changes to the dividend policy: Not applicable.
- (7) The effect upon business performance and earnings per share of any stock dividend distribution proposed or adopted at the most recent shareholders' meeting:

 This shareholders' meeting did not distribute any stock dividends, therefore it does not apply.
- (8) Profit-sharing compensation of employees, directors
 - A. The percentages or ranges with respect to employee, director, and supervisor compensation, as set forth in the company's articles of incorporation:

If the Company generates profits in any fiscal year (meaning pre-tax profits before deducting employee compensation and director remuneration), it shall allocate no less than 1% for employee compensation and no more than 3% for director remuneration. However, if the Company has accumulated losses, it shall reserve the amount needed to make up for the losses in advance.

Employee compensation as mentioned above may be paid in stock or cash. If the Board of Directors decides to issue stock as employee compensation, it may also decide to issue new shares or repurchase shares at the same time. Director remuneration may only be paid in cash.

The above two items shall be decided by the Board of Directors and reported to the shareholders' meeting.

- B. The basis for estimating the amount of remuneration for employees and directors for calculating the number of shares to be distributed as stock bonuses, and the accounting treatment of the discrepancy, if any, between the actual distributed amount and the estimated figure, for the current period:
 - In the fiscal year 2023, the Company incurred a pre-tax loss. According to Article 24 of the Company's articles of association, no employee remuneration or director and supervisor remuneration will be distributed for the fiscal year 2023.
- C. Information on any approval by the board of directors of the distribution of compensation:
 - In the fiscal year 2023, the Company incurred a pre-tax loss. According to Article 24 of the Company's articles of association, no employee remuneration or director and supervisor remuneration will be distributed for the fiscal year 2023.
- D. The actual distribution of employee, director, and supervisor compensation for the previous fiscal year (with an indication of the number of shares, monetary amount, and stock price, of the shares distributed), and, if there is any discrepancy between

the actual distribution and the recognized employee, director, or supervisor compensation, additionally the discrepancy, cause, and how it is treated.

The company's board of directors resolved on March 24, 2023, approving the calculation of employee compensation for the 2022 fiscal year in the amount of NT\$10,776,341, and director and supervisor compensation for NT\$6,408,091. All compensation was paid in cash, and the estimated and actual amounts distributed were the same.

(9) Status of a company repurchasing its shares: Nil.

2. Issuance of corporate bonds:

Issuance of corporate bonds

Type of corporate bonds	Domestic unsecured convertible corporate bond, 2nd Issue (Bond code: 36052)

	The issuance and conversion,	Please refer to the details of the issuance and conversion method of the Company's second unsecured convertible corporate bonds.
share share issua or su	possible dilution of cholding and influence on cholder equity caused by the lince and conversion, exchange, obscription rules and the terms suance.	 Possible dilution of equity As of April 30, 2024, the outstanding balance of the Company's issued and outstanding convertible bonds, which are the domestic second unsecured convertible bonds, was NT\$598,900,000 at a conversion price of NT\$47.6. Assuming that all bondholders convert their bonds at the current conversion price, a total of 12,581,932 common shares of the Company (NTD 598,900,000/NTD 47.6) will be issued, resulting in a dilution of 8.56% based on the currently outstanding shares of 134,417,709. Impact on shareholder benefits. To understand the potential dilution effect on shareholders' equity, the company's basic earnings per share (EPS) and diluted EPS for 2023 were NT\$ (1.98) and NT\$ (1.98), respectively. After accounting for potential common shares with dilutive effects, both were anti-dilutive, hence diluted EPS was not calculated (profit or loss). Therefore, the unconverted portion of the issued unsecured convertible bonds has not yet had a significant impact on shareholders' equity.
	e of the custodian institution of xchangeable underlying	N/A

V. An Overview of Operations

(1) A description of the business

A. Business scope

(A) Principal activities of the company

The company is primarily engaged in the research, development, production, and sales of products such as connectors for laptops, computer peripherals, consumer electronics, automotive electronics, cloud servers, network communications, industrial equipment, medical devices, ultra-fine coaxial cable assemblies, high-speed transmission cable assemblies, wireless communication RF connector assemblies, metal stamping, and various components.

(B) Operating ratio

Unit: NT\$ Thousands; %

	20	22	2023		
Major products	Net revenue	Operating ratio	Net revenue	Operating ratio	
Connectors	4,998,562	48.10	4,634,491	54.61	
Cable assemblies	2,083,856	20.05	1,579,243	18.61	
Metal stamping parts	2,478,783	23.85	1,622,787	19.12	
Other operating revenue	831,303	8.00	649,707	7.66	
Total	10,392,504	100.00	8,486,228	100.00	

(C) Current product/service offerings of the company

The Company currently independently researches, manufactures, and sells main products including connectors, ultra-fine coaxial cable assemblies, high-speed transmission cable assemblies, wireless communication RF connector assemblies, metal stamping, and various components. Connectors and cable assemblies are used to connect independent subsystems or operational units at both ends, serving as devices for signal transmission to ensure the connected systems function properly. These are applied in various electronic products, with main applications including laptops and computer peripherals, consumer electronics, automotive electronics, cloud servers, network communications equipment, and industrial equipment.

(D) Planned development of new products (services)

The Company primarily engages in the research, development, manufacture, and sales of connectors and precision electronic components, which are used in various electronic products to connect electronic subsystems for power and signal transmission. In response to the demand for lighter, thinner, shorter, and smaller notebook computers and consumer electronic devices, the company is dedicated to developing products that withstand high temperatures, have fine pitches, and have low profiles. Additionally, it actively develops high-frequency, high-speed connectors and high-speed transmission cables required for cloud servers, power supplies, and connector cable assemblies needed for automotive electronics.

The company primarily engages in the research, development, manufacture, and sales of connectors and precision electronic components, which are used in various electronic products to connect electronic subsystems for power and signal transmission. In response to the demand for lighter, thinner, shorter, and smaller notebook computers and consumer electronic devices, the company is dedicated to developing products that withstand high temperatures, have fine pitches, and have low profiles. Additionally, it actively develops high-frequency, high-speed connectors and high-speed transmission

cables required for cloud servers, power supplies, and connector cable assemblies needed for automotive electronics.

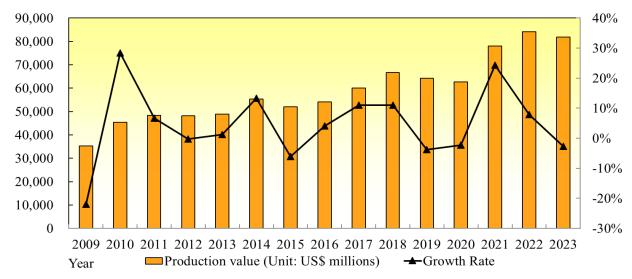

The Company continues to provide the most comprehensive solution services to more international clients, offering integrated product services ranging from connectors, cables, high-speed transmission cable assemblies, high-frequency microwave connector cable assemblies, and metal stamping components, to chassis assembly, all aimed at enhancing the company's development competitiveness.

B. An analysis of the market as well as the production and marketing situation

(A) The current situation and development of the industry

According to reports from Bishop & Associates (March 2024), the world connector market is mainly led by international giants who set the global trend for connector technology. By comparing and analyzing the application scope layout of connector manufacturers in the US, Taiwan, Japan, and China, it can be observed that the US giants still occupy a leading position in the high-end connector product market, with the top three US companies (Tyco, Amphenol, and Molex) accounting for more than 30% of the global market share. These companies have a wide distribution of applications in all areas, including consumer electronics, cloud communications, industrial control and medical equipment, automotive equipment, defense and aerospace, and communication networks. In recent years, the Taiwan connector industry has had a clear direction toward transformation and upgrading, accelerating demand for high-frequency, high-power, high-speed transmission, durable/miniaturized connector products. In addition, due to generational transitions, global fragmentation driving the effects of single sourcing, cost shifting, and mergers and acquisitions, connector industry leaders are more actively deploying in the fields of automobiles, green energy, medical care, national defense, and industrial control, with accelerated revenue and profit growth. In conjunction with product portfolio optimization, deep cultivation of these related applications will be the main growth momentum for the industry in the future. Given this situation, Taiwan connector manufacturers need to flexibly use business models and operating strategies, establish highly flexible supply chains (multi-chain, short-chain, external chain, and intelligent chain), strengthen their ability to resist risks, and enhance their intelligent manufacturing level to enhance their core competitiveness. Additionally, through domestic/foreign industry alliances or mergers, they can leverage complementary benefits, deeply penetrate potential application markets, conduct resource horizontal integration, and combine industry vertical connections to expand the market scale, enhance product market niches, and create the highest market efficiency alongside domestic industrial digital transformation.

[World Connector]

Data source: Bishop & Associates, Inc.(2024, March)& Compiled by ACES.

According to research data from Bishop & Associates in March 2024, due to repeated outbreaks of COVID-19 causing a growth bubble and weak demand, the global connector output value decreased by 2.7% from the previous year (2022) to \$81.9 billion. It is estimated that in 2024, due to easing inflation and stabilizing raw material costs for connectors, connector prices will remain stable, and the connector output value will increase by 4.2%, estimated to exceed \$85.3 billion. The data shows that the global connector industry continues to maintain stable growth momentum.

Furthermore, a report by Allied Market Research in September 2023 indicates that the electronic connector market is in a mature phase. The demand for high-performance electronic connectors from advanced electronic devices is continually increasing, driving the development of the electronic connector market. Additionally, the electronic connector market is also boosted by the manufacturing industry's implementation of Industry 4.0, with growing application demands in automotive, transportation, computer and peripheral equipment, and telecommunications. It is projected that by 2032, the global connector market will reach a scale of \$123.9 billion, with a compound annual growth rate (CAGR) of 4.7%.

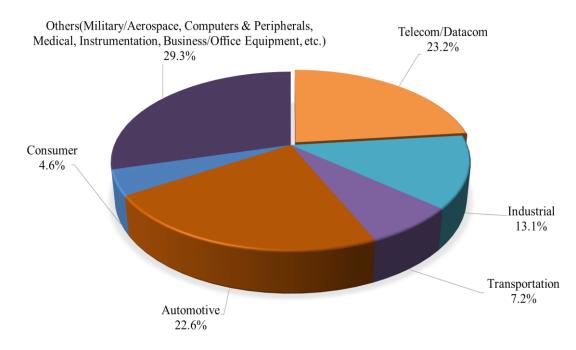

[Comparison of CAGR of World Connector Production Value]

Data source: Allied Market Research(2023, September)& Compiled by ACES.

With the advent of the 5G era, the Industrial Internet of Things (IIoT) is accelerating its deployment, and the wave of digital transformation is accelerating investments in infrastructure to support IoT technologies and Industry 4.0 automation transformations. A report by Bishop & Associates in March 2024 noted that in 2023, global connector applications in automotive equipment had the largest increase, valued at \$18.503 billion, representing a growth rate of 107.6%. Recent years have seen smart driving and smart mobility become mainstream in global market developments, with strong demand for connectors in the automotive sector. In 2023, the top five global connector applications were ranked as telecommunications/data communication equipment, automotive equipment, industrial equipment, transportation equipment, and consumer product equipment. The global connectors used in telecommunications/data communication equipment were valued at \$18.991 billion, accounting for 23.2% of the market and ranking first, although the value decreased by 33.6% from 2022, and the proportion decreased by 31.8%. Despite this, the connector market for telecommunications/data communication equipment is still in a growth phase. In 2023, automotive equipment ranked second in connector applications, valued at \$18.503 billion (22.6% of the market), with a significant increase of 107.6% from 2022, and a proportion increase of 113.2%, marking the highest increase among all equipment. Connectors used in industrial equipment (including industrial automation and processing equipment, industrial robotics technology, machine tools and machinery, energy production and distribution, and construction and civil engineering) ranked third, valued at \$10.742 billion (13.1% of the market), with a slight increase of 0.6% from 2022 and a proportion increase of 3.3%, highlighting the growing importance of automotive and industrial equipment applications. Transportation equipment was fourth, valued at approximately \$5.857 billion (7.2% of the market), with a decrease of 34.3% from 2022 and a proportion decrease of 32.5%. Consumer product equipment ranked fifth, valued at \$3.744 billion (4.6% of the market), with a significant decrease of 54.6% from 2022 and a proportion decrease of 53.3%, indicating a growth bubble in 2023 following high demand for telecommunications/data communication equipment and consumer products in 2021 and 2022. In February 2024, Bishop & Associates predicted that in response to future geopolitical situations and the era of 5G and AIoT (Artificial Intelligence of Things), the top three fastest-growing global connector applications in 2024 would be military/aerospace equipment (5.7% growth), telecommunications/data communication equipment (5.4% growth), and automotive equipment (4.6% growth).

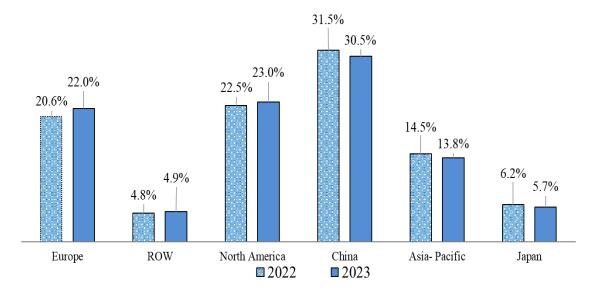

[2023 connector sales proportion (by application equipment)]

Data source: Bishop & Associates, Inc.(2024, March)& Compiled by ACES.

According to the research analysis by Bishop & Associates in March 2024, in the global connector market, the production value proportions in 2023 for Europe, ROW (Rest of the World), and North America were 22.0%, 4.9%, and 23.0%, respectively, all showing year-on-year growth. Europe, as the third-largest production region, accounted for about one-fifth of the connector market and exhibited an increasing trend annually, with the largest year-on-year growth in proportion at approximately 6.7%. ROW (including Central and South America, Brazil, and South Africa), although not a primary production region, also performed better than in previous years, with a year-on-year proportional growth of 3.7%. North America remained the second-largest global production region for connectors, but its production value slightly decreased. Although the proportional share of production value increased slightly, the year-on-year proportional growth was not as significant as in previous years (about 2.5% in 2023 compared to about 6.3% in 2022), and the gap between Europe and North America halved (i.e., the gap was \$1.56 billion in 2022 and reduced to \$848 million in 2023). In terms of other regions, the production value proportions of the Chinese region, Asia-Pacific region (including Taiwan, South Korea, India, and Singapore), and Japan in the global connector market were 30.5%, 13.8%, and 5.7% respectively, all of which decreased compared to 2022. Despite still being the largest production region for connectors, China saw a year-on-year decrease in its share by 3.2%. The Asia-Pacific region, the fourth largest, saw its share decrease by 4.7% year-on-year. Since 2019, Japan has shown a continuous decreasing trend in its annual proportional share, with the 2023 value dropping to 5.7%, marking a year-on-year decrease of 7.0%, the largest decline among all regions.

[Comparison of World Connector Production Value by Region (YOY)]

Data source: Bishop & Associates, Inc.(2024, March)& Compiled by ACES.

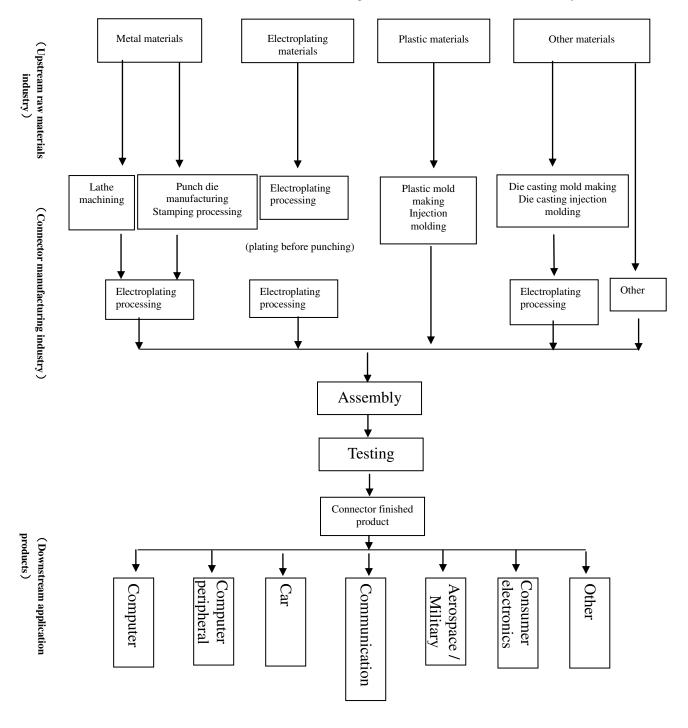

Allied Market Research in November 2023 analyzed that the future trends of the global connector market will be shaped by the surging demand for high-speed connectors, growth in the automotive industry, and increased investments in defense and undersea cables. These factors are expected to enhance the growth rate of the connector market and expand its market share. The emergence of electric vehicles, autonomous driving cars, 5G, the Internet of Things (IoT), and robotics technology is anticipated to drive key market development activities.

According to statistics from the Department of Economic Affairs in February 2024, Taiwan's manufacturing industry generated a total output value of NT\$17.61 trillion in 2023, with the electronic components industry accounting for NT\$5.35 trillion, a decrease of 12.85% compared to 2022. Considering the domestic and international political and economic situations, the Industrial Technology Research Institute in October 2023 predicted that Taiwan's manufacturing industry would reach a total output value of NT\$23.38 trillion in 2024, with a growth rate of 5.49%. Due to the restructuring of supply chains and the recovery of demand for end-user electronic products in 2024, along with the continuous expansion of emerging applications such as 5G, AIoT (Artificial Intelligence of Things), automotive sectors, and low-earth orbit satellites, there is a drive for high-specification, high-value electronic products. The new growth momentum brought by end-user applications also indicates that the future of the connector industry, part of the manufacturing sector, is showing similar robust growth momentum.

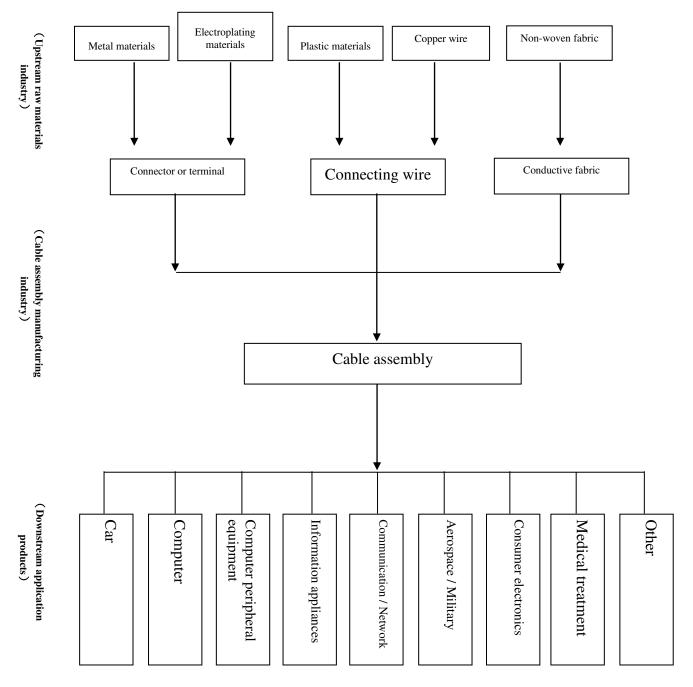

(B) The correlation between upstream, midstream, and downstream industries

The company is mainly engaged in the production of connectors and cable assemblies. The upstream, midstream, and downstream structure diagram of the industry is as follows:

a. Structure diagram of the electronic connector industry

Data source: ITIS Program of the Material and Chemical Research Laboratories, Industrial Technology Research Institute

Data source: Industrial Technology Research Institute (ITRI) Material Research Institute (MIRI) ITIS Project.

(C) Various development trends of the product

a. Product miniaturization

In recent years, with the trend of "lightweight, thin, short, and small" in application products, connectors generally require fine pitch and low profile. Therefore, both metal stamping and plastic injection molding technologies have precision requirements. Specifically, the specifications of connectors are reflected in finer pin pitch and lower connector height. To meet the requirements of product miniaturization, in addition to increasing the precision of the original molds and fixtures, connectors must also have outstanding product design, analysis, and functional simulation capabilities, such as stress analysis, mold flow analysis, and precision testing equipment, to achieve the quality required by customers. According to data from IEK, in the future, connectors for Consumer electronics products will move towards two major technological directions: small size and low height.

b. High-frequency high-speed connectors and cables

The latest version of the PCIe standard is PCIe Gen5.0, with a bandwidth and transfer rate of 128GB/s and 32GT/s per channel (lane), which can meet the needs of 400 GbE networks in new data centers, provide higher efficiency for data transmission applications of different peripheral devices, and achieve the best balance between cost and bandwidth. Therefore, achieving high-speed requirements can no longer be achieved by pursuing precision in molds and fixtures as in the past. High-speed and high-frequency signal analysis and simulation, as well as the number of actual testing items, will determine the key factors of signal quality. Therefore, high-frequency measuring equipment is necessary to perform precise high-frequency analysis.

The development of high-frequency connectors combines stamping, injection molding, assembly, mechanical structure design, mechanical analysis, high-frequency electrical characteristic analysis, and measurement as a comprehensive technology. According to the Industrial Technology Research Institute (ITRI), as the system moves towards high frequency, the impact of connectors on the electrical characteristics and functions of the system increases. The high-frequency design of connectors must consider the coordination between mechanical and electrical aspects, and the correct direction must also be grasped in the coordination. In testing methods, the effects generated by high frequency must also be considered. Therefore, the technology will cover structural electrical parameter analysis, component equivalent circuit design, component characteristic testing, and test board design. For the connector industry, these technologies not only have the significance of improvement but also indicate the vertical integration of technology.

The specifications of high-frequency connectors usually include impedance, crosstalk, or propagation delay, and their indicator sizes vary according to different specifications. Therefore, in the design consideration, it is necessary to consider the time-domain and frequency-domain conversion, the basic characteristics and high-frequency response of electronic components, the basic theory of transmission lines and impedance matching design, the generation and prevention of crosstalk and loss, and parameter and Smith chart analysis. Taking electromagnetic interference as an example, as the signal frequency carried by connectors becomes higher, the impact on signal integrity also becomes greater. Therefore, comprehensive improvement in electromagnetic interference prevention technology is required for the connector industry (such as cable ends). It is also important to understand the causes and solutions of common electromagnetic interference in system ends such as PCBs, such as the causes and prevention of electromagnetic interference between wires and grounding, shielding principles, shielding efficiency evaluation and shielding element design, causes and

prevention of ESD, causes and prevention of radiation in digital circuits, and common techniques used in electromagnetic interference measurement.

High-frequency connectors can be used for high-end products such as RAMBUS high-speed input/output (IEEE 1394/USB), high-speed network applications (CAT-8), and more. CAT-8 is the latest IEEE copper Ethernet cable standard that encloses each pair of twisted pairs in aluminum foil, almost eliminating crosstalk interference and achieving higher data transmission speeds. CAT-8 Ethernet cables are the ideal choice for inter-switch communication in data centers and server rooms, providing maximum transmission speed and stability.

In recent years, various peripheral devices have experienced rapid development, and many cloud services (SaaS, IaaS, PaaS) have also seen significant growth. This has led to an increase in demand for high-frequency, high-speed, high-power, and high-current connectors. In order to achieve high-frequency and high-speed transmission goals, there is a need for greater precision and accuracy in the requirements for the control chips, electrical connectors, cable wires, and circuit boards used in high-speed transmission paths. High-quality structures that can process signals will increase the product pricing advantage and promote the overall technological advancement of the electronics industry, becoming an inevitable trend.

c. 3C application products are still in the mainstream market

According to research data from Bishop & Associates in March 2024, 3C application products such as computers, consumer electronics, and telecommunications still maintain a certain market share in the world connector market, accounting for about 40% of the overall market value, which translates to a market size of approximately US\$ 32.7 billion. This indicates that this market is still the main market for development for various manufacturers.

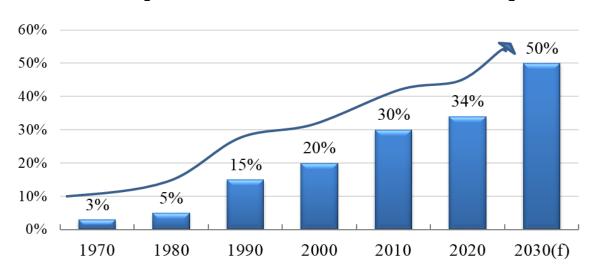

d. Business opportunities in automotive applications

In a March 2024 report by Bishop & Associates, the 2023 global connector market value for automotive equipment was approximately \$18.5 billion, accounting for 22.6% of the overall connector applications, making it the second-largest connector application sector. As the world has been working towards net-zero carbon emissions in recent years, the traditional fuel-powered automobile has become the main industry targeted by various countries to reduce carbon emissions. Some advanced countries have already proposed a ban on the sale of fuel-powered cars, such as the European Union's decision to ban the sale of all fuel-powered cars from 2035 onwards. Therefore, the energy transformation is driving the rise in demand for electric vehicles.

According to a January 2024 research analysis by Digitimes, global electric vehicle (EV) sales reached 14.22 million units in 2023, showing a growth rate of approximately 39% from 2022, with an overall EV market penetration rate of 16%. It is estimated that the global EV market will continue to grow in 2024, with sales projected to reach 18.42 million units, an increase of about 29.6%, and a market penetration rate of 20.6%. From 2020 to 2024, the EV market's average annual compound growth rate (CAGR) will reach 54.11%, significantly outperforming the overall automobile market's CAGR of 4.66%. The top three EV sales markets are China, Europe, and the United States, accounting for over 90% of the global share, with China holding approximately 60% market share, making it the largest EV production and sales country globally. It is estimated that the automotive electronics and related components for electric vehicles will show a simultaneous growth trend in the future.

According to a study by Future Intelligence in October 2021, the average value of connectors per vehicle worldwide has increased from US\$97 in 2000 to US\$181 in 2020. With the continuous rise of trends such as vehicle electrification, digital technology, and environmental sustainability, the level of vehicle electrification has continued to increase. This means that vehicles increasingly rely on electronic components, and many operations must go through an electronic component processing process before they can be transmitted. As a result, the proportion of electronic products in the production cost of a vehicle has increased from 3% in 1970 to 20% in 2000 and 34% in 2020. In a study by IEK in January 2023, it is estimated that the proportion of automotive electronics in the average vehicle cost will exceed 50% in 2030, indicating that the value of automotive electronic systems will continue to rise.

[Trend of the Global Automotive Electronics Cost Ratio]

Data source: Future Intelligence(2021, October)& IEK(2023, January)& Compiled by ACES.

According to Deloitte Insight's analysis in December 2022, the automotive industry supply chain will experience the highest growth in driveline systems, batteries, fuel cells, advanced driver assistance systems (ADAS) and sensors, and electronic products by 2025, with growth rates of 475%, 475%, 150%, and 22%, respectively.

	[Market Growth Rates]	Y2020 v.s. Y2025
1. Driveline Systems	<u>475%</u>	
2. Batteries& Fuel Cells	<u>475%</u>	
3. ADAS& Sensors	<u>150%</u>	
4. Electronic Products	<u>22%</u>	

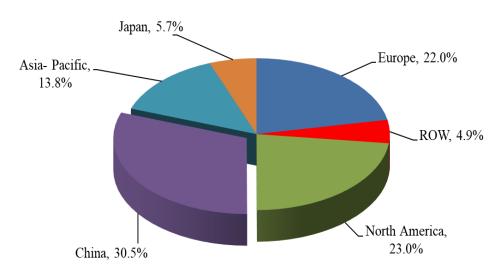

Data source: Deloitte Insight (2022, December)& Compiled by ACES.

e. China is the world's largest market in terms of connector

China has become the world's largest production base and consumer market for connectors. According to a March 2024 report by Bishop & Associates, the global connector market overall is showing a steady and level trend, with a high industry concentration. China, North America, and Europe are the top three global connector supply markets. Due to domestic manufacturers actively expanding their global

business in recent years, there has been rapid growth in international orders from Europe and America. The Asia-Pacific region ranks as the fourth largest in global connector output. However, the global supply chain continues to fragment, and international end-brand supply chains are shifting. Although the Chinese connector market still accounts for about 30.5% of the overall market value, far exceeding North America's 23%, its growth rate has noticeably slowed, and the output value is not showing the growth patterns of previous years. According to a January 2024 report by the International Wire and Cable Association, the global economy is slowing down, and the Chinese connector industry faces fiercer competition, including mergers and acquisitions, restructuring, optimization of production line capacities, capital expenditures, and development of horizontal applications. Additionally, the industrial chain's supportive response is gradually reconstructing the connector industry's landscape, which is also beneficial for enhancing the overall level of the connector industry and its international competitiveness. In the future, sectors like new energy, industry, medical, and telecommunications will drive the demand for high-end connectors and experience rapid growth. Currently, China has become the world's largest consumer market for connectors.

[World Connector Market by Region in 2023]

Data source: Bishop & Associates, Inc. (2024, March)& Compiled by ACES.

(D) Product competition

The Company mainly engages in the development, manufacture, and sales of connectors and assemblies related to laptops and computer peripherals, consumer electronics, automotive electronics, cloud servers, network communications, industrial equipment, medical devices, ultra-fine coaxial cable assemblies, high-speed transmission cable assemblies, wireless communication RF connector assemblies, metal stamping, and various components. It possesses a complete range of products and specifications. Due to the rapid changes in demand for applied products, in response to the rapid changes and increasing precision required by downstream customer products, the competitive situation of the Company's products is explained as follows::

a. To keep up with market trends in real-time and enhance production technology capabilities.

Due to the wide variety of application products for connectors and cables, as long as electronic products involve signal transmission, there will be a continuous need for connector cables. Therefore, the application market for connector cables spans various industries and products. How connector cable manufacturers can promptly grasp the

dynamics of downstream product application markets and quickly launch products that meet market demands becomes a key factor in whether connector cable manufacturers can earn profits. The Company has the capability for rapid development in product research and design, which shortens the product development time and allows for the customization of connector cable products according to individual customer needs.

b. Product quality and stability

As the quality of connectors can affect the reliability of signal transmission between electronic devices, they are a critical component in various electronic applications. Therefore, the company has had strict management processes for product quality since its establishment. This can be seen from the fact that the company obtained the UL ISO 9001 international quality system certification a few years after its establishment, which is highly regarded. In addition, the company has obtained the QC080000 quality certification and the IATF16949 automotive product certification. The company's efforts have been recognized by many well-known domestic and international customers, and the company has had long-term relationships with them, demonstrating the company's stability in terms of product quality.

c. Competitiveness of product prices

Due to the downward trend in the prices of connector cable application products and price competition among peers, the profit margins of various connector manufacturers have been compressed. In light of this, our company focuses on rapid product development and depth and strength of customer service (including production capacity and delivery times). Additionally, to increase profits and reduce production costs, our company not only strengthens control over raw material costs but also engages in product design and development domestically. We have established a production base for connector cables in mainland China to reduce production costs, giving the Company a cost advantage to face competition from peers and future price competition pressures.

C. Overview of technology and R&D

(A)The amount of R&D expenses invested in the latest fiscal year and up to the date of printing of the annual report

		PCIe6 connector.				
Up to May 10th of	3.	Development of OCP high-current POWER CARDEDGE connector.				
	4.	Mega Power 2 miniaturized high-current connector.				
2024	5.	MiniSAS-HD Gen4 Active cable.				
2024	6.	SFP112 and SFPDD112 connectors.				
	7.	J1772 Type 1, 15 32 50A charging gun.				
	8.	QSFPDD 112G PAM4 Active Copper Cable.				
	9.	SFPDD 56G Passive cable.				

D. Long and short-term business development plans

(A) Short-term plans

- a. To strengthen product breadth in existing sales channels of notebook computers and consumer electronics products market, in addition to the existing product series, we will utilize existing mold technology and advantages to shorten the sample development cycle, collaborate with customers' product development plans, and develop more types of connectors for notebook computers, increase the breadth of our product line, and further expand market share and increase revenue.
- b. Proactively developing the server and network markets: Recognizing the high potential for development in the communication and network markets in the future, our company will utilize our existing technology and develop human resources to actively engage in the research and manufacturing of related product connectors and cables in the mobile device and network industries to respond to future business development.
- c. Expanding international business: In order to effectively utilize production capacity and achieve optimal economic scale, we actively seek foreign business opportunities, which will help control costs and increase sales channels. On the one hand, this can strengthen the control of production systems, and on the other hand, it can allow us to access more advanced technology and market information from overseas, and collaborate with brand customers on product design to shorten development time and capture market trends.

- d. Establishing a comprehensive corporate image is crucial for enhancing brand awareness and gaining a competitive edge in the market. This can be achieved through various means such as maintaining a product catalog, optimizing the company website, and creating an effective company profile. By doing so, the company can improve its visibility and reputation, which can lead to better marketing opportunities and increased sales.
- e. Accelerating the development of production automation, modularizing production equipment to effectively improve production capacity and quality, reduce reliance on direct labor and increase the barrier to entry for production technology. This will improve production efficiency, shorten lead times, further reduce production costs, and maximize benefits.
- f. Accelerate the development of process vertical integration to reduce the outsourcing ratio of electroplating, to control product quality and production costs.
- g. Establishing an Automotive Electronics Engineering and Technology Research Center (Vehicle Electronics Zone) to expand the production capacity and research and development capabilities of automotive electronic connectors, in order to provide customers with more diversified product services.

(B) Long-term plans

- a. Double Eagle Project: Given that new technology products are often developed or regulated based on the U.S. market, it is important to obtain real-time information to provide product development directions and information needed for investment decisions. Our company has established a U.S. company to expand our U.S. business and gain access to market trends and new product information. Additionally, with the rise of China as a major manufacturing and consumer market, we have adjusted our business organization to establish stronger customer relationships to facilitate product sales. Our company spreads its wings across the U.S. and China markets with the Double Eagle Project, to respond to the rapid changes in market demand with timely and flexible services and to develop a forward-looking and comprehensive plan for future business development.
- b. Expanding international presence with a focus on research and development and leading products: We continue to invest in research and development and technology resources, and we are deepening our technical research and development in Taiwan Precision Center to expand our operations and focus on the design, development, and manufacturing of precision molds. We are continuously cultivating excellent product development, precision mold design, and manufacturing personnel, and building a complete technical team to meet the needs of domestic and international customers, with the long-term goal of becoming a leading brand in World Class Connectivity.

(2) Market and Sales Overview

A. Market analysis

(A) Main sales regions of products

Unit: NT\$ Thousands; %

Region		2023		
		Operating revenue amount	Percentage of total operating revenue	
	China	4,111,424	48.45	
Export	Other	3,036,076	35.77	
	Subtotal	7,147,500	84.22	
Domestic sales		1,338,728	15.78	
Total		8,486,228	100.00	

(B) Market share

According to data from ITIS in February 2022, Taiwan's connector industry (interconnect components) had a total annual production value of NT\$200.8 billion in 2021. With our company's consolidated revenue of NT\$8.486 billion for the year 2023, it is estimated that our company's market share is about 4% or more.

(C) Future supply and demand situation and growth potential of the market

a. Supply side

According to data from the American research institution Bishop & Associates in August 2023, the top 100 connector manufacturers worldwide had sales totaling \$70.049 billion in 2022, accounting for 83.3% of the global connector market. The top ten connector manufacturers shipped a total of \$45.142 billion worth of connectors in 2022, which represented 53.7% of the global market, an increase of 8.4% from \$41.654 billion in 2021. The manufacturers ranked from eleventh to twentieth shipped connectors valued at \$9.869 billion in 2022, making up 11.9% of the global market, up 11.9% from \$8.82 billion in 2021. The top ten manufacturers in order are TE Connectivity (Tyco) from the USA, Amphenol from the USA, Molex Incorporated from the USA, Aptiv (formerly Delphi Connection Systems) from the USA, Luxshare Precision from Mainland China, Foxconn (FIT) from Taiwan, Yazaki Corporation from Japan, Rosenberger from Germany, JAE (Japan Aviation Electronics Industry) from Japan, and Hirose Electric Co., Ltd. from Japan.

The table demonstrates that from 1980 to 2022, TE Connectivity has consistently been the largest connector company, while Molex and Amphenol have maintained positions in the top ten. Notably, no Asian companies appeared in the top ten before 1980, but by 2020, six Asian companies had entered the top ten, and five remained in 2022. This change correlates closely with the rise in electronic manufacturing capabilities in Asia and the expanding market demand for connectors in the region, particularly as many connector companies, especially in China and other developing nations, are broadening the scope of their current product applications and establishing more collaborations with non-connector firms. Over the past decade, the global connector industry has experienced a slowdown in market growth, with a market structure heavily influenced by large-scale mergers and acquisitions, which have driven increased market concentration. According to statistics, about 48% of the top 100 connector companies ranked in 2000 were acquired by other companies by 2021. For instance, in 2021, TE Connectivity acquired ERNI Electronics GmbH, ranked 46th, Amphenol acquired Positronic Industries, ranked 79th, and our company acquired Genesis Technology. The top ten global connector manufacturers have acquired over 80 companies in the past few years, increasing their market share from 38% in 1980 to 53.7% in 2022. As their market share has grown year by year, these major international players are rapidly scaling up their industrial economies to enhance entry barriers and competitiveness in the market.

[Top 10 connector manufacturers by global shipment volume from 1980 to 2022 (by region)]

Year Region	1980	1990	2000	2010	2020	2022
North America	10	6	6	4	4	4
Europe	0	1	1	1	0	1
Japan	0	3	3	4	4	3
China	0	0	0	0	1	1
Asia-Pacific	0	0	0	1	1	1

Data source: Bishop & Associates, Inc.(2023, August)& Compiled by ACES.

b. Demand Side

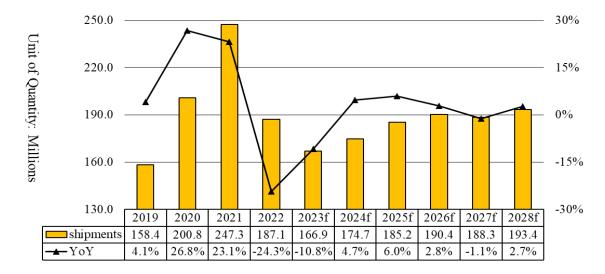

Demand for connectors and cables is mainly influenced by the product demand in downstream end-use applications. Our company produces connectors and cables mainly used in four major application areas: notebook computers/consumer electronics, network communications/servers, automotive electronics, and industrial industries. The development trends of individual application markets are explained as follows:

(a) The notebook computer (NB) market

According to an August 2023 report by TechSci Research, the global laptop market is expected to grow due to an increasing working population and rising demand for laptops. This growth is also driven by government policies aimed at promoting the digital economy and improving internet infrastructure (such as Make in India, Made in China 2025, and Digital India), a thriving gaming industry, and the widespread use of notebooks for entertainment purposes. These factors have led to the introduction of new product technologies and continuous innovation in notebook design, boosting market demand. A January 2024 study by 360i Research projected the global laptop market to be valued at \$201.12 billion in 2023, growing to \$214.83 billion in 2024, and reaching \$349.3 billion by 2030, with a Compound Annual Growth Rate (CAGR) of 8.2%.

A report from Digitimes in October 2023 indicated that the global notebook shipment CAGR from 2023 to 2028 is expected to be 3%. Global notebook shipments in 2023 decreased by 10.8% from 2022, marking the lowest in nearly four years but still higher than the pre-pandemic average of 150 to 160 million units. This decline was tempered by a rebound in educational procurement in the second quarter and strong clearance of budget consumer models, followed by a sprint to the annual peak in the third quarter and a recovery in the commercial market in the fourth quarter. With global inflation expected to ease in 2024, the laptop market is forecasted to recover, driven by AI productivity applications that favor corporate hardware upgrades, as well as demand attracted by high-end models and new specifications. This is expected to result in a market growth of 4.7%, reversing the declines of the previous two years. In 2025, as the economy enters a new expansion phase, major processor manufacturers (Intel, MediaTek, AMD, and Qualcomm) are expected to undergo significant technology transitions. Additionally, Microsoft's discontinuation of Windows 10 updates in October 2025 is anticipated to spur a new wave of mainstream consumer device upgrades. Global notebook shipments are expected to show significant growth, increasing by 6% and surpassing 180 million units. Growth in 2026 is expected to slow to 2.8%, concentrated on high-end models, and the global notebook market is expected to contract slightly in 2027. By 2028, global notebook shipments are projected to experience modest growth, returning to over 190 million units. With the active operation of the management team, our company is estimated to continue to grow in the consumer electronics market, due to the addition of new products. In the future, we will adopt a diversified product sales combination strategy to improve our company's sales performance.

[Global notebook (NB) shipment volume]

Data Source: Digitimes (2023, October & 2024, January) & Compiled by ACES.

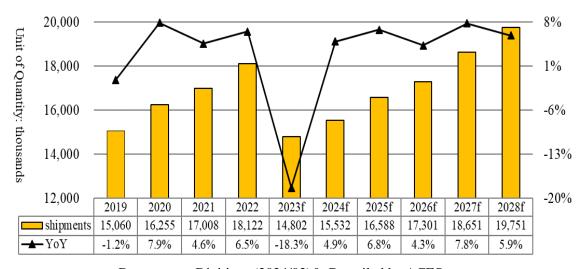

(b) Network communication market/servers

The communications industry is primarily divided into three major categories: network communications equipment, personal mobile devices, and communication services. Network communications equipment primarily involves hardware and components related to connecting network signals, including various broadband technologies such as Wireless Local Area Networks (WLAN), Ethernet Switches, Digital Subscriber Line Customer Premises Equipment (DSL CPE), Cable Modem Equipment (Cable CPE), Internet Protocol Set-Top Boxes (IP STB), Bluetooth technology, and mobile broadband access products. The network communications industry has rapidly developed and holds a significant position in the global economy. According to research by IEK in October and December 2023, the momentum for digital transformation in enterprises is strong in 2023. The adoption of generative AI applications and related infrastructure has driven upgrades in network bandwidth and growth in cloud and data centers, which has become a long-term trend. This has sustained the demand for network communication equipment. In 2023, the value of Taiwan's communications industry was approximately NT\$1.31 trillion, showing a growth of about 3.0% from 2022, with an estimated value of NT\$1.34 trillion in 2024, growing at a rate of 1.9%. In December 2023, IEK's research indicated that the global communications industry's output value in 2023 is estimated to reach \$2.32 trillion, with a growth rate of 5.08%, and under the development vision for 6G by various countries, the global growth rate in 2024 is estimated at 7.2%, amounting to about \$2.49 trillion.

The core mission of the network communications industry is to achieve global connectivity, rapidly transmitting data, information, and communications, necessitating advancements in wireless communication, the Internet of Things (IoT), cloud computing, and cybersecurity technologies and equipment. Research by ITIS in February 2024 indicated that Taiwan's communication equipment output value in 2023 was NT\$543.7 billion, growing 2.6% from 2022. IEK's research in February 2024 highlighted that in network communications equipment, Wi-Fi penetration continues to increase with the adoption of Wi-Fi 6E in the new iPhone 15, while the demand for GPS navigation products and automotive products also grew.

According to a February 2024 research analysis by Digitimes, the global server market shipped approximately 14.8 million units in 2023, which represented an 18.3% decline from 2022. The primary reason for this downturn was a contraction in demand for traditional cloud applications, as budgets for general-purpose servers were squeezed by more expensive AI servers. However, the continued development of generative AI applications is expected to drive not only the need for AI servers but also increase the demand for traditional computing and storage resources, which is beneficial for the overall growth of the server market in the long term. Looking ahead over the next five years, it is estimated that in 2024, major North American cloud providers such as Amazon, Microsoft, Google, and Meta will ramp up their procurement of general-purpose servers. The global server market shipment is projected to exceed 15.53 million units, leading to an overall shipment increase of 4.9%. With the economic recovery and the wave of enterprise equipment upgrades, the growth rates in 2025 and 2027 are expected to reach 6.8% and 7.8%, respectively. From 2023 to 2028, the global server shipment Compound Annual Growth Rate (CAGR) is projected to be 6%.

[Global Server Shipments]

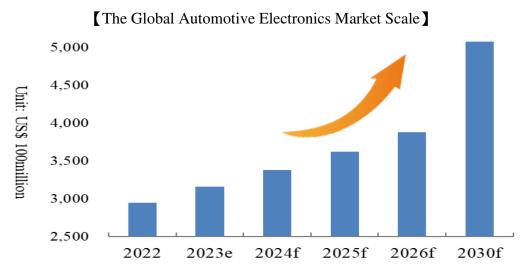

Data source: Digitimes(2024/02)& Compiled by ACES.

With the development and proliferation of artificial intelligence (AI) technology, the server market has undergone significant changes, especially with the introduction of generative AI services like ChatGPT (Chat Generative Pre-trained Transformer) developed by OpenAI, which relies on powerful AI servers for computation. Unlike general servers primarily used for data storage with slower computing speeds, AI servers boast much greater computational power and faster data processing capabilities to meet the demands of emerging technologies such as VR/AR, ultra-high definition, and autonomous driving technologies. According to a January 2024 report by MIC, the surge in generative AI continues to drive global AI server shipments. In 2023, AI servers accounted for over 50% of the global server market value. Furthermore, Taiwan's server industry accounted for more than 80% of global server shipments, with the production and assembly of AI servers comprising more than 90% of the global total. A March 2023 analysis by Digitimes reported that major Taiwanese server-related businesses saw revenues of approximately NT\$2.18 trillion in 2023, marking a 7% decline from 2022. However, it is estimated that in 2024, with continued significant growth in AI server setups by large North American cloud clients, global server demand will rebound, driving-related revenues of Taiwanese server businesses to NT\$2.5 trillion, a growth rate of 15%.

Looking ahead, the development of the 5G and cloud communication industries remains very promising. Our company is optimistic about the future growth potential in the development of high-speed connectors, high-speed transmission cables, server racks, and supports.

(c) Automotive electronics market

In recent years, major global automobile manufacturers have been committed to improving the environmental and power performance of automobiles. With the changes in technology and the environment, the global automotive industry is continuing to develop toward new energy vehicles, and this trend has also increased investment in the automotive electronic components industry. Safety, comfort, energy saving, convenience, and environmental protection have become the main driving forces behind the development of automotive electronics. In the future, automotive electronic products will be more focused on electrification, intelligence, and electrification. As vehicle electronics and safety features increasingly penetrate the market, the value of electronic systems installed in vehicles continues to rise, surpassing the growth in automobile production and driving overall market development. IEEE research estimates that by 2030, the cost of vehicle electronics will account for 50% of the total vehicle cost. According to a December 2023 analysis by IEK, the industry is gradually transitioning from electrification and connectivity to automation, leading to an increase in automotive electronic products. In 2023, the global automotive electronics market is estimated to be \$315.9 billion, up from \$294.9 billion in 2022, representing a growth of 8.3%. It is expected to exceed \$500 billion by 2030, with a Compound Annual Growth Rate (CAGR) of 7.0%.

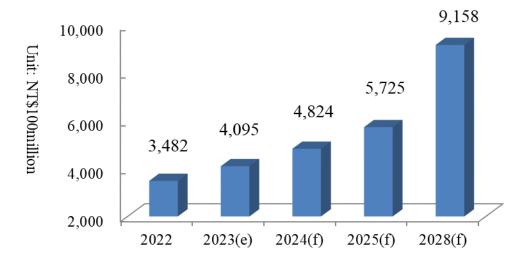

Data source: IEK (2023, December)& Compiled by ACES.

According to a December 2023 analysis by IEK, the output value of Taiwan's automotive electronics industry exceeded NT\$348.2 billion in 2022 and is estimated to surpass NT\$409.5 billion in 2023, reaching an all-time high. By 2028, the output value of Taiwan's automotive electronics is projected to break through NT\$915.8 billion, indicating that the electric vehicle market is growing rapidly under the trend of self-driving and networking, driving the proportion of automotive electronic systems. We in Taiwan can integrate our industrial

capabilities and vertically integrated power electronic components, advanced driving safety assistance systems, in-vehicle infotainment systems (IVI systems), smart cabins, and other fields to accelerate the trend of vehicle electrification. The automotive electronics market has great potential, and with the promotion of the specification and technological requirements for smart vehicle products, it will continue to drive opportunities in the automotive electronics market.

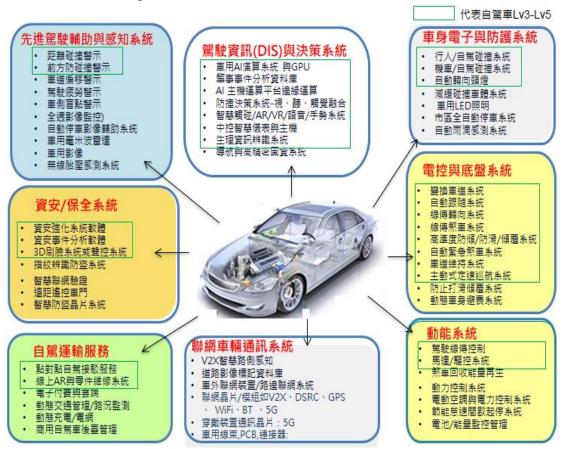

[The Annual Output Value of the Automotive Electronics Industry in Taiwan]

Data source: IEK(2023, December)& Compiled by ACES.

There are five main systems for the automotive electronics industry in Taiwan, including driver information system, engine transmission system, auto-body system, safety system, security system, and others. They are mostly concentrated on advanced driver assistance systems (ADAS), in-vehicle electronics technology, in-vehicle infotainment systems, and services. According to data from IEK in October 2020, the advantage of manufacturers in Taiwan lies in its integrated sensing system and a complete cluster of driver information systems. In addition, various countries' regulations that mandate the installation of ADAS-related systems bring strong demand for automotive electronic safety systems, which have the greatest potential for development.

[Relationship Between Automotive Electronics And Autonomous Vehicles]

Data source: Industrial Technology Research Institute's IEK IT IS Plan (October 2020)

According to the research analysis by the Market Intelligence & Consulting Institute (MIC) in September 2022, the main drivers of global growth in the automotive electronics market are autonomous driving, high-power electric vehicles, and upgrades to in-vehicle infotainment systems. The potential of this market has surpassed that of the information and communication technology industry. In 2022, traditional fuel vehicles still dominate the market, with a contribution ratio of 7:3 for the automotive electronics market size in comparison to electric vehicles. As the penetration rate of xEV (electric vehicles) increases, the application scope of automotive electronics becomes broader and more diverse. By 2030, the contribution ratio of the automotive electronics market size is expected to reverse to 3:7 in favor of electric vehicles over traditional fuel vehicles.

The Company is focusing on the automotive sector, targeting areas such as intelligent driver-assistance systems, vehicle electronic control panels, and new energy vehicles (EVs), and collaborating with partners in China and the USA to develop new energy vehicles. Our product range includes parking sensors, cameras, and electric switches. We have entered the automotive market, providing solutions for in-vehicle monitoring, wireless transmission, and collision avoidance radar systems to a U.S. smart transportation technology company's supply chain, moving from supplying individual parts to offering complete automotive solutions. We currently supply Europe, mainland China, and the USA with products like parking radar connectors, collision radars, automotive RF, and car entertainment systems. Having received orders from Tier1 European automakers, our company

is focusing on the automotive connector and cable market, with a medium to long-term goal to accelerate the deployment of automotive products.

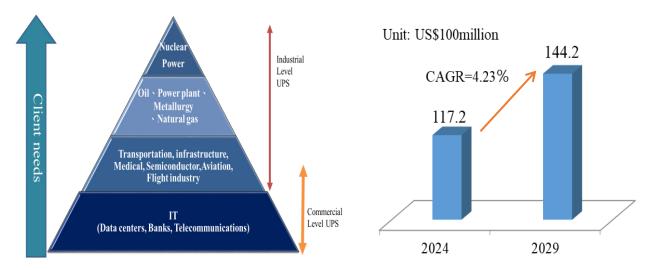

(d) Industrial market (represented by Uninterruptible Power Supply (UPS) systems)

The Company provides industrial power cords mainly for the uninterruptible power system (UPS) market. An Uninterruptible Power Supply (UPS) is an electrical device that automatically switches to its built-in battery to provide emergency power to load devices when the main power supply experiences abnormalities (such as faults, power outages, or voltage instability). This ensures a short-term continuation of safe, clean, stable, and uninterrupted electricity to the equipment. Thus, a UPS serves as a reliable buffer, continuously supplying power to automation controllers, sensors, and actuators, maintaining normal device operation. In the event of power issues, a UPS provides a stable backup power source to prevent equipment failure, data loss, or system malfunction. According to a market research report by GII in January 2024, UPS systems have become essential across various industries including telecommunications, engineering, manufacturing. research and development, education, pharmaceuticals. information technology, aviation, and banking. The UPS market is segmented into residential, commercial, and industrial areas, with the commercial sector (including data centers, telecommunications, medical, and defense) holding the largest market share and is expected to show significant growth.

UPS (Uninterruptible Power Supply) systems are vital support mechanisms to maintain the continuous operation of industrial infrastructure, typically used to support critical infrastructure during major failures. In the era of Industry 4.0, integrating new technologies such as the Internet of Things (IoT), cloud computing, cloud analytics, AI, and machine learning into production equipment is crucial. UPS systems are relied upon to stabilize power during outages and simplify production and manufacturing processes to protect data and reduce production line downtime. The growth drivers for the global UPS market include the rapid expansion of global data centers and the increasing power demands of end-users in the manufacturing and commercial sectors. According to a February 2024 report by the Forward-Looking Industry Research Institute, the applications of UPS are divided into uninterrupted power supplies for information equipment and industrial power equipment. UPS for information equipment is primarily used for communication systems and data centers in telecommunications, information technology, transportation, finance, aviation, etc., focusing on security protection. UPS for industrial power equipment is mainly used in automated industrial systems, remote systems, power continuity protection, and automated transmission systems, also focusing on safety issues.

According to GII's market research reports from January and March 2024, the global UPS market was valued at approximately \$8.1 billion in 2023. Mordor Intelligence estimates that the UPS market will reach about \$11.72 billion in 2024, and from 2024 to 2029, it is expected to expand at a Compound Annual Growth Rate (CAGR) of 4.23%, with projections suggesting the market will grow to \$14.42 billion by 2029. The Asia-Pacific region, including China and India, is expected to lead the UPS market due to increasing power demands and the gradual phasing out of coal-fired power plants, making it the fastest-growing market for UPS. According to GII's September 2023 market research, China is expected to reach a market size of \$2.2 billion by 2030, with an estimated CAGR of 6.7% from 2022 to 2030. Japan and Canada are projected to have CAGRs of approximately 3.4% and 4.9%, respectively, while Germany's CAGR is expected to be about 4.7%.

[Industrial and Commercial Level UPS Applications] [Global UPS market size forecast]

Data source: Uninterruptible Power Supply (UPS) Industry Blue Ocean Market Strategy Formulation and Implementation Research Report in China, from 2020 to 2025(2020, December), GII(2024, January)& Compiled by ACES.

In the future, UPS (Uninterruptible Power Supply) systems are expected to evolve towards higher frequency, intelligence, and networking. The increasing demand for energy storage systems, growth trends in new technologies such as IoT (Internet of Things), virtual and cloud computing, AI (Artificial Intelligence), and machine learning, as well as the rising number of global data centers, all indicate a growing need for reliable power solutions. This is anticipated to drive the growth of the global UPS market. In developed countries, the UPS market is mature, while in developing countries like India and China, maintaining quality power remains a significant challenge and is expected to be a major driving force for the market. Looking at the global trends in the Information and Communication Technology (ICT) industry, as the world enters the information age, the application of UPS is becoming more widespread, and the demand for a full range of UPS products is robust. The future of UPS is expected to show strong growth momentum.

(D) Competitive niche

a. Product development speed and customization capability

The company has dual technology development capabilities in electronic and mechanical component development and verification to meet market and customer needs and respond quickly to changing market demands. The company also has the ability to self-produce molds and mechanical parts and can provide customers with customized Total Solutions services, providing customers with samples and solutions in a short period. To meet the diverse specifications and development needs of customers, the company has a strong R&D team dedicated to product development, mold design and development, and process technology research and development. With a continuous focus on strengthening R&D capabilities, the company has obtained approximately 590 product patents both domestically and internationally.

b. Mastering the independent capability of mold and equipment development

Terminal crimping and plastic injection molding are the key technologies for connector manufacturers. The company has independent capabilities in the design, development, and manufacturing of plastic injection molds and terminal crimping molds. By mastering these key capabilities in mold development and manufacturing, we do not rely on external suppliers, allowing us to effectively shorten mold development time and cost, and enhance product competitiveness. In terms of automatic assembly machines, we also can develop them in-house. Therefore, for product lines with large sales volumes, we can develop production equipment that is optimized for the manufacturing process, effectively increasing production capacity and reducing manufacturing costs.

c. Complete product line and good customer relationship

The Company has a comprehensive product line, including connectors, ultra-fine coaxial cable assemblies, high-speed transmission cable assemblies, wireless communication RF connector assemblies, metal stamping, and various components. This diversity and completeness of specifications enable us to meet customers' needs in one go, allowing them to design and choose the most suitable and cost-effective connectors to solve their design challenges. Through close supply chain relationships, we will continue to strengthen our business cooperation through joint research and development efforts. This collaboration will be beneficial for the development of our new products and the expansion of our performance, allowing us to jointly explore new markets or industries.

(E) Beneficial and adverse factors of development prospects and corresponding strategies

a. Beneficial factors

- (a) As we expand our application scope towards diversification, our company's business scope encompasses laptops and computer peripherals, consumer electronics, automotive electronics, cloud servers, network communications, industrial equipment, and medical industries. With such a diversified range of application industries, the seasonal patterns vary among these sectors, which in the long term will effectively reduce the revenue fluctuations during peak and off-peak seasons for the group.
- (b)The R&D strength is strong, with advanced product development and mass production capabilities.
- (c) The customer base is solid, and the cooperative relationships are good.
- (d)The global logistics management capability covers production locations in Taiwan, mainland China, the Philippines, and Vietnam.
- (e)Continuously extending the industry development, committed to industry vertical integration or horizontal market expansion.

b. Adverse factors

(a) Intense competition within the industry affecting profits: Facing the aggressive price-cutting and snatching of orders by competitors from mainland China, profits have been decreasing. Moreover, the large-scale of information and communication system manufacturers has indirectly reduced the number of customers, making it increasingly difficult to negotiate with them.

Corresponding strategies: the company is committed to reducing production costs while actively improving R&D design, continuously expanding niche and high-end product markets, seizing high-margin products of foreign manufacturers, and avoiding price-cutting competition from domestic competitors.

(b) The labor costs in mainland China continue to rise.

Corresponding strategies: the company will respond to this by actively developing automated assembly processes and expanding towards regions with lower labor costs, such as the Philippines, Vietnam, and other countries.

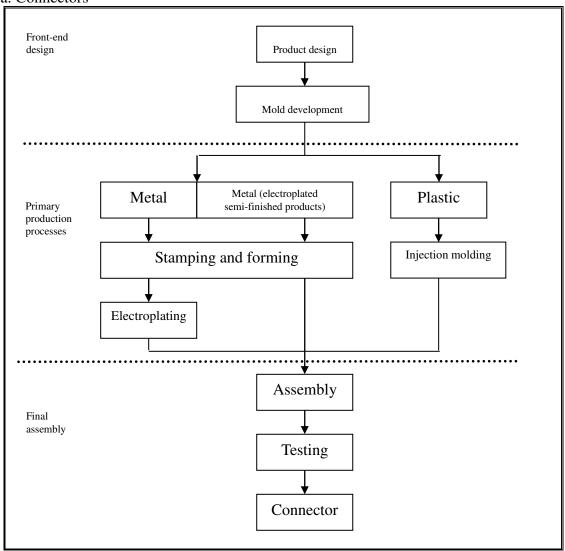

B. The important uses and production processes of the main products

(A) The important uses of the main products

The company's main products include connectors, ultra-fine coaxial cable assemblies, high-speed transmission cable assemblies, wireless communication RF connector assemblies, metal stamping, and various components. These products are used in applications such as laptops and computer peripherals, consumer electronics, automotive electronics, cloud servers, network communications, industrial equipment, and medical devices.

(B) The production processes of the main products

a. Connectors

b. Cable assembly

The production processes of cable assembly								
Stage 1 Stage 2 Stage 3 Stage 4								
1. Cutting	1. Plastic body assembly	1. Electrical testing	1. Inspection					
2. Wire stripping	2. Iron core insertion	2. Continuity testing	2. Packaging					
3. Terminal crimping	3. Tinning, soldering	3. Visual inspection	3. Shipping					
	4. Gluing 4. Other inspection							

C. The supply status of the main raw materials

Product	Name of main	Supply sources	Supply status
Flouuci	raw materials		
Connector	Plastic resin	P-BB、P-AY、P-T、P-I	Stable
Connector	Copper material	P-V \ P-BC \ P-AV \ P-AZ	Stable
	Terminal,	P-AC、P-AD、P-BD	Stable
Cable	Connector		
	Wire material	P-AT、P-AO、P-AI	Stable

Note: The Company is contractually obligated to not disclose customer names and they are not related parties. Therefore, customer names will be disclosed using code names.

- D. In either of the past two fiscal years, provide the names of customers who accounted for more than 10% of the total sales (or purchases), along with the amount and proportion of their sales (or purchases). Please also explain the reasons for any changes in these figures.
 - (A) The names of suppliers who accounted for more than 10% of the total purchases in either of the past two fiscal years, along with the proportion and amount of their purchases, and the reasons for any changes in these figures, are as follows:

Unit: NT\$ thousands: %

Year	2022				2023			Q1, 2024				
Item	Name	Amount	Percentage of net purchases for the entire fiscal year			Amount	Percentage of net purchases for the entire fiscal year	Relation ship with the issuer	Name	Amount	Percentage of	Relation ship with the issuer
1	-	Note 3	Note 3	-	-	Note 3	Note 3	-	-	Note 3	Note 3	-
2	Other	4,694,360	100%	-	Other	3,501,357	100%	-	Other	895,256	100%	-
Total	Net purchases	4,694,360	100%	-	Net purchases	3,501,357	100%	-	Net purchases	895,256	100%	-

Note 1: The names of the above suppliers are disclosed using code names as the Company is contractually obligated to not disclose their actual names and they are not related parties.

Note 2: The information is sourced from audited or reviewed consolidated financial statements.

Note 3: This supplier is not separately disclosed as their purchase amount did not exceed 10% of net purchases.

Suppliers whose purchases did not exceed 10% of net purchases for the past two fiscal years and the first quarter of 2024 are not separately disclosed by the Company.

(B) The names of customers who accounted for more than 10% of total sales in either of the past two fiscal years, along with the proportion and amount of their sales, and the reasons for any changes in these figures, are as follows:

Unit: NT\$ thousands: %

Year		2022			2023			Q1, 2024

(4) Environmental expenditure information

For the recent fiscal year and up to the date of printing the annual report, any losses incurred due to environmental pollution (including compensation and penalties resulting from violations of environmental protection regulations) shall be disclosed. The date of the penalty, the penalty reference number, the violated regulations and content, and the details of the penalty should be listed. The estimated amount of such losses that may occur in the future should also be disclosed, along with the corresponding measures. If it is impossible to make a reasonable estimate, the reasons for the inability to do so should be explained:

- A. During the construction of our factory in 2022, the entrance and exit of the construction site did not have pressurized water sprinkling equipment. The Taoyuan City Environmental Protection Bureau, according to Article 23, Paragraph 2 of the Air Pollution Control Act and Article 10 of the Construction Project Air Pollution Control Facilities Management Measures, imposed a fine totaling NT\$100,000 and required a one-hour environmental lecture. The Company has paid the fine, participated in the lecture, and made improvements as required by the official letter.
 - In 2023, there was a discrepancy between our business waste disposal plan and the data reported online. The Environmental Protection Administration, according to Article 31, Paragraph 1, Subparagraph 2 of the Waste Disposal Act, imposed a fine totaling NT\$6,000 and required a one-hour environmental lecture. Our company has paid the fine and participated in the lecture.
- B. Estimated amounts and response measures that may occur currently and in the future:
 - (A) The Company's main factory and production equipment are located in Zhongli District, Taoyuan City. Environmental protection is a top priority for the Company, which provides employees and nearby residents with a good working and living environment. The Company strictly requires compliance with emission standards and adopts the following environmental measures for pollution and waste generated during the production process:

a. The Company has a dedicated environmental protection unit and personnel.

Item	Name	License types	License No.
Environmental	Chen Mei-Chen	Class B Labor Safety and	103-030844
Specialist	Chen Mei-Chen	Health Manager	103-030644

b. There is no risk of pollution during the Company's production process. There have been no instances of air pollutant test values exceeding regulatory emission standards. Regarding noise pollution generated by machinery, the Company has strengthened appropriate soundproof measures and conducts environmental inspections every six months. The degree of noise pollution complies with the noise control standards for industrial areas set by the Environmental Protection Agency. General business waste is entrusted to legal environmental companies for disposal and reported online for waste flow according to the law, to legally clean up waste

and recycle resource waste. Therefore, as of the date of the annual report, there have been no instances of environmental pollution.

- (B) The Company has always adhered to environmental protection policies, strictly abiding by environmental protection laws and regulations, as well as customer requirements. The Company effectively controls the flow of raw materials, production, and shipping processes, and continuously improves product quality through ongoing improvement activities. The Company ensures that the products provided do not contain restricted substances and encourages upstream suppliers to move towards a green supply chain to comply with RoHS regulations.
- (C) The current pollution status and improvement status, their impact on the Company's earnings, competitive position, and capital expenditures, as well as significant environmental capital expenditures expected in the next two years, are as follows:

a. Significant environmental capital expenditures are expected in the next two years

	2024	2025
Planned pollution prevention and	None	None
control equipment to be purchased		
Expected improvement	None	None
Amount of expenditure	None	None

b. The impact after improvement: There will be no impact on the Company's earnings and competitive position in the past two years.

(5) Labor relations

A. The following is a list of employee welfare measures, continuing education and training, retirement systems, and their implementation, as well as agreements between labor and management and the implementation of measures to protect employee rights.

The Company is committed to establishing a harmonious atmosphere of trust between labor and management in its business management. The Company adopts an actively open management model to create a challenging and comfortable working environment. Through the convening of labor-management coordination meetings, the Company values employee rights and expresses concern for its employees. The Company has set up an employee complaint mailbox, which is handled by dedicated personnel to handle employee feedback. The Company regularly holds employee meetings to allow employees to express their opinions, and the Company responds and communicates with employees. In addition, the Company holds health lectures, employee purchase activities, and monthly birthday celebrations to help employees relax and increase their sense of belonging. The Employee Welfare Committee organizes various beneficial physical and mental activities for employees and participates in donations to vulnerable groups. The Company places great importance on employee workplace safety and health issues and regularly holds social responsibility meetings and environmental safety review meetings, with continuous improvement as the goal. Outstanding employees are recognized and rewarded annually through the selection process. The Company also promotes various forms of public welfare activities under the name of outstanding employees. This motivational approach to employees enables them to have a sense of satisfaction and happiness, making them work smarter and live healthier lives.

(A) Employee welfare measures

In addition to complying with the Labor Standards Act and related laws, the Company provides group insurance, employee health checks, and other measures. The Company also established an Employee Welfare Committee to coordinate employee welfare. In addition to subsidies for marriage, funerals, hospitalization, and childbirth, the Company also provides employees with subsidies for further education and club activities. The Company also regularly organizes employee travel, birthday parties, family day activities, and other welfare activities.

(B) Employee continuing education and training situation

The Company provides an open and diverse learning environment for employees.

Colleagues can continue to learn and grow through departmental in-house training, external training, internal open courses, or mentorship programs. Employees can also use the "Hongzhi Academy" digital platform for self-learning, breaking through previous time and space limitations and continuously improving their knowledge and skills.

Through the new employee and professional job function training system, the Company helps new employees quickly learn and integrate into the new work environment. Through departmental in-house training, internal open courses, job rotation, project assignments, and overseas assignments, employees can continue to grow in their professional fields and personal development. To strengthen the management capabilities of supervisors, the Company arranges irregular training on management-related topics such as leadership, strategy, and execution to enhance the management and leadership abilities of managers.

Given the internationalization of the organization's development and to facilitate smoother communication and interaction within the group and with the outside world, in 2021, the Company launched a special project to subsidize the improvement of employees' English language abilities. The Company provides partial training fees to encourage employees to continue learning foreign languages and improve their professional skills during their free time.

The Company conducts the following related training courses in accordance with the annual education and training plan:

a. New employee pre-employment training: It includes company culture and regulations, intellectual property overview, basic operating system operations, quality management awareness, non-hazardous substance policy promotion, personal job responsibilities and explanations, and professional job function training. The Company has established a "new employee mentorship system" where new employees follow a plan to receive complete pre-employment education and training, along with guidance from a dedicated mentor to assist new employees in quickly becoming familiar with and integrating into their work positions.

b. Professional job function training:

- (a) Internal training: Department managers or senior employees serve as trainers and arrange training courses according to the technical and professional training needs of each functional unit. The goal is to enhance employees' value and sense of responsibility, correct work attitudes and concepts, strengthen professional skills to improve productivity and efficiency, and expand career development opportunities.
- (b) External training: The Company allocates an education and training budget every year to send employees to professional training institutions for training to acquire external professional knowledge and skills. The Company also encourages employees to continue their education while on the job. This year, in collaboration with the Industry-Academia Center of National Central University, we have the honor of inviting professors from the College of Management to launch a course for middle and senior executives. This series of courses is designed to enhance the managerial skills of our colleagues. At the same time, we are working with professors from the Department of Mechanical Engineering to develop professional competency-related courses specifically for our research and development units.

c. Quality consciousness:

Through the "Knowledge Management Zone," the Company regularly updates internal and external audit recommendations and improvement plans, and shares and analyzes common customer complaint cases. Using this quality information exchange channel helps to continuously optimize internal business processes and

quality management capabilities.

d. ACES Academy:

We have established the "ACES Academy" digital learning platform to provide diverse and rich learning content, including training categories such as management functions, business sales, research and development, production management, general education, and language, in a more flexible manner and learning style to meet the needs of more employees.

e. The statistics of employee education and training in our company for the year 2023 are as follows:

Item	Classes	People	Training hours
New Employee Training	9	94	6,768
Professional Skills Training	117	218	4,927
Total	126	312	11,695

(C) Retirement system and its implementation status

The Company has established an employee retirement policy in accordance with the Labor Standards Act, which includes setting aside retirement reserves each month based on the total salary amount and depositing them into a designated account with Taiwan Bank. The Labor Pension Act has been in effect since July 1, 2005, and after adopting a defined contribution plan, employees of the Company may choose to apply the retirement provisions of the Labor Standards Act or the retirement system under the Labor Pension Act, while retaining the work seniority before the implementation of the Act. For employees who apply the Labor Pension Act, the Company's contribution rate for employee retirement shall not be less than 6% of the employee's monthly salary.

(D) Employee behavior or code of ethics.

The Company has established work rules as a basis for employees' daily work and behavior. The work rules include the following code of ethics that employees should abide by:

- a. Professional ethics: Both employers and employees of the Company should strive to establish corporate ethics and professional ethics, consider each other, and maintain a good labor-management relationship.
- b. Employees should cherish the honor of the Company, demonstrate team spirit, and be loyal and diligent in carrying out their tasks.
- c. Employees should be diligent in their duties and comply with all rules and regulations of the Company.
- d. Employees should obey the instructions and supervision of all levels of management and not engage in any deceptive or shirking behavior. Managers at all levels should guide and instruct employees kindly and pay attention to work safety.
- e. Employees should work diligently, cherish public property, reduce losses, improve work quality, and increase work efficiency.
- f. Absolutely confidential about the Company's business or job duties.
- g. Employees of the Company should handle their duties and public affairs in order and not report them to higher levels without authorization, except in emergencies or special situations.
- h. When a significant fault occurs in any unit responsible for the Company, the immediate supervisor should receive joint disciplinary action according to the circumstances, and significant achievements should receive joint rewards.
- i. No arrogant, lazy, or corrupt behavior, accepting invitations, gifts, kickbacks, or other unlawful benefits, or other behavior that could damage personal or Company reputation.
- j. Employees should not use the Company's name for any purposes outside of their responsibilities.

- k. Employees are not allowed, without the Company's written consent, to engage in the same or similar business as the Company for themselves or a third party, or to be an unlimited liability shareholder, business executor, director, or manager of a similar business company or an explicit or hidden partner of a business.
- l. Employees are not allowed to take public property out of the factory without approval.
- m. Labor-management meetings: The Company holds labor-management meetings in accordance with the "Implementation Measures for Labor-Management Meetings" to coordinate labor-management relations, promote mutual understanding, enhance labor-management cooperation, and improve work efficiency. Regular meetings are held to exchange opinions, and both employers and employees should adhere to the principles of harmony and integrity to negotiate and resolve problems.
- n. Social responsibility meetings: The Company attaches great importance to labor rights, strives to provide a quality working environment and respect for labor rights, and holds regular social responsibility meetings every quarter to announce corporate labor and environmental health and safety policies and measures, which serve as a channel for communication between employers and employees.
- o. Employee complaint handling system: The Company has set up an employee suggestion box and an "employee complaint handling system" to provide employees with a channel to express complaints and suggestions, and to strengthen the labor-management relationship.
 - (a) If an employee makes an oral complaint, the receiving staff in each department should record it and immediately report it for processing.
 - (b) If an employee's rights are infringed upon, or if they have other opinions, they may submit a complaint form or other written documents directly to the Company in accordance with the Company's complaint handling procedures, and the supervisor of each unit should immediately investigate and handle the matter or report it for processing, and reply to the complainant with the results or handling the situation in writing.
- (E) Working environment and employee personal safety protection measures

Given the importance of the work environment and employee personal safety protection measures, the Company has been certified with the ISO 14001 Environmental Management System and ISO 45001 Occupational Health and Safety Management System. The ISO 14001 and ISO 45001 management systems are used to address significant environmental considerations and occupational safety and health risks, using target and program management to prioritize improvements. Lower-risk factors are controlled through operation management methods, and through good operation and improvement, significant effects and control have been achieved.

The following are the measures that the Company has taken to promote environmental and occupational safety and health:

a. Promotion of the Restriction of Hazardous Substances (ROHS) and REACH regulations.

The ROHS officially took effect on July 1, 2006, and products sold to the EU cannot contain six hazardous substances, including lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyls (PBB), and polybrominated diphenyl ethers (PBDE). The Company actively promotes green production and procurement, implements it in the production process, and has already complied with the requirements of major customers for products that are free of hazardous substances, receiving recognition from them.

b. Resource recycling and waste reduction plan

The Company actively utilizes resources effectively to reduce waste and lower production costs. It improves process and operational management to reduce the generation of scrap materials. On the other hand, it develops and selects

pollution-free and low-pollution processes to reduce waste. The metal waste generated during production is quantified and recycled through an effective management system. The recovered waste metal is sold to waste recyclers, thereby reducing resource waste.

c. Occupational hazard prevention plan

To achieve the goal of zero harm, the Company schedules an occupational hazard prevention program every year to promote knowledge of occupational hazard prevention among colleagues. Through an audit system, execution deficiencies are identified. Additionally, meetings are held annually to review and improve the environmental and safety deficiencies according to the plan. Through the PDCA approach, the Company reduces the risk of harm in business units year by year, ultimately achieving the goal of zero accidents.

- d. Implementation of automated inspection
 - Employees may face physical injuries when dealing with different working environments, processes, operations, and tasks due to unsafe operations, equipment, or management factors. Therefore, the Company actively establishes standard procedures for production operations and reduces the probability of work-related injuries. Through the implementation of these measures, potential hazards can be identified, and improvements can be made to effectively control the risks.
- (F) Agreements between labor and management and the situation of various measures to safeguard employee rights and interests

The labor-management relationship in the Company is harmonious. In addition to regularly holding labor-management meetings and social responsibility meetings, the Company also communicates with employees through employee meetings and other means to maintain a good relationship between labor and management.

The Company is committed to promoting workplace gender equality and raising awareness among employees about the concept and purpose of maternal protection in the workplace. The Company has established facilities and equipment for maternal protection, such as lactation rooms, throughout the factory. The Company also arranges for occupational health specialists to provide on-site health services and organize workplace health promotion and hazard prevention activities regularly.

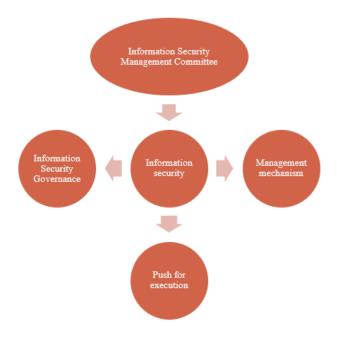

B. Recent annual and year-to-date losses due to labor disputes (including violations of labor standards as determined by labor inspections, which should indicate the date of the penalty, penalty number, violated legal provisions, violation content, and penalty content), as well as estimated amounts and measures to address current and potential future losses, up to the date of publication of the annual report:

The Company and the labor union agree to follow the labor regulations promulgated by the government, and relevant management procedures have been established since the employee's date of hire. As of the date of publication of the annual report, the Company has not experienced any significant labor disputes or losses.

(6) Cyber security management:

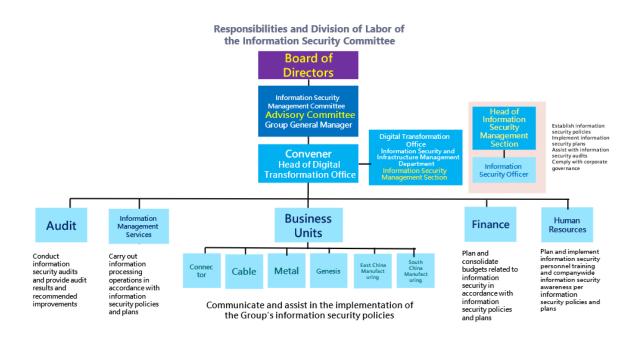

- A. Information and communication security management strategy and framework
 - (A) ACES Information Security Management Committee.

In response to strengthening the company's information security management, the "ACES Information Security Management Committee" was established in October 2020. The group's general manager serves as the advisory member, the head of the Digital Transformation Department acts as the convener, and the highest leaders of each company unit are members of the committee. The head of the Information Security Management Section is responsible for reviewing the information security governance policies of each subsidiary, overseeing the operation of information security governance, and regularly reporting the status of information security governance to the board of directors.

(B)The Organizational Structure of the ACES Information Security Management Committee

The Company has established an information security management section and allocated resources to hire a dedicated information security manager and staff. The Information Security Service Management Meeting is held at least once every quarter, and the Group Information Security Management Committee meeting is held at least twice a year. The Company also reports on the status of information security governance to the board of directors at least once a year.

(C) Information and communication security policy

a. All global employees and contract workers of ACES Group must adhere to the following ACES Information and Communication Security Policy:

b. Specific management plan:

- (a) Network Usage Policy: Implement next-generation firewalls, control internet usage behavior, activate advanced network protection mechanisms, and control cross-site transmission to prevent virus spread.
- (b) Email Usage Policy: Strictly control spam emails, introduce APT protection mechanisms, enhance awareness and conduct social security drills, and update email systems to improve self-protection.
- (c) Computer Usage Policy: Control end-user computer permissions, disable non-compliant software, replace outdated and insecure operating systems, implement vulnerability patches, and control removable storage media.
- (d) Anti-virus Protection Deployment Policy: Introduce server anti-virus systems, deploy anti-virus software, and update virus codes and anti-virus versions in real-time.
- (e) Password Principles: Implement password complexity principles, force regular password changes, and activate abnormal usage lockout mechanisms.
- (f) Information Backup/Restore Policy: In addition to basic system backup mechanisms, we have introduced high-reliability backup systems to prevent data tampering and have planned remote and cloud-based encrypted backup solutions. We also implement regular disaster recovery drills for critical services.
- (g) System Event Management Policy: Establish automatic alarm mechanisms to reduce disaster diffusion and shorten service interruption time.
- (h) Remote Access Policy: Control internal remote access permissions, control internal and external information transmission, and disable P2P remote control software.
- (i) Privileged Account Management Policy: Privileged accounts are centrally managed, with passwords stored in a digital vault and automatically changed on a regular schedule. Usage of accounts requires an application and is monitored through the system, with full recording of the usage details.
- (j) Endpoint Security Protection Policy: Implementation of Endpoint Detection and Response (EDR) and comprehensive conditional application control to enhance visibility through policy audits and prevent lateral movement of attacks.
- (k) Zero Trust Network Policy: Blocks unauthorized devices from connecting to the company network. Use of the company network requires an application and subsequent approval.

c. Review and Continuous Improvement:

- (a) Strengthen employees' awareness of social engineering attacks, regularly conduct information security drills, and hold information security courses.
- (b) Enhance company data protection to prevent the leakage of important information.
- (c) Evaluate the adoption of more advanced backup mechanisms to prevent backup data from

being destroyed.

- (d) Continuously strengthen anti-virus and anti-hacking capabilities.
- (e) Continuously virtualize physical hosts to shorten disaster recovery time and comply with sustainable management.
- (f) Engage a third-party company annually to conduct system vulnerability scans and promptly rectify significant vulnerabilities.
- (g) Engage a third-party company annually to carry out penetration testing exercises to enhance cybersecurity defense capabilities.
- (h) Evaluate the implementation of ISO 27001 to elevate the company's cybersecurity level.
- (i) Assess the adoption of multi-factor authentication to mitigate cybersecurity risks and eliminate potential vulnerabilities for attackers.
- (j) Assess the implementation of SOC mechanisms for 24/7 monitoring, ensuring comprehensive cybersecurity protection.
- d. Execute according to the information security control procedure (TN-QP-0002): To maintain the continuous operation of the information system, prevent hacking, viruses, and other intrusions and damage, avoid human errors and accidents, prevent unauthorized and illegal use, and maintain physical environment safety.

(D) Information security objectives

B. Information security risks and corresponding measures

The Company has established comprehensive network and computer-related cybersecurity measures and introduced a highly reliable backup system. However, it cannot guarantee complete avoidance of cyber-attacks, malicious software, and other forms of harassment because these attacks continuously update and find illegal ways to infiltrate the Company's internal network system, with the main objective of disrupting the Company's operations and damaging its reputation. In the event of a serious cyber-attack, the Company's system may lose important data, and the production line may also come to a halt. Nevertheless, the Company continues to evaluate existing information security regulations and review procedures to ensure their adequacy and effectiveness, to reduce the impact of constantly evolving information security threats, new risks, and attacks.

C. Significant information and communication security incidents

On March 6, 2023, part of the Company's information systems was subjected to a hacker network attack. At the time of the incident, the Information Department had activated relevant defense mechanisms and recovery operations comprehensively, while collaborating with external cybersecurity company technical experts. This cybersecurity incident had no significant impact on the Company's operations. The Information

Department will strengthen the inspection and reinforce the existing infrastructure. The Company had already implemented off-site backup mechanisms for major systems, and will now more actively and comprehensively enhance network security levels to protect data security and integrity. Additionally, the Company will evaluate advanced server defense mechanisms, plan zero-trust network security mechanisms, strengthen OT network security, and actively promote information security awareness to establish information security defenses.

- D. Allocation of resources for information security management
 - 1. Dedicated Personnel: Establish a dedicated corporate unit, the "Information Security Management Division," responsible for company information security planning, technology implementation, and related audit matters to maintain and continuously enhance information security.
 - 2. Education and Training: All new employees complete an information security education and training course before starting their positions; all employees complete a three-hour online information security education training and assessment; and at least twice a year, social engineering phishing email tests are conducted.
 - 3. Security Advocacy: Issue at least four information security announcements annually to communicate important regulations and precautions regarding information security protection.
 - 4. Financial Investment: Continuously invest millions of dollars annually in information security-related maintenance and construction to strengthen group information security.

(7) Important contracts

As of May 10th, 2024

			115 01	111ay 10th, 2021
Contract nature	Parties involved	Contract start and end date	Main content	Limitation clauses
Technology transfer agreement	KUNSHAN ACES ELECTRONIC CO., LTD.	2025.12.31	ACES KS has obtained the rights to manufacture and sell products based on ACES's technology and will pay ACES a technology fee based on a certain percentage of the net sales of the "Contract Products" for three years, as stipulated in the contract.	None
Technical service agreement	DONGGUAN ACES ELECTRONIC CO., LTD.		ACES DG will pay ACES a technology license fee based on a certain percentage of the net sales of the "Contract Products" for three years, as stipulated in the contract.	None
Joint credit agreement	E.SUN Commercial Bank, Ltd.	2023.07.03~ 2028.07.03	Credit agreement.	The financial ratios must meet the standards outlined in the contract.
Major engineering procurement contract	ACES ELECTRONI CS CO., LTD.		ACES will pay Li-Yuan Construction a fee based on a certain percentage, as stipulated in the "Engineering Contract", according to the contract.	None
Purchase and sale agreement	ACES ELECTRONI CS CO., LTD.	2023.09.13	ACES will pay the landowner a fee based on a certain percentage, as stipulated in the "Sale Contract", according to the contract.	None

	Financial Leverage	1.16	1.11	1.10	(2.00)	0.75	0.68

Analysis of significant changes in financial ratios over the last two years (20% change):

- 1. Interest Coverage Ratio: Not applicable for the fiscal year 2023 due to a loss.
- 2. Average Collection Period: Primarily due to a decrease in net revenue compared to the previous period.
- 3. Turnover Rate of Real Estate, Plant, and Equipment (times): Mainly due to an increase in the amount of real estate, plant, and equipment.
- 4. Return on Assets: Primarily due to a decrease in net profit for the period and an increase in financial costs compared to the previous period.
- 5. Return on Equity: Primarily due to a decrease in net profit for the period compared to the previous period.
- 6. Ratio of Pre-tax Net Income to Paid-in Capital: Mainly due to a decrease in pre-tax net profit for the period compared to the previous period.
- 7. Net Profit Margin: Mainly due to a decrease in net profit after tax compared to the previous period.
- 8. Earnings per Share: Mainly due to a decrease in net profit for the period compared to the previous period.
- 9. Cash Flow Ratio: Primarily due to a decrease in net cash flow from operating activities compared to the previous period.
- 10. Cash Reinvestment Ratio: Primarily due to a decrease in net cash flow from operating activities compared to the previous period.
- 11. Various Leverage Ratios: Not applicable for the fiscal year 2023 due to an operating loss.

Source of information: Consolidated financial statements were audited or reviewed by CPAs.

Note 1: Numbers after the second decimal place are rounded off by truncation.

Analysis of significant changes in financial ratios over the last two years (20% change):

- 1. Long-term funds to property, plant, and equipment ratio: Mainly due to the increase in the amount of property, plant, and equipment.
- 2. Interest coverage ratio: Not applicable for the year 112 due to a loss.
- 3. Property, plant, and equipment turnover rate (times): Mainly due to the increase in the amount of property, plant, and equipment.
- 4. Return on assets: Mainly due to a decrease in net profit after tax compared to the previous period.
- 5. Return on equity: Mainly due to a decrease in net profit after tax compared to the previous period.
- 6. The ratio of pre-tax net profit to paid-in capital: Mainly due to a decrease in pre-tax net profit for the period compared to the previous period.
- 7. Net profit margin: Mainly due to a decrease in net profit after tax compared to the previous period.
- 8. Earnings per share: Mainly due to a decrease in net profit after tax for the period compared to the previous period.
- 9. Cash flow ratio: Mainly due to the decrease in net profit, resulting in a corresponding decrease in net cash flow from operating activities, leading to a decline in the cash flow ratio.
- 10. Cash adequacy ratio: Mainly due to an increase in cash outflows for capital investments, resulting in a decrease in the cash adequacy ratio.
- 11. Cash reinvestment ratio: Mainly due to the decrease in net profit, resulting in a corresponding decrease in net cash flow from operating activities, leading to a decline in the cash reinvestment ratio.
- 12. Various leverage ratios: Not applicable for the year 112 due to an operating loss.

Source of information: Parent company only financial statements were audited by CPAs.

- Note 1: Numbers after the second decimal place are rounded off by truncation.
- Note 2: The Company did not prepare the parent company only financial statements for the first quarter of 2023 and therefore no disclosure is necessary.

The formula is as follows:

- (A) Financial structure
 - a. Debt Ratio = Total Liabilities / Total Assets
 - b. Long-term Fund to Property, Plant and Equipment Ratio = (Total Equity + Non-current Liabilities) / Net Property, Plant and Equipment

(B) Solvency

- a. Current Ratio = Current Assets / Current Liabilities
- b. Quick Ratio = (Current Assets Inventories Prepaid Expenses) / Current Liabilities
- c. Times Interest Earned = Earnings before Interest and Taxes / Interest Expenses

(C) Operating Performance

- a. Average Collection Turnover = Net Sales / Average Accounts Receivable
- b. Average Collection Days = 365 / Average Collection Turnover
- c. Average Inventory Turnover = Cost of Sales / Average Inventory
- d. Average Payment Turnover = Cost of Sales / Average Accounts Payable
- e. Average Inventory Turnover Days = 365 / Average Inventory Turnover
- f. Property, Plant and Equipment Turnover = Net Sales / Average Net Property, Plant and Equipment
- g. Total Assets Turnover = Net Sales / Average Total Assets

(D) Profitability

- a. Return on Total Assets = (Net Profit + Interest Expenses * (1 Effective Tax Rate)) / Average Total Assets
- b. Return on Equity = Net Profit Attributable to Shareholders of the Parent / Average Equity Attributable to Shareholders of the Parent
- c. Net Profit Margin = Net Profit / Net Sales
- d. (Earnings Per Share = (Net Profit Attributable to Shareholders of the Parent Preferred Stock Dividend) / Weighted Average Number of Shares Outstanding

(E) Cash Flow

- a. Cash Flow Ratio = Net Cash Provided by Operating Activities / Current Liabilities
- b. Cash Flow Adequacy Ratio = Five-year Sum of Cash from Operations / Five-year Sum of Capital Expenditures, Inventory Additions, and Cash Dividend
- c. Cash Flow Reinvestment Ratio = (Cash Provided by Operating Activities
 Cash Dividends)/ (Gross Property, Plant and Equipment + Long-term Investments + Other Noncurrent Assets + Working Capital)

(F) Leverage

- a. Operating Leverage = (Net Sales Variable Cost) / Profit from Operations
- b. Financial Leverage = Profit from Operations / (Profit from Operations Interest Expenses)

(3) Audit committee's report on the financial statement of the latest fiscal year

ACES ELECTRONICS CO., LTD. Audit Committee's Review Report

The Board of Directors has submitted the Company's 2023 business report, financial statements, and proposal for profit distribution, in which the financial statements were audited by CPAs Lin Heng-Sheng and Chen Zheng-Xue of KPMG, and an audit report has been issued. The business report referred to in the preceding paragraph, financial statement and proposal for profit distribution have been completed the deliberation by the Audit Committee and found there is no discrepancy. Reported above in accordance with Article 14-4 of the Securities and Exchange Act and Article 219 of the Company

Act, please verify.

Sincerely,

The 2024 Annual Shareholders' Meeting of the Company

Audit Committee Convener: Liaw Dar-Lii

(4) Financial statement for the most recent fiscal year

Representation Letter

The entities that are required to be included in the consolidated financial statements of ACES Electronics Co., Ltd. as of and for the year ended December 31, 2023 under the Criteria Governing Preparation of Affiliation Reports, Consolidated Business Reports, and Consolidated Financial Statements of Affiliated Enterprises are the same as those included in the consolidated financial statements prepared in conformity with the International Financial Reporting Standard No. 10, "Consolidated Financial Statements" endorsed by the Financial Supervisory Commission of the Republic of China. In addition, the information required to be disclosed in the combined financial statements is included in the consolidated financial statements. Consequently, ACES Electronics Co.,

Ltd. and Subsidiaries do not prepare a separate set of combined financial statements.

Hereby declare

Company Name: ACES Electronics Co., Ltd.

Chairman: Yuan Wan-ting Date: March 12, 2024

Independent Auditors' Report

To the Board of Directors of ACES Electronics Co., Ltd.:

Opinion

We have audited the consolidated financial statements of ACES Electronics Co., Ltd. And its subsidiaries (the ACES Group), which comprise the consolidated balance sheets as of December 31, 2023 and 2022, the consolidated statements of comprehensive income, consolidated statements of changes in equity, and consolidated statements of cash flows for the years ended December 31, 2023 and 2022, and notes to the parent company consolidated financial statements including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the ACES Group as of December 31, 2023 and 2022, and its consolidated financial performance and its consolidated cash flows for each of the years then ended, in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of ACES Electronics Co., Ltd. and its subsidiaries in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

Description of key audit matter

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

1. Revenue Recognition

Please refer to Notes 4(15) to the consolidated financial statements for the accounting policy on operating revenue; and refer to Notes 6(20) for disclosures relating to revenue.

Description of key audit matter:

ACES Groups engage mainly in processing, manufacturing and sales of connectors, connector sets and other electronic components. Sales revenue is one of the key matters to the financial statements. Therefore, the assessment for recognition of sales revenue is one of the key evaluation matter when we audit the Groups' financial statements.

How the matter was addressed in our audit:

In relation to the key audit matter above, our principal audit procedures included:

- We inspected whether the Company's revenue recognition policies are in accordance with relevant guidelines.
- We tested the design of internal control process and its efficiency of execution for sales revenue.
- We focused on the top 10 clients, compared differences in numbers on the same period of the previous year, and checked if there's any significant abnormality.
- We selected sales transaction samples from a certain period before and after the end of current year, and examined revenue transaction records with vouchers arising from appropriate time period.
- We assessed if there is any significant sales return and discount after the balance sheet date.

2. Valuation of inventory

Please refer to Notes 4(8) to the consolidated financial statements for the accounting policy on inventory valuation, Notes 5(1) for accounting estimates and assumptions of inventory, and Notes 6(4) for disclosure disclosures relating to inventory.

Description of key audit matter:

Inventory is valued at the lower of cost or net realizable value ACES Groups mainly produces electronic products such

as high precision connectors and connector sets which are affected by the fast change of technology and updates of manufacturing technique; its product sales might have tremendous fluctuation which may cause the cost of inventory to be higher than its net realizable value. Therefore, the assessment for inventory valuation is one of the key evaluation matter when we audit the Groups' financial statements.

How the matter was addressed in our audit:

In relation to the key audit matter above, our principal audit procedures included:

- We assessed the inventory aging report, and analyzed changes in the inventory aging report from the previous to current year.
- We tested samples provided by the ACES Group on inventory valued at the lower of cost and net realizable value.
- We understand the selling prices adopted by the management of the Group, and use it to assess the reasonableness of inventory net realizable value.
- We assessed if the inventory valuation is recorded according to the accounting policies of the Group.

Other matter

ACES Electronics Co., Ltd. has additionally prepared its parent-company-only financial statements as of and for the years ended December 31, 2023 and 2022, on which we have issued an unmodified audit opinion.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and with the IFRS, IAS, IFRIC, SIC endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing ACES Electronics Co., Ltd. and its subsidiaries' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate ACES Electronics Co., Ltd. and its subsidiaries or to cease operations, or has no realistic alternative but to do so.

Those charged with governance (inclusive of the Audit Committee) from ACES Electronics Co., Ltd and its subsidiaries are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and professional skepticism throughout the audit. We also:

- 1.Identified and assessed the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2.Obtained an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ACES Group and its subsidiaries' internal control.
- 3. Evaluated the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4.Concluded on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on ACES Electronics Co., Ltd. and its subsidiaries' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated

financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the ACES Group to cease to continue as a going concern.

- 5.Evaluated the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6.Obtained sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicated with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identified during our audit.

We also provided those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicated with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determined those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Lin, Heng-Shen and Chen, Zheng-Xue.

KPMG

Taipei, Taiwan (Republic of China) March 12, 2024

Notes to Readers

The accompanying parent company only financial statements are intended only to present the financial position, financial performance, and cash flows in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers. The standards, procedures, and practices to audit such parent company only financial statements are those generally accepted and applied in the Republic of China.

ACES Electronics Co., Ltd. and Subsidiaries Notes to Consolidated Financial Statements For the Years Ended December 31, 2023 and 2022 (Expressed in thousands of New Taiwan dollars, unless otherwise indicated)

1. Organization

ACES Electronics Co., Ltd. ("The Company") was established on November 7, 1996 with the approval of the Ministry of Economic Affairs. Its registered office is located at 13 Dong-Yuan Road, Chung-Li District, Taoyuan City, the Republic of China ("ROC"). The Group and its subsidiaries (hereinafter refer to as "the Group") is mainly engaging in processing, manufacturing and selling of connectors, connector cable sets, metal stamping parts and other electronic components.

2. The Authorization of Financial Statements

These consolidated financial statements were approved and authorized for issue by the Board of Directors on March 12, 2024.

3. Application of New and Revised Standards, Amendments and Interpretations

(1) Impact of adoption of new, revised or amended standards and interpretations endorsed by the Financial Supervisory Commission, ROC.

The Group has adopted the amendments to the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations with effective date from January 1, 2023. The adoption does not have a material impact on the Company's parent company only financial statements.

- Amendments to IAS 1 "Disclosure of Accounting Policies"
- ·Amendments to IAS 8 "Definition of Accounting Estimates"
- · Amendments to IAS 12 "Deferred Tax related to Assets and Liabilities arising from a Single Transaction"

The Group has adopted the amendments to the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations with effective date from May 23, 2023. The adoption does not have a material impact on the Company's parent company only financial statements.

- · Amendments to IAS 12 "International Tax Reform Pillar Two Model Rules"
- (2) Impact of the IFRSs that have been endorsed by the FSC but not yet in effect

The Group assessed that the adoption of the following amendments, effective for annual period beginning on January 1, 2024, would not have a material impact on its parent company only financial statements.

- · Amendments to IAS 1 "Classification of Liabilities as Current or Non-current"
- · Amendments to IAS 1 "Non-current Liabilities with Covenants
- · Amendments to IAS 7 and IFRS 7 "Supplier Finance Arrangements"
- · Amendments to IFRS 16 "Lease Liability in Sale and Leaseback"
- (3) The IFRSs issued by International Accounting Standards Board ("IASB") but not yet endorsed by the FSC

The Group assesses that the adoption of the following new or amended standards, not yet

- endorsed by the FSC, would not have a significant impact on its financial statements.

 Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture"
- · IFRS 17 "Insurance Contracts" and amendments to IFRS 17 "Insurance Contracts"
- · Amendments to IAS 21 "Lack of Exchangeability"

4. Summary of Significant Accounting Policies

The significant accounting policies applied in the preparation of these consolidated financial statements are set out as below. Unless otherwise stated, the significant accounting policies have been applied consistently to all periods presented in these consolidated financial statements.

(1) Statement of compliance

The consolidated financial statements is in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and with the IFRS, IAS, IFRIC, SIC endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China (hereinafter refer to as IFRSs approved by FSC).

(2) Basis of preparation

a. Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis except for the following material items in the balance sheets:

- (i) Financial assets at fair value through profit or loss;
- (ii) Investment property at fair value; and
- (iii) Defined benefit liability is recognized as the fair value of the plan assets less the present value of the defined benefit obligation.

b. Functional and presentation currency

The functional currency of each entity of the Group is determined based on the primary economic environment in which the entity operates. The consolidated financial statements are presented in New Taiwan Dollar ("NTD"), which is also the Company's functional currency. All financial information presented in NTD has been rounded to the nearest thousand.

(3) Basis of consolidation

a. Principle of preparation of the consolidated financial statements

All subsidiaries are included in the Group's consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries. Inter-company transactions, balances and unrealized gains or losses on transactions between companies within the Group are eliminated. The consolidated profit and loss amount belongs to the Company's equity owner and the controlling right. The same applies to balance of loss from non-controlling equity rights.

Changes in the consolidated ownership interest in a subsidiary that do not result in the loss of control are accounted for within equity. Any difference between such adjustment and the fair value of the consideration paid or received is recognized directly in equity and attributed to shareholders of the Company.

Note 1: In August 2023, the Company's subsidiary MEC IMEX INC. decreased its capital in the amount of \$120,000 thousand for covering deficits. The Company acquired 11,991 thousand shares, which increase its shareholding percentage to 99.86%.

Note 2: The Company acquired shares of COMPUPACK TECHNOLOGY CO., LTD from minority shareholders in 2023, which increase its shareholding percentage to 100%.

- Note 3: The Company acquired shares of MICON PRECISE CORP. from minority shareholders in September, 2023, which increase its shareholding percentage to 99.61%.
- Note 4: The liquidation procedures of the subsidiaries of the Company, ACES (HONG KONG) ELECTRONIC CO., LTD, GLOBAL ACUMEN LIMITED, GENESIS INTERCONNECT CO., LTD., and SHENZHEN JINO ELECTRONIC CO., LTD. have been completed in 2023.
- Note 5: The Company sold the subsidiary, GENESIS GUIZHOU TECHNOLOGY CO., LTD., to non-related parties on November 3, 2023.
- Note 6: The subsidiary of the Company set up ACES ZHUHAI TECHNOLOGY LTD. on February 1, 2023, which is included into the Group since that day.
- Note 7: The subsidiary of the Company obtained the control over ACES Surface Treatment Co., Ltd. on May 5, 2023, which is included into the Group since that day.
- 2. Subsidiaries not included in the consolidated financial statements: None.

(4) Foreign currency

a. Foreign currency transactions

Transactions in foreign currencies are translated into the respective functional currencies of the Company entities at the exchange rates at the dates of the transactions. At the end of each subsequent end of reporting date (hereinafter refer to as 'end of reporting period'), monetary items denominated in foreign currencies are translated into the functional currencies using the exchange rate at the date. Non-monetary items denominated in foreign currencies that are measured at fair value are translated into the functional currencies using the exchange rate at the date that the fair value was determined. Non-monetary items denominated in foreign currencies that are measured based on historical cost are translated using the exchange rate at the date of the transaction.

Exchange differences are recognized in profit or loss.

b. Foreign operations

The assets and liabilities of foreign operations, including good will and fair value adjustments arising on acquisition, are translated into the presentation currency at the exchange rates at the reporting date. The income and expense of foreign operations are translated into the presentation currency at the average exchange rate. Exchange differences are recognized in other comprehensive income.

When a foreign operation is disposed of such control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal.

When the settlement of a monetary receivable from, or payable to, a foreign operation is neither planned nor likely to occur in the foreseeable future, the exchange differences arising from such a monetary item that are considered to form part of the net investment in the foreign operation are recognized in other comprehensive income.

(5) Classification of current and non-current assets and liabilities

An asset is classified as current when:

- a. The asset expected to realize, or intends to sell or consume, in its normal operating cycle;
- b. The asset primarily held for the purpose of trading;
- c. The asset expected to realize within twelve months after the reporting date; or
- d. The asset is cash and cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current when:

- a. The liability is expected to be settled within the consolidated company's normal operating cycle;
- b. The liability is held primarily for the purpose of trading;
- c. The liability is due to be settled within twelve months after the reporting date; or
- d. The Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments, do not affect its classification.

(6) Cash and cash equivalents

Cash comprise cash balances and demand deposits. Cash equivalents comprise short-term highly liquid investments that are readily convertible into known amount of cash and are subject to an insignificant risk of changes in their fair value. Time deposits with short-term maturity but not for investments and other purposes and are qualified with the aforementioned criteria are classified as cash equivalent.

(7) Financial instruments

Account receivables initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the consolidated company becomes a party to the contractual provisions of the instrument. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value, plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issuance. A trade receivable without a significant financing component is initially measured at the transaction price.

a. Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade basis.

On initial recognition, a financial asset is classified as measured at amortized cost, fair value through other comprehensive income (FVOCI) – debt investment, FVCI – equity investment, or FVTL.

Financial assets are not reclassified subsequent to their initial recognition unless the consolidated company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the changes in the business model.

(i) Financial assets measured at amortized cost

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as FVTPL:

it is held within a business model whose objective is to hold assets to collect contractual cash flows; and

•its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

These assets are subsequently measured at amortized cost, which is the amount at which the financial asset is measured at initial recognition, plus/minus, the cumulative amortization using the effective interest method, adjusted for any loss allowance. Interest income, foreign exchange gains and losses, as well as impairment, are recognized in profit or loss. Any gain or loss on de-recognition is recognized in profit or

loss.

(ii) Financial assets at fair value through profit or loss

All financial assets not classified as at amortized cost or at fair value through other comprehensive income as described above are measured at fair value through profit or loss. This includes all derivative financial assets. The consolidated company has the intention to sell account receivable at fair price through profit and loss immediately or recently; these amounts are recorded under account receivables currently.

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit and loss.

(iii) Business model assessment

The Group makes an assessment of the objective of the business model in which a financial asset is held at portfolio level, because this best reflects the way the business is managed, and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;
- · how the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way in which those risks are managed;
- · how managers of the business are compensated, for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sale activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, and are consistent with the Group's continuing recognition of the assets.

(iv) Assessment on whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial assets on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the consolidated company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

(v) Impairment of financial assets

The consolidated company recognizes loss allowances for expected credit losses (ECL) on financial assets measured at amortized cost (including cash and cash equivalents, notes and trade receivables, other receivables and refundable deposit) and contract assets. •

The Company measures loss allowances at an amount equal to lifetime ECL, except for the following which are measured as 12-month ECL:

- · debt securities that are determined to have low credit risk at the reporting date; and
- · other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased

significantly since initial recognition.

Loss allowance for account receivables is always measured at an amount equal to lifetime ECL.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Consolidated company considers reasonable and supportable information that is relevant and available without undue or effort. This includes both quantitative and qualitative information and analysis based on the Company's historical experience and informed credit assessment as well as forward-looking information.

The maximum period considered when estimating ECL is the maximum contractual period over which the consolidated company is exposed to credit risk.

The consolidated company assumes that the credit risk on a financial asset has increased significantly if it is more than 60 days past due.

The consolidated company considers a financial asset to be in default when the financial asset is more than 180 day past due or the debtor is unlikely to pay its credit obligations to the consolidated company in full.

The consolidated company considers a time deposit to have low credit risk when only deal with financial institutions with good credit rating.

Lifetime ECL are the ECL that result from all possible default events over the expected life of a financial instrument.

12-month ECL are the portion of ECL that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

ECL are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the consolidated company in accordance with the contract and the cash flows that the consolidated company expects to receive). ECL is according to financial assets' effective discount rate.

At each reporting date, the consolidated company assesses whether financial assets carried at amortized cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable data:

- · significant financial difficulty of the borrower or issuer;
- · a breach of contract such as a default or being more than 180 days past due;
- the lender of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender would not otherwise consider;
- · it is probable that the borrower will enter bankruptcy or other financial reorganization; or
- the disappearance of an active market for a security because of financial difficulties.

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For corporate customers, the Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due. According to experiences, the Group is not able to recover the overdue amount from company accounts after 180 days.

(vi) Derecognition of financial assets

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual

cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers the assets recognized in its statement of balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognized.

b. Financial liabilities and equity instruments

(i) Classification of debt or equity

Debt and equity instruments issued by the Company are classified as financial liabilities or equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

(ii) Equity instrument

An equity instrument is any contract that evidences residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued are recognized as the amount of consideration received, less the direct cost of issuing.

(iii) Compound financial instruments

Compound financial instruments issued by the Company comprise convertible bonds denominated in NTD that can be converted to ordinary shares at the option of the holder, when the number of shares to be issued is fixed and does not vary with changes in fair value.

The liability component of compound financial instruments is initially recognized at the fair value of a similar liability that does not have an equity conversion option. The equity component is initially recognized at the difference between the fair value of the compound financial instrument as a whole and the fair value of the liability component. Any directly attributable transaction costs are allocated to the liability and equity components in proportion to their initial carrying amounts.

Subsequent to initial recognition, the liability component of a compound financial instrument is measured at amortized cost using the effective interest method. The equity component of a compound financial instrument is not remeasured.

Interest related to the financial liability is recognized in profit or loss. On conversion at maturity, the financial liability is reclassified to equity and no gain or loss is recognized.

(iv) Financial liabilities

Financial liabilities are classified as measured at amortized ° A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss.

(v) Derecognition of financial liabilities

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.

On derecognition of a financial liability, the difference between the carrying amount of a financial liability extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

(vi) Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset and the net amount presented in the statement of balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

c. Derivative financial instruments

Derivatives of financial tools were initially measured at fair value. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are generally recognized in profit or loss, and recorded under profit and loss.

(8) Inventories

Inventory is valued at the lower of cost or net realizable value The cost of inventories is calculated using the weighted average method, and includes expenditure incurred in acquiring the inventories, production or conversion costs, and other costs incurred in bringing them to their present location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

(9) Investing in the affiliated Companies

Affiliates are all entities over which the Company has significant influence but not control. The Company has adopted equity method to account for interests in the affiliated companies.

Under the equity method, investment is initially recognized at cost. Investment cost includes transaction cost. The carrying amount of investment in the affiliates includes goodwill recognized at initial investment, net of any accumulated impairment losses

After adjusting the accounting policies of the affiliated parent company to be in line with that of the Company, the consolidated reports included the income and loss as well as other comprehensive income of the affiliate companies the Company recognized in proportion to its shares owned in the affiliated companies from the date the Company has significant influence over the affiliated parent company until the date it ceases to have such significant influence. When the affiliates have changes in equities not in relations to income or loss or other comprehensive income and not affecting the shares held by the Company, the changes of equity of the Company's shares in the affiliated companies should be recognized in proportion to its shares in the equity as capital reserve.

Unrealized gains on transactions between the Company and affiliates are eliminated to the extent of the Company's interest in the affiliates. The elimination of unrealized loss is the same as the written-off unrealized gain but is limited to the circumstances when the impairment evidence is not available.

When the Company's share of losses in the affiliates equals or exceeds its interests in the affiliates, including any other unsecured receivables, the Company does not recognize further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the affiliates, then additional loss or relevant liability would be recognized.

When the Company subscribes to additional shares in the affiliated companies or jointly controlled entity at a percentage different from its existing ownership percentage, the resulting carrying amount of the investment differs from the amount of the Company's proportionate interest in the net assets of the affiliated companies or jointly controlled entity. The Company records such a difference as an adjustment to investments with the corresponding amount charged or credited to capital surplus. However if the balance of capital surplus is insufficient from investment accounted using equity method, the difference should debit to retained earnings. If the Company's ownership interest is reduced due to the additional subscription to the shares of affiliated companies or joint controlled entity by other investors, the proportionate amount of the gains or losses previously recognized in other comprehensive income in relation to that affiliated companies or jointly controlled entity shall be reclassified to profit or loss on the same basis as would be required if the associate or jointly controlled entity had directly disposed of the related assets or liabilities.

(10) Investment property

Investment property is the property held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes. Investment property is measured at cost on initial recognition. Subsequent to initial recognition,

investment properties are measured using the cost model.

Any gain or loss (calculated by the difference between net disposal price and its carrying amount) on disposal of an investment property is recognized in profit or loss. If the sale of investment property was recorded under property, plant and equipment then the relevant 'other equities - property revaluation increments' shall be transferred to capital surplus.

Lease income from investment property is recognized as non-operating revenue on a straight-line basis during leased period.

(11) Property, plant and equipment

a. Recognition and measurement

Items of property, plant and equipment are measured at cost, which includes capitalized borrowing costs, less accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognized in profit or loss.

b. Subsequent expenditure

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

c. Depreciation

Depreciation is calculated on the cost of an asset less its residual value and is recognized in profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property, plant and equipment.

Land is not depreciated.

The estimated useful lives of property, plant and equipment for current and comparative periods are as follows:

- (i) Property and plants: 3 ~ 50 years
- (ii) Machinery and equipment: 2 ~ 10 years
- (iii) Mold equipment: 2 ~ 5 years
- (iv) Other equipment: 2 ~ 10 years

Depreciation methods, useful lives and residual values are reviewed at each annual reporting date and adjusted if appropriate

(12) Lease

a. Identifying a lease

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

b. As a lessee

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. • In addition, the right-of-use asset is periodically reduced by

impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, Discounted using the interest rate implicit in the lease or, if that rate cannot be reliably determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- (i) fixed payments, including in-substance fixed payments;
- (ii) payments for purchase or termination options that are reasonably certain to be exercised.

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when:

- (i) there is a change in the lease term resulting from a change of its assessment on whether it will exercise an option to purchase the underlying asset, or
- (ii) there is a change of its assessment on whether it will exercise an extension or termination option; or
- (iii) there is any lease modification.

When the lease liability is remeasured, other than lease modifications, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or in profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

When the lease liability is remeasured to reflect the partial or full termination of the lease for lease modifications that decrease the scope of the lease, the Company accounts for the remeasurement of the lease liability by decreasing the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognize in profit or loss any gain or loss relating to the partial or full termination of the lease.

The Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases and leases of low-value assets, including houses, buildings, and part of transportation equipment. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

As a practical expedient, the Company elects not to assess whether all rent concessions that meets all the following conditions are lease modifications or not:

- (i) the rent concessions occurring as a direct consequence of the COVID-19 pandemic;
- (ii) the change in lease payments that resulted in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change;
- (iii)any reduction in lease payments that affects only those payments originally due on, or before, June 30, 2021; and
- (iv) there is no substantive change in other terms and conditions of the lease.

Under the practical expedient, the effect of the change in the lease liability is reflected in profit or loss in the period in which the event or condition that triggers the rent concession occurs.

c. As a lessor

When the Company acts as a lessor, it determines at lease commencement whether each lease is a finance lease or an operating lease. To classify each lease, the Company makes an overall assessment of whether the lease transfers to the lessee substantially all of the risks and rewards of ownership incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then the lease is an operating lease. As part of this assessment, the Company considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

If the Company acts as a lessor from another lessor, the main lease contract and the transfer lease contract shall be attended to separately. The purpose of use from main lease contract shall determine the category of the transfer lease transaction. If the main lease contract is short-term lease contract and is recognized exemption, the transfer lease contract transaction shall be categorized as operating lease.

If the agreement includes components from lease and non-lease parts, the Company adopts

to Amendments to IFRS 15 to allocate considerations from the contract.

Property ownership under finance lease, the financing lease receivables shall be expressed in net amount of lease investment. The initial direct cost from negotiation and arranging operating lease was included in the net amount of lease investment. Net amount of lease investment shall reflect nature of fixed return of investment in each period; such amount shall be recognized as interest revenue and allocated in each period respectively. The Company recognizes lease income received during from operating lease as lease revenue based on straight-line basis.

(13) Intangible assets

a. Recognition and measurement

The goodwill acquired by the Company are measured at cost less accumulated impairment losses.

Expenditure related to research expenses is recognized in profit or loss as incurred.

Development expenses are capitalized only when the technical or commercial feasibility of the product or process is achieved, there is a high probability of future economic benefits flowing to the consolidated entity, and the consolidated entity has the intention and sufficient resources to complete the development and use or sell the asset. All other development expenditure is recognized in profit or loss as incurred. After initial recognition, capitalized development expenditures are measured at cost less accumulated amortization and any accumulated impairment losses.

For other intangible assets acquired by the Company and have finite useful lives are measured at cost less accumulated amortization and any accumulated impairment losses.

b. Subsequent expenditure

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognized in profit or loss as incurred, including goodwill from internal development and brand name.

c. Amortization

Amortization is calculated over the cost of the asset, less its residual value, and is recognized in profit or loss on a straight-line basis over the useful lives of intangible assets, other than goodwill, from the date that they are available for use.

- (i) Software: 1~ 3 years (ii) Franchising: 8 years
- (iii) Customer relationship: 3 years
- (iv) Other intangible assets 1~ 3 years

Amortization methods, useful lives and residual values for intangible assets are reviewed at each annual reporting date and adjusted if appropriate.

(14) Impairment of non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than inventories and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash-generating units(CGUs).

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount.

Impairment losses are recognized in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

The impairment loss recognized on goodwill is not reversed in a subsequent period. An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(15) Revenue Recognition

Revenue is measured based on the consideration to which the Company expects to be entitled in exchange for transferring goods or services to a customer. The Company recognizes revenue when it satisfies a performance obligation by transferring control of a good or a service to a customer. The following is a description of the Company's major revenues:

Revenue is recognized when the control over a product has been transferred to the customer. being when the products are delivered to the customer, the customer has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the Company has objective evidence that all criteria for acceptance have been satisfied.

The Company often offers volume discounts to its customers. Revenue from these sales is recognized based on the price specified in the contract, net of estimated volume discount. Accumulated experience is used to estimate the discounts, using the expected value method, and revenue is only recognized to the extent that is highly probable that a significant reversal will not occur. No element of financing is deemed present as the sales of goods are made, with a credit term of 90~150 days, which is consistent with the market practice.

A receivable is recognized when the goods are delivered as this is the point in time that the Company has a right to an amount of consideration that is unconditional.

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the consolidated company does not adjust any of the transaction prices for the time value of money.

(16) Government grants

The Company has obtained low interest rate loans from banks facilitated by the government, through the "Welcome Businesses Returning to Taiwan to Invest Solutions" launched by the Executive Yuan. The difference between such loan calculated by market borrowing interest rate valued at fair price and the amount received is recorded as deferred income. Grants that compensate the Company for expenses or losses incurred are recognized in profit or loss on a systematic basis in the periods in which the deferred income is recognized as deduction of expenses.

(17) Employee benefits

a. Defined contribution plans

Obligations for contributions to defined contribution pension plans are recognized in the periods during which services are rendered by employees.

b. Defined benefit plans

The Company's net obligation in respect of defined benefit plans is calculated by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of plan assets.

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for

the Company, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income, and accumulated in retained earnings within equity. The Company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (asset). Net interest expense and other expenses related to defined benefit plans are recognized in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss. The Company recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

c. Short-term employee benefits

Short-term employee benefits are expensed as the service is provided. A liability is recognized for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(18) Income taxes

Income taxes comprise current taxes and deferred taxes. Except for expenses related to business combinations or recognized directly in equity or other comprehensive income, all current and deferred taxes are recognized in profit or loss.

Current taxes comprise the expected tax payables or receivables on the taxable profits (losses) for the year and any adjustment to the tax payable in respect of previous years. The amount of current tax payables or receivables are the best estimate of the tax amount expected to be paid or received that reflects uncertainly related to income tax, if any. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred taxes arise due to temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their respective tax bases. Deferred taxes are recognized except for the following:

- a. temporary differences on the initial recognition of assets and liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profits (losses) at the time of the transaction;
- b. temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and

deferred taxes are measured at tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

Deferred tax assets and liabilities are offset if the following criteria are met:

- a. the Company has a legally enforceable right to set off current tax assets against current tax liabilities; and
- b. the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either:
 - (i) the same taxable entity; or
 - (ii) different taxable entities which intend to settle current tax assets and liabilities on a net basis, or to realize the assets and liabilities simultaneously, in each future period

in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

The unapplied tax losses and unapplied tax credits carried forward and deductible temporary differences are recognized as deferred income tax assets within the range of probable future taxable income available for use. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefits will be realized.

(19) Earning per share

The Company discloses the Company's basic and diluted earnings per share attributable to ordinary shareholders of the Company. Basic earnings per share is calculated as the profit attributable to ordinary shareholders of the Company divided by the weighted average number of ordinary shares outstanding. Diluted earnings per share is calculated as the profit attributable to ordinary shareholders of the Company divided by the weighted average number of ordinary shares outstanding after adjustment for the effects of all potentially dilutive ordinary shares, such as convertible bonds and estimated employee compensation.

(20) Operating segments

Operating segment is a component of the Company engaging in activities that may earn revenues and incur expenses, including relevant revenues and expenses from other components of the Company. Operating results of all segments are routinely provided to the chief operating decision-maker for review for set up policy to allocate resources and assess performance of the operating segments. Each operating segment shall have its separate financial information.

5. Critical Accounting Judgments and Key Sources of Estimations and Assumptions Uncertainty

While preparing the financial reports in compliance with the IFRSs as approved by FSC, the management should make judgment, estimate and assumption that would impact the adoption of accounting policy, as well as the amount reported for assets, liabilities, revenues and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed by management on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

There is no information involving critical judgments in applying the accounting policies in the consolidated financial statements.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year is as follows:

(1) Valuation of inventories

As inventories are stated at the lower of cost or net realizable value, the Company estimates the net realizable value of inventories for obsolescence and unmarketable items at the end of the reporting period and then writes down the cost of inventories to net realizable value. The net realizable value of the inventory is mainly determined based on assumption as to future demand within a specific time horizon. Due to the obsolescence of aircraft models, there may be significant changes in the net realizable value of inventories. Please refer to note 6(4) for further description on the valuation of inventories.

(2) Impairment of goodwill

The assessment of impairment of goodwill requires the Company to make subjective judgment to determine the identified CGUs, allocate the goodwill to relevant CGUs and

estimate the recoverable amount of relevant CGUs.

(3) Valuation process

The Company's accounting policies include measuring financial and non-financial assets and liabilities at fair value through profit or loss. The Company's financial instrument valuation group conducts independent verification on all significant fair values (including level 3 fair value), and reports directly to the chief financial officer. The Company also periodically reviews significant unobservable inputs and adjustments. If third-party information (i.e. through securities brokers or price setting service institutes) for evaluating fair value inputs were used, evidence for supporting inputs from third-party will be assessed in order to make sure the valuation and its fair value categorization is compliant with regulations from IFRSs. Investment property was appraised by external appraiser.

The Company strives to use market observable inputs when measuring assets and liabilities. Different levels of the fair value hierarchy to be used in determining the fair value of financial instruments are as follows:

- a. Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- b. Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- c. Level 3: inputs for the assets or liability that are not based on observable market data. For any transfer within the fair value hierarchy, the impact of the transfer is recognized on the reporting date.

For assumptions used in measuring fair value, please refer to below notes:

- (i) Note 6(2), financial assets.
- (ii) Note 6(9), investment property at fair value.

6. Description of Significant Accounts

(1) Cash and Cash Equivalents

1	De	cember 31, 2023	December 31, 2022
Cash on hand	\$	2,397	15,262
Cash in banks		2,055,809	2,443,355
	<u>\$</u>	2,058,206	2,458,617

Please refer to Note 6(23) for interest rate risk and sensitivity analysis of the financial assets and liabilities.

According to the IFRSs Q&A updated by Securities and Futures Bureau, FSC on January 5, 2024, the Group reclassified the deposits balance in repatriated offshore funds accounts amounting to \$40,124 thousand and \$61,468 thousand as of December 31, 2022 and January 1, 2022, respectively, from other current assets to cash and cash equivalent. In addition, the Group decreased the amount in "decrease in other current assets" under investing activities for the year ended December 31, 2022 by \$21,344 thousand. As time deposits with original maturity date within 1 year, are held for the purpose of meeting short term cash commitments rather than for investment or other purposes, readily convertible to known amounts of cash and subject to an insignificant risk of changes in value, those are recognized as cash and cash equivalents.

(2) Financial assets

a. Financial Assets and Liabilities at Fair Value through Profit or Loss ("FVTPL") – current and non-current

December 31, December 31,

	2023	2022
Financial assets mandatorily measured at	_	
FVTPL:		
Funds	\$ 167,452	163,651
Convertible bonds of embedded derivatives	 <u> </u>	62
	\$ 167,452	163,713

Please refer to Note 6(21) for amounts remeasured at fair value through profit and loss, and Note 6(22) for fair value information.

b Financial assets measured at amortized cost - non-current

	December 31,	December 31,
	2023	2022
Time deposit	<u>\$ - </u>	220,400

The financial assets referred to above had not been provided as collateral.

- (3) Notes, trade and other receivables
 - a. Details as follows:

	De	2023	December 31, 2022	
Notes receivable	\$	46,942	82,493	
Accounts receivable		2,240,994	2,518,463	
Other receivables		448,619	196,900	
Account receivable – related parties		25,422	23,553	
Other receivable – related parties		528	-	
Less: Loss allowance		(19,466)	(42,390)	
	\$	2,743,039	2,779,019	

b. The Company applies the simplified approach to provide for its expected credit losses, i.e. the use of lifetime expected loss provision for all receivables. To measure the expected credit losses, notes, accounts and other receivables have been grouped based on shared credit risk characteristics and the days past due, as well as incorporated forward looking information. The loss allowance provision for notes receivable, accounts receivable and other receivables for the years ended December 31 2023 and 2022 was analyzed as follows:

	December 31, 2023			3	
	ace	Carrying amount of notes, counts and other eceivables	Weighted-ave rage loss rate	Loss allowance for lifetime expected credit losses	
Not past due	\$	2,619,353	0%	-	
Past due less than 60 days		116,086	0%	-	
Past due 61~120 days		13,102	50%	6,551	
Past due 121~180 days		3,496	70%	2,447	
Past due over 181 days		10,468	100%	10,468	
	\$	2,762,505		19,466	

	December 31, 2022			
		Carrying mount of notes,		Loss allowance for
		counts and other eceivables	Weighted-ave rage loss rate	lifetime expected credit losses
Not past due	\$	2,662,212	0%	
Past due less than 60 days		111,206	0%	-
Past due 61~120 days		10,141	50%	5,071
Past due 121~180 days		1,770	70%	1,239
Past due over 181 days	-	36,080	100%	36,080
	<u>\$</u>	2,821,409		42,390

c. The movement of the loss allowance for notes, accounts and other receivables was as follows:

	ended	the year l December 1, 2023	For the year ended December 31, 2022
Balance at beginning of the year	\$	42,390	46,161
Impairment losses recognized (reversal)		(486)	448

Balance at end of the year	<u>\$</u>	19,466	42,390

c. The Company has signed accounts receivable factoring contracts without recourse with financial institutions. As stated in the contract, the Company does not have to bear the risks of uncollectable accounts receivables but the loss incurred due to commercial arguments. Due to the fact that the Company has already transferred almost all the risk and revenues of the above mentioned account receivables without further participation, hence meets the criteria of derecognition of financial assets. After derecognition of accounts receivable, the claim to financial institutes were recorded under other receivables. Factored accounts receivables which were not due as of the report date were as follows:

Net income for the period	<u>\$ 6,823</u>	7,496

- f. The Group is regulated by the agreement for the listing of affiliated companies for the years ended December 31, 2023 and 2022. The ordinary shares held shall not be transferred within one year after the affiliated companies go listing. Within two years after the lock-up period ends, the shares transferred shall not exceed 25% of the total shares held.
- g. The investments accounted for using equity method were not pledged as collaterals as of December 31, 2023, and 2022.
- (6) Acquisition of Subsidiaries and Non-controlling interests
 - a. Acquisition of Genesis Group

The board of directors had resulted in acquisition of Genesis Technology USA, Inc. and Genesis Holding Company (together referred to as the "Genesis Group"), an American group consist of companies in electromagnetic shielding, high-frequency connectors and high-speed connecting cables, in order to enhance business strategies in Internet communications, cloud services and industrial controls on December 17, 2020. The transfer of shares was completed on April 14, 2021.

According to the transaction considerations and contingent payments agreed in the acquisition contract, the amounts not paid by the Group were \$25,365 thousand and \$61,857 thousand as of December 31, 2023 and 2022, which were recognized under "other payables" and "other non-current liabilities."

b. Acquisition of subsidiary - JASON TECHNOLOGY LIMITED.

In order to expand sales developments in automobile industry, the Company acquired 100% of ordinary shares of JASON TECHNOLOGY LIMITED. (hereinafter refer to as Jason Company) on July 1, 2021.

According to the acquisition contract, the amount that the Group shall pay to the original share holder of JASON TECHNOLOGY LIMITED. for the percentage of achieving sales amount do not exceed US\$20 thousand, and shall be paid by installments in three years. The Group has paid \$1,857 (about US\$66 thousand), and the residual contingent considerations are recognized under "other non-current liabilities."

c. Acquisition of subsidiary - ACES Surface Treatment Co., Ltd.

In consideration of the extending demands of product processing and attaining the effectiveness from vertical integration of production, the Group acquired 100% of Yunchengyou Precision Technology Co., Ltd. (hereinafter "Yunchengyou Company")'s shares by consideration of \$7,000 thousand on May 5, Yunchengyou Company is primarily engaged in manufacture and sales of mold.

According to the acquisition contract, part of the consideration of \$6,000 thousand has been paid. After deducting the cash obtained, the amount paid is \$5,834 thousand, and the residual payment of \$1,000 thousand is expected to be paid one year after the settlement date, which is recognized under "other current liabilities." Yunchengyou Company has completed the change of registration on May 30, 2023, and renamed as ACES Surface Treatment Co., Ltd.

d. Loss of control over subsidiaries

- (i) The liquidation of the subsidiaries of the Group, ACES (HONG KONG) ELECTRONIC CO., LTD, GLOBAL ACUMEN LIMITED, GENESIS INTERCONNECT CO., LTD., and SHENZHEN JINO ELECTRONIC CO., LTD. have been resolved by the board of directors in 2023, and the relevant procedures have been completed in 2023. As of December 31, 2023, the Group has recovered distribution of liquidated remaining properties of \$18,909 thousand, and recognized losses on disposals of investments of \$22,527 thousand, which were presented in "other gains and losses."
- (ii) The Company sold the subsidiary, GENESIS GUIZHOU TECHNOLOGY CO., LTD., to non-related parties on November 3, 2023. The Group has disposed 100% of the shares and lost control over the subsidiary. The proceeds from the disposal are \$6,416 thousand. The losses on disposals of \$1,613 thousand have included under "other gains and losses" in the consolidated statements of comprehensive income.

e. Changes in ownership of subsidiary equity

(i) MEC IMEX INC.

The Group subscribed 9,999 thousand of shares of MEC IMEX INC. in cash capital increase by cash of \$99,998 thousand in 2022, which increase its shareholding percentage from 99.79% to 99.84%. The resulting changes in equity increase the capital surplus by \$87 thousand.

The Group subscribed 11,991 thousand of shares of MEC IMEX INC. in cash capital increase by cash of \$119,907 thousand in 2023, which increase its shareholding percentage from 99.84% to 99.86%. The resulting changes in equity increase the capital surplus by \$20 thousand.

(ii) COMPUPACK TECHNOLOGY CO., LTD

The Group subscribed 3,000 thousand of shares of COMPUPACK TECHNOLOGY CO., LTD in cash capital increase by cash of \$30,000 thousand in 2022, which increase its shareholding percentage from 92.64% to 93.67%. The resulting changes in equity increase the capital surplus by \$190 thousand.

The Group bought back 1,362 thousand of shares of COMPUPACK TECHNOLOGY CO., LTD from minority shareholders by cash of \$10,000 thousand in 2023, which increase its shareholding percentage from 93.67% to 100%. The resulting changes in equity increase the capital surplus by \$4,840 thousand.

(iii) MICON PRECISE CORP.

The Company bought back 91 thousand of shares of MICON PRECISE CORP. from related parties by cash of \$256 thousand in 2023, which increase its shareholding

percentage from 98.91% to 99.61%. The resulting changes in equity decrease the capital surplus by \$205 thousand.

(7) Property, plant and equipment

January 1, 2022		<u>\$</u>	300,972
December 31, 2022		<u>\$</u>	298,814

b Investment property fair value basis

The investment properties held by the consolidated company are located in the Nangang and Neihu districts of Taipei City. Their fair values are determined based on the results of an independent appraisal by valuation experts, using the discounted cash flow analysis method under the income approach. The main assumptions and relevant explanations are as follows:

(i) The expected future cash inflows from investment properties of the consolidated company include rental income, interest income from deposits, vacancy losses, and disposal value at the end of the period. The rental income is estimated based on local and comparable market rental rates, taking into consideration the estimated annual rental growth rate for the next ten years. The interest income from deposits is estimated based on the average deposit interest rate published by the central bank for the top five banks, ranging from 1.575% for a one-year term. The vacancy losses are calculated based on the vacancy situation of similar properties in the neighboring area. The disposal value at the end of the period is determined by capitalizing the projected operating income for the next year, after deducting normal operating expenses, using a direct capitalization approach.

The future cash outflows include related taxes, insurance premiums, management fees, and repair costs that are directly related to the leases. The changing rates used to estimate future variations in these expenses are based on the current expenditure levels, taking into consideration adjustments to announced land prices and tax rates stipulated by housing tax regulations.

- (ii) The estimation of the discount rate is based on the regulations of the Financial Supervisory Commission, which stipulate that it shall not be lower than the interest rate for a two-year postal time deposit announced by Chunghwa Post Co., Ltd., plus three digits. However, considering the recent real estate market conditions, it is estimated to be 2.345% 2.470%.
- (iii) The decision on capitalizing end-of-period earnings is based on the reasonable capitalization rate of the subject and the future benefits of building improvements, estimated at 0.940% 1.230%.
- (iv) The monthly rent for investment properties in the local area and similar targets ranges from NT\$1,010 to NT\$1,390 per ping.

- (v) The fair value of the Nangang and Neihu properties, as assessed by discounted cash flow analysis, is NT\$54,434 thousand and NT\$250,447 thousand, respectively.
- (vi) The real estate appraisal reports used by the consolidated company are signed and issued by Mr. Tsai Jia-ho, a certified appraiser from Cushman & Wakefield, with appraisal dates of July 4, 2023 and June 29, 2023, respectively.
- c. For details on investment property pledged as collateral, please refer to Note 8.

(10) Intangible assets

December 31, 2023	\$	31,196	22,791	43,897	44,146	142,030
January 1, 2022	\$	28,123	33,108	61,491	33,376	156,098
December 31, 2022	\$	31,201	24,125	56,046	42,924	154,296

As of December 31, 2023 and 2022, none of the Company's intangible assets was pledged as collateral.

(11) Short-term borrowings

a. The Company's short-term borrowing details as follows:

	Dece	December 31, 2022	
Unsecured bank loans	\$	1,225,000	1,166,562
Secured bank loans	<u> </u>	242,000	262,000
	<u>\$</u>	1,467,000	1,428,562
Unused credit lines	\$	3,518,777	3,168,996
Interest rate	1.2	25%~7.18%	0.75%~6.55%

b For details on property pledged as collateral for bank loans, please refer to Note 8.

(12) Long-term borrowings

a. The Company's long-term borrowing details as follows:

	December 31, 2023		December 31, 2022
Unsecured bank loans	\$	521,475	1,724,500
Secured bank loans		1,411,620	54,788
Subtotal		1,933,095	1,779,288
Less: current maturity		(195,740)	(1,119,167)
Total	<u>\$</u>	1,737,355	660,121
Unused credit lines	\$	2,606,000	501,000
Interest rate	1.2	<u>25%~2.44%</u>	0.80%~2.15%

- b. The maturity date for the unsecured bank loans of the Company is from 2023 to 2026; while the maturity date for the secured bank loans is from 2023 to year 2030.
- c. The Company entered into a syndicated loan agreement with group of banks. During the loan term, the Company is required to calculate and maintain certain financial ratios at an agreed level based on the consolidated financial statements audit. For the years ended December 31, 2023 and 2022, there is no incident of the Company violating such financial ratios.
- d. The Company has obtained special low-interest rate loans of \$600,000 thousand from banks according to "Welcome Businesses Returning to Taiwan to Invest Solution" on June 2020. The actual special loan interest rate was 0.85%, and the difference calculated by the fair loan value on market interest rate of 1.35% was regarded as government grants and recorded as deferred income. As of December 31, 2023 and 2022, deferred revenue amounted to \$3,526 thousand and \$6,500 thousand respectively. These amounts were recorded under "other non-current liabilities."
- e For details on property pledged as collateral for bank loans, please refer to Note 8.

(13) Bonds payable

a. The details of unsecured convertible bonds were as follows:

	D	ecember 31, 2023	December 31, 2022
Total convertible corporate bonds issued	\$	600,000	600,000
Unamortized discounted corporate bonds payable		(20,698)	(42,994)
Cumulative converted amount		(1,100)	(1,100)
Corporate bonds issued balance at year-end (recognized	in <u>\$</u>	578,202	555,906
current portion of corporate bonds and bonds payables)			
Embedded derivatives - redemption			
(recognized in financial assets at fair value through prof	it <u>\$</u>		62
or loss)			
Equity component – conversion options (recognized in	\$	71,065	71,065
capital surplus)			
		•	For the year ended
	<u>D</u>	ecember 31, 2023	December 31, 2022
Embedded derivative – redeem options (recognized in			
other gains and losses)	\$	(62)	(1,184)
Interest expenses	\$	22,296	21,459

- b. Major terms and conditions of the second issuance of convertible company bonds in 2021:
 - (i) Issued period: Three years, from November 22, 2021 to November 22, 2024.
 - (ii) Interest rate: 0%
 - (iii) Redemption at the option of the Company: The Company may redeem the bonds under the following conditions:
 - A. The Company may redeem the bonds, in whole or in part, 3 months after the issuance and forty days prior to the maturity date, at the principal amount of the bonds if the closing price of the Company's ordinary shares on the Taiwan Stock Exchange for a period of 30 consecutive trading days, is at least 30% of the conversion price.
 - B. The Company may redeem the bonds, in whole or in part, 3 months after the issuance and forty days prior to the maturity date, at the early redemption conversion price if at least 10% in principal amount of the bonds has already been exchanged, redeemed, purchased or canceled.
 - (iv) Terms of conversion:
 - A. From February 23, 2022 to November 22, 2024, bondholders may convert bonds into common shares of the Company according to terms of conversion.
 - B. Conversion price: The conversion price at the time of issuance was NT\$51.3 per share. The conversion price will be subject to adjustments upon the occurrence of certain events set out in the indenture. This bond does not have reset clause.
 - The Company announced capital increase by issuing new share on December 8, 2021. As of December 16, 2021, the conversion price per share is from \$51.3 New Taiwan dollars to \$50.4 New Taiwan dollars. The Company announced due to the distribution of cash dividends for ordinary shares, the conversion price per share is from \$50.4 New Taiwan dollars to \$48.5 New Taiwan dollars as of August 12, 2022.
 - (v) If the bondholder does not convert the bonds at maturity, the Company has to pay in full in cash for redemption of bonds held at the principal amount of bonds with additional interest for compensation (interest compensation at maturity is 1.5075% of the principal amount).
- c. The bondholders of the Company's convertible bonds redeemed the bonds during the year of 2022 and 22 thousand new shares were issued at par value.

(14) Lease liabilities

	Dece	mber 31, 2023	December 31, 2022
Current	\$	51,258	47,039
Non-current	\$	110,084	75,665

- a. For the maturity analysis, please refer to note 6(22) Financial Instruments.
- b. The amounts recognized in profit and loss were as follows:

	•	For the year ended
	December 31, 2023	December 31, 2022
Interests on lease liabilities	<u>\$ 4,991</u>	4,602
Expenses relating to short-term leases	<u>\$ 11,436</u>	<u>11,749</u>
Expenses relating to low-value leases		
(excluding low-value lease of short-term		
leases)	<u>\$ 5,729</u>	3,045

c. The amounts recognized in the statement of cash flows for the Company were as follows:

	For the year ended		For the year ended
	Decem	ber 31, 2023	December 31, 2022
Total cash outflow for leases	\$	92,401	88,765

d. Lease of land, property and plants

The Company leases land, property and plants for its office and factory with lease terms of usually 2 to 50 years. Some lease contract can be renewed before contract expires and have the option to extend to the same term.

e. Other lease

The Company leases machinery and transport equipment with lease terms of usually 3 to 5 years.

(15) Employee benefits

a. Defined benefit plans

Adjustment of the Company's present value of defined obligation and fair value of plan assets was as follows:

	Dec	ember 31, 2023	December 31, 2022
Present value of defined obligation	\$	70,761	71,058
Fair value of plan assets		(24,957)	(25,692)
Net defined benefit liabilities	<u>\$</u>	45,804	45,366

The Company makes defined benefit plan contributions to the pension fund account with Bank of Taiwan that provides pensions for employees upon retirement. Plans (covered by the Labor Standards Law) entitle a retired employee to receive retirement benefits based on years of service and average monthly salary for the six months prior to retirement.

(i) Composition of plan assets

The Company allocates pension funds in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund, and such funds are managed by the Bureau of Labor Funds, Ministry of Labor. With regard to the utilization of the funds, minimum earnings shall be no less than the earnings attainable from two-year time deposits with interest rates offered by local banks.

As of reporting date, the Company's Bank of Taiwan labor pension reserve account balance amounted to \$29,197 thousand. For information on the utilization of the labor pension fund assets, including the asset allocation and yield of the fund, please refer to the website of the Bureau of Labor Funds, Ministry of Labor.

(ii) Changes on current value of defined obligation

The changes on current value of defined obligation for the years ended December 31, 2023 and 2022 were as follows:

	ber 31, 2023	ended December 31, 2022
Defined benefit obligation on January 1	\$ 71,058	75,946
Current service cost and interest	4,517	3,724
Remeasurements of net defined benefit liabilities	(1,840)	(9,039)
Benefits paid by the plan	(3,156)	-
Exchange differences	 182	427
Defined benefit obligation on December 31	\$ 70,761	71,058

(iii) Changes on fair value of plan assets

The changes on current value of defined benefit asset plan for the years ended December 31, 2023 and 2022 were as follows:

	ber 31, 2023	ended December 31, 2022
Fair value of plan assets on January 1	\$ 25,692	22,997
Interest revenue	456	155
Amount appropriated to plan	1,883	798
Remeasurements of net defined benefit liabilities	82	1,742
Benefits paid by the plan	(3,156)	-
Fair value of plan assets on December 31	\$ 24,957	25,692

(iv) Expenses recognized in profit or loss

The expenses recognized in profit or loss for the Company for the years ended December 31, 2023 and 2022 were as follows:

		year ended per 31, 2023	For the year ended December 31, 2022
Current service cost	\$	1,780	2,027
Net interest of net defined benefit liabilities		2,281	1,542
	\$	4,061	3,569
		year ended per 31, 2023	For the year ended December 31, 2022
Operating costs and expenses	<u>\$</u>	4,061	3,569

(v) Recognized as remeasurements of net defined benefit liabilities under other comprehensive profit and loss.

Recognized accumulatively as remeasurements of net defined benefit liabilities under other comprehensive profit and loss.

	For the year ended		For the year ended	
	Decem	ber 31, 2023	December 31, 2022	
Accumulated balance on January 1	\$	(16,859)	(27,739)	
Current recognition		1,911	10,880	
Accumulated balance on December 31	\$	(14.948)	(16.859)	

(6) Actuarial assumptions

Details of actuarial assumptions used at the end of reporting date as follows:

	December 31, 2023	December 31, 2022
Discount rate	1.625%	1.750%
Increase on future payroll	1%~3%	1%~5.5%

The Company has planned to appropriate in the amount of \$909 thousand for defined benefit plan within 1 year after the reporting date of the year ended December 31, 2023. The weighted average duration for defined benefit plan is 10 to 13 years.

(vii) Sensitivity analysis

Details of the impact to current value of defined benefit obligation by using main actuarial assumption change for the years ended December 31, 2023 and 2022 was as follows:

	Impact to defined benefit obligation		
	Increase by 0.25%	Decrease by 0.25%	
Balance at December 31, 2023			
Discount rate	(802)	828	
Increase on future payroll	799	(777)	
December 31, 2022			
Discount rate	(1,160)	1,202	
Increase on future payroll	983	(960)	

Reasonably possible changes to one of the relevant actuarial assumptions, holding other assumptions remain constant, would have affected the defined benefit obligation by the amounts shown above. In practical, the relevant actuarial assumptions are correlated to each other. The approach used in recognizing the net defined liability in the balance sheets is the same as the one used in developing the sensitivity analysis.

And the relevant actuarial assumptions in the current and previous years.

b. Defined contribution plans

The Company and its domestic subsidiaries allocate 6% of each employee's monthly wages to the labor pension personal account at the Bureau of Labor Insurance, Ministry of Labor (hereinafter referred to as the Bureau of Labor Insurance) in accordance with the provisions of the Labor Pension Act.

The Company's pension costs under the defined contribution method were \$104,397thousand and \$98,103thousand for the years ended December 31, 2023 and 2022, respectively. Payment was made to the Bureau of Labor Insurance.

(16) Income taxes

- a. Income tax expenses
 - (i) The components of income tax expenses in the years 2023 and 2022 were as follows:

		e year ended iber 31, 2023	For the year ended December 31, 2022	
Current tax expense (gain)	\$	(3,864)	106,904	
Deferred income tax expense (gain)		2,360	(15,174)	
Income tax expenses (gain)	<u>\$</u>	(1,504)	91,730	

(ii) Details of the amount of income tax benefits recognized in other comprehensive income for the years ended December 31, 2023 and 2022 was as follows:

	For the year ended December 31, 2023	For the year ended December 31, 2022
Components of other comprehensive income th	at	
will be reclassified to profit or loss:		
Exchange differences on		
translation of foreign		
financial statements	<u>\$ 12,097</u>	(26,020)

(iii) Reconciliation of income tax expenses and profit before tax for 2023 and 2022 were as follows:

	For the year ended		For the year ended	
	Dece	mber 31, 2023	December 31, 2022	
Profit before income tax	\$	(269,692)	315,063	
Income tax using the Company's domestic tax rate	\$	(53,938)	63,013	
The effect of difference in tax rates in foreign territories		(31,270)	(44,502)	
		(9,377)	10,645	
Not deductible expenses		(/ /	· · · · · · · · · · · · · · · · · · ·	
Unrecognized temporary difference – related to investments in subsidiaries		90,154	24,306	
Unrecognized temporary difference – related to tax losses		13,041	-	
Over or underestimation in prior periods		(13,415)	-	
Others		3,301	38,268	
	\$	(1,504)	91,730	

b. Deferred tax assets and liabilities

(i) Unrecognized deferred tax liabilities

As of the years ended December 31, 2023 and 2022, the temporary differences related to investments in subsidiaries and associates was not recognized under deferred tax liabilities because the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not be reversed in the foreseeable future. Relevant amount as follows:

	Ι	December 31,	December 31,
		2023	2022
Aggregate amount of temporary differences	\$	997,990	1,448,762
related to investments in subsidiaries			
Unrecognized amount of deferred tax liabilities	\$	199,598	289,752

(ii) Unrecognized deferred tax assets

Items not recognized as deferred income tax assets by the parent company are as follows:

	Decen	nber 31, 2023	December 31, 2022
Tax loss	\$	655,510	590,306
Unrecognized amount of deferred tax assets	\$	131,102	118.061

Some of the subsidiaries have yet to have steady growth and profit earning capabilities in 2023 and 2022; therefore, the deferred income tax assets were not recognized because it is speculated if the tax losses were recoverable. If the operating revenue is continuing to grow for the next year, the aforementioned tax loss would be recognized.

(iii) Recognized deferred tax assets and liabilities

The changes on deferred income tax assets and liabilities for the years ended December 31, 2023 and 2022 were as follows:

	sı	are of profit or loss of ubsidiaries counted for sing equity method	Unrealized gains or losses from financial assets	Inventory valuation loss	Others	Total

December 31, 2022	\$	286,608	4,088	26,313	317,009

c. Assessment of tax

The Company's tax returns for the years through 2020 were assessed by the tax authority.

(17) Capital and other equity

a. Share capital

As of December 31, 2023 and 2022, the authorized common stock of the Company was \$2,000,0000 thousand in both years, comprising 200,000 thousand shares with a par value of \$10 per share. The issued ordinary shares were 134,418 thousand in both years.

(a) Common stock issuance

The bondholders of the Company's convertible bonds redeemed the bonds during the year of 2022 and 22 thousand new shares were issued at par value. All the capital for issued shares had been received and relevant statutory registration procedures have since been completed and categorized under equity.

(ii) Capital reserve

The balances of capital surplus were as follows:

	D	ecember 31, 2023	December 31, 2022
Additional paid-in capital	\$	756,155	756,155
Consolidation excess		3,831	3,831
Changes in net value of equity investment in		105,197	100,542
affiliated companies accounted for using equity method			
Employee stock options		13,978	13,978
Expired employee stock options		30,378	30,378
Stock option for conversion of convertible bonds		71,065	71,065
Others		12,666	12,666
	\$	993,270	988,615

According to the ROC Company Act, capital surplus can only be used to offset a deficit, and only the realized capital surplus can be used to increase the common stock or be distributed as cash dividends. The aforementioned realized capital surplus includes capital surplus resulting from premium on issuance of capital stock and earnings from donated assets received. According to the Regulations Governing the Offering and Issuance of Securities by Securities Issuers, capital increases by transferring capital surplus in excess of par value should not exceed 10% of the total common stock outstanding.

Please refer to notes 6(6) and 6(13) for details on other changes on capital surplus.

c. Retained earnings

In accordance with the Articles of Incorporation, the current year's after-tax earnings should be used initially to cover any accumulated deficit (including adjustments for undistributed earnings) and set aside 10% of the remaining earnings as legal reserve; however this is not required if total legal reserve equals total paid-in capital. Special legal reserve was set aside according to the Company's operational requirements and rules and regulations of relevant laws. The distribution of the remaining amount, plus unappropriated earnings from prior years, shall be proposed by the Board of Directors and resolved by shareholders in their general meeting.

If dividend is distributed in issued new shares, shall be made in accordance with the provisions of Article 241 of the Company Law. If dividend is distributed in cash, the board of directors shall be attended by two-thirds of the total directors, and resolved by a majority votes at the board of directors, to distribute dividends and bonuses in whole or in part to be paid in cash, and report to the shareholders' meeting.

(i) Legal reserve

When a company incurs no loss, it may, pursuant to a resolution by a shareholders' meeting, distribute its legal reserve by issuing new shares or by distributing cash, and only the portion of legal reserve which exceeds 25% of capital may be distributed.

(ii) Special reserve

In accordance with the guidelines of FSC, a portion of current-period earnings and undistributed prior-period earnings shall be retained as a special reserve. The amount to be retained should be equal to the current-period total reduction of other shareholders' equity. Similarly, a portion of undistributed prior-period earnings shall be reclassified as a special reserve to account for cumulative changes to other shareholders' equity pertaining to prior periods. Amounts of subsequent reversals pertaining to the net reduction of other shareholders' equity shall qualify for additional distributions.

According to the regulations of FSC, the Company reserved special earning surplus from current profit and loss and undistributed earnings from previous period as net debit item of other shareholders' equity. Similarly, a portion of undistributed prior-period earnings shall be reclassified as a special reserve (which does not qualify for earnings distribution) to account for cumulative changes to other shareholders' equity pertaining to prior periods. Amounts of subsequent reversals pertaining to the net reduction of other shareholders' equity shall qualify for additional distributions.

d. Earnings distribution

The amount of cash dividends of appropriations of earnings for the years ended December 31, 2022 and 2021 had been approved in the board meeting held on March 24, 2023 and March 30, 2022, respectively. The proposals of appropriations were resolved on June 27, 2023 and June 29, 2022 by the shareholders' meetings respectively. These earnings were appropriated as follows:

	For the year ended December 31, 2022			For the year ended December 31, 2021		
		Dividend (dollar)	Amount	Dividend (dollar)	Amount	
Dividends distributed to ordinary shareholders:

(20) Remunerations to employees and directors

In accordance with the Articles of Incorporation, if there's any profit of the year, no less than 1% shall be appropriated to employees remuneration and no more than 3% to directors remuneration. However, if the Company has accumulated deficits, this profit shall be reserved for covering losses. The aforementioned employees remuneration must be controlled with conditions set forth by the Board of Directors or its proxy, or employees of subsidiaries.

The aforementioned employees compensation shall be distributed in the form of shares or cash. Those who received shares by the resolution of the board of directors can resolve in new share or purchase own shares. Compensation for the board of directors can only be distributed in the form of cash.

The employee compensation and directors' remuneration were estimated as the income before tax, excluding the amount of employee compensation and directors' remuneration, multiplied by the percentage of remuneration to employees and directors as specified in the Company's articles. These remunerations were expensed under operating costs or operating expenses. If there is a difference between estimation and actual appropriated amounts, changes in accounting estimates shall be applied. Such effect on changes shall be recognized in profit and loss in the next year. As the Group incurred loss in the year ended December 31, 2023, the amounts were not estimated.

	For the year ended December 31, 2023	For the year ended December 31, 2022

The amount, as stated in the consolidated financial statements, are identical to those of the actual distributions for 2023 and 2022. Relevant information can be referred to on the "Market Observation Post System".

(21) Non-operating income and expenses

a. Other revenue

	For the year ended	I For the year ended
	December 31, 2023	December 31, 2022
Lease income	\$ 9,078	6,932
Mold income	53,890	68,100
Others	61,966	66,119
	\$ 124,934	141,151
b. Other gains and losses		
	For the year ended December 31, 2023	
Foreign exchange gains (losses)	\$ 31,62	7 227,551
Losses on disposals of property, plant and equipment	(9,007	7) (15,899)
Gains on fair value adjustment – investment properties Gains (losses) on financial assets at fair value through	6,06	7 (2,158)
profit or loss	27,63	5 (32,741)
Gains (losses) on disposals of investments	(24,140	-
Impairment losses	-	(2,802)
Others	(26,436	
	\$ 5.74	6 164,921

The Company can longer obtain market price from periodical financial tools SPECTRA SPC POWERFUND. According to Article 13 'Fair value measurement' of IFRS on assessment of relevant information credibility and limitations, it is therefore moved from Level 1 to Level 3. The Company measured loss on fair value of the aforementioned asset recognized under "other gains and losses." Please refer to Note 6(22) for details.

The dissolution and liquidation of the subsidiaries of the Group, ACES (HONG KONG) ELECTRONIC CO., LTD, GLOBAL ACUMEN LIMITED, GENESIS INTERCONNECT CO., LTD., and SHENZHEN JINO ELECTRONIC CO., LTD. have been resolved by the board of directors in 2023, and the relevant procedures have been completed in 2023. As of December 31, 2023, the Group has recovered distribution of liquidated remaining properties of \$18,909 thousand, and recognized losses on disposals of investments of \$22,527 thousand, which were presented in "other gains and losses."

The Company sold the subsidiary, GENESIS GUIZHOU TECHNOLOGY CO., LTD., to non-related parties in 2023. The proceeds from the disposal are \$2,248 thousand. The losses on disposals of \$1,613 thousand have been recognized under "other gains and losses." Please refer to Note 6(6).

c. Finance costs

	e year ended ber 31, 2023	December 31, 2022		
Bank loan interest	\$ 81,438	59,008

Convertible company bond interest	 22,296	21,459		
	\$ 108,725	85,069		

(23) Financial instruments

- a. Credit risk
 - (i) Maximum credit risk exposure

The carrying amount of financial assets represents the maximum amount exposed to credit risk.

- (ii) Concentration to credit risk
- The Company has a vast group of customer without obvious concentration on single customer and the sales locations are spread out all over. Therefore there is no concentration of credit risk on account receivable. In order to reduce credit risk, the Company continues to assess financial status of its customers.
- (iii) For details on credit risks of notes and accounts receivables, please refer to Note 6(3).

b. Liquidity Risk

Below table specifies maturity dates of financial liabilities contracts, including estimated interest, but not including effects on net amount agreements.

	Carrying amount		contractual cash flows	Within 1 vears	2-5 years	Over 5 years
December 31, 2023	_

portion)						
	\$	6,379,602	6,453,727	4,570,009	1,835,657	48,061
December 31, 2022						
Non-derivative financial liabilities						
Short-term borrowings	\$	1,482,562	1,471,442	1,471,442	-	-
Notes payable		518	518	518	-	-
Accounts payable		1,623,419	1,623,419	1,623,419	-	-
Account payable - related parties		327	327	327	-	-
Other payables		1,012,818	1,012,818	1,012,818	-	-
Other payable - including related parties		2,823	2,823	2,823	-	-
Lease liabilities		122,704	148,978	50,341	53,275	45,362
Bonds payable (including current portion)		555,906	600,000	-	600,000	-
Long-term borrowings (including current		1,779,288	1,822,772	1,146,413	662,826	13,533
portion)						
	\$	6,580,365	6,683,097	5,308,101	1,316,101	58,895

The Company does not expect the cash flows included in the maturity analysis to occur significantly earlier or at significantly different amounts.

c. Currency risk

(i) Currency risk

The Company's significant exposure to foreign currency risk was as follows:

				Expressed in tilousalius of dollars			
	Dec	ember 31, 20	23	December 31, 2022			
		Exchange		Exchange			
	Foreign currency	rate (dollar)	NTD	Foreign currency	rate (dollar)	NTD	
Financial assets		- "-	_				
Monetary items							
USD	\$ 113,335	30.705	3,479,948	111,539	30.710	3,425,363	
<u>Financial</u>							
<u>liabilities</u>							
Monetary items							
USD	64,039	30.705	1,966,316	55,474	30.710	1,703,593	

Expressed in thousands of dollars

(ii) Sensitivity analysis

The foreign currency risk mainly arose from the translation of cash and cash equivalents, accounts receivable, other receivables, accounts payable, and other payables.

In 2023, if the exchange rate had changed, given no changes in other factors, when NTD is depreciated or appreciated against USD by 5%, profit after tax would have increased or decreased by \$75,682thousand and \$86,089thousand for the years ended December 31, 2023 and 2022, respectively. The method of analysis remains the same for both periods.

(iii) Foreign exchange gains and losses on monetary items

The Company's information on foreign exchange gain (loss) on monetary items is disclosed by total amount. For years ended December 31, 2023 and 2022, foreign exchange gains (loss) (including realized and unrealized portions) amounted to \$31,627 thousands and \$227,551 thousands, respectively.

d Interest rate analysis

The Company's exposure to interest rate risk arising from financial assets and liabilities is described in the liquidity risk part of this note.

The following sensitivity analysis is determined through the exposure to interest rate risk of derivative and non-derivative instruments on the reporting date. For floating rate liabilities, the analysis assumes that the balances of outstanding liabilities on the reporting date have been outstanding for the whole period, and their rational change intervals are being estimated. If the interest rate increases/decreases by 1%, representing the reasonable interest rates changes made by management.

If the interest rate increased or decreased by 1%, given no changes in other factors, the profit before tax will decrease or increase by \$34,001thousand and \$32,079thousand for the years ended December 31, 2023 and 2022 respectively. This is mainly because of the Company's floating rate loans.

v. Fair value

(i) Fair value hierarchy

The fair value of financial assets and liabilities at fair value through profit or loss are measured on a recurring basis. The carrying amount and fair value of the Company's financial assets and liabilities, including the information on fair value hierarchy are stated below:

	December 31, 2023							
			Fair value					
Financial assets at fair value through		arrying mount	Level 1	Level 2	Level 3	Total		
profit or loss Non-derivative financial assets mandatory measured at FVTPL	<u>\$</u>	167,452	-	-	167,452	167,452		
	December 31, 2022							
	_			Fair v	alue			
		arrying mount	Level 1	Level 2	Level 3	Total		
Financial assets at fair value through profit or loss								
Non-derivative financial assets mandatory measured at FVTPL	\$	163,651	-	-	163,651	163,651		
Convertible bonds of embedded		62		62		62		
derivatives								
Total	\$	163,713	-	62	163,651	163,713		

(ii) Valuation techniques of financial instruments not measured at fair value

A. Non-derivative financial instruments

Financial instruments traded in active market are based on quoted market prices. The quoted price of a financial instrument obtained from main exchanges and on-the-run bonds from Taipei Exchange can be used as a basis to determine the fair value of the listed companies equity instrument and debt instrument of the quoted price in an active market.

If a quoted price of a financial instrument can be obtained readily and regularly from exchanges, brokers, underwriters, industrial union, pricing institute, or authorities, and such price can reflect those actual trading and regularly occurring in the market. Then the financial instrument is considered to have a quoted price in an active market. If a financial instrument is not in accord with the definition mentioned above, then it is considered to be without a quoted price in an active market. In general, market with low trading volume or high bid-ask spreads is an indication of a nonactive market.

If the financial instrument held by the Company is of an active market, the fair value of it is determined in accordance with market price. If its of a nonactive market, the fair value is measured by net assets.

B. Derivative financial instruments

Measurement of the fair value of derivative instruments is based on the valuation techniques generally accepted by market participants such as the discounted cash flow or option pricing models (Black-Scholes Model).

(iii) Changes on Level 3 table

	mandatory measured at FVTPL
January 1, 2022	\$ <u>-</u>
Recategorized from Level 1	46,683
Total loss (recognized on profit and loss)	 (46,683)
December 31, 2022	\$ <u> </u>

Non-derivative financial assets

The Company can longer obtain market price from periodical financial tools. According to Article 13 'Fair value measurement' of IFRS on assessment of relevant information credibility and limitations, it is therefore moved from Level 1 to Level 3. The above loss was recorded under 'other gain and loss'.

(iv) Quantified information on significant unobservable inputs (Level 3) used in fair value measurement

The Company's financial instruments that use Level 3 inputs to measure fair value include financial assets and liabilities measured at fair value through profit and loss.

Most of the Company's fair value were classified as Level 3 with only one significant unobservable input. Only liabilities instruments of nonactive market has more than one significant unobservable inputs. The significant unobservable inputs of financial instrument investments without an active market are individually independent, and there is no correlation between them.

Quantified information of significant unobservable inputs was as follow:

Item	Valuation technique	Significant unobservable inputs	significant unobservable inputs and fair value measurement
Financial assets at fair value through profit and loss - non-current	Net asset valuation method	Net asset valuation	Not applicable
Financial assets at fair value through profit and loss - current	Net asset valuation method	Illiquidity and market discount and credit risk adjustment (including risk of breach of contract) were 100%.	 The higher the market illiquidity discount is, the lower the fair value. The higher the credit risk is, the lower the fair value.

(23) Financial risk information

a. Overview

The Company have exposures to the following risks from its financial instruments:

- i. Credit risk
- ii. Liquidity Risk
- iii. Market risk

The following likewise discusses the Company's objectives, policies and processes for measuring and managing the above mentioned risks. For more disclosures about the quantitative effects of these risks exposures, please refer to the respective notes in the accompanying parent company only financial statements.

b. Structure of risk management

Detailed financial information on the Company's significant financial instruments were disclosed under notes of each listing. However, the Company is still exposed to financial risks posed by aforementioned financial instruments. Such risks include market risks (including exchange rate risks, interest rate risks and other pricing risks) credit risk and liquidity risk.

The Company has stipulated risk management policies or risk management procedure in writing which were in resolution with the board of directors in order to identify, measure, monitor and control credit risks, market risks and liquidity risks. Risk management of the Company is executed by the finance department in accordance with risk management polices approved by the board of directors. Risk management department works closely with other departments to identify, evaluate and avoid any kind of financial risks. The board of directors has stipulated written policies for risk management. Such policies included certain risk exposures such as exchange rate risks, interest rate risks, credit risks, derivatives and non-derivatives financial instrument risks and etc. Moreover, the internal audit department is also responsible for risk management and control of environment for independent audit.

c. Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investment of marketable securities.

(i) Accounts receivable and other receivables

The Company has established a credit policy under which each new customer is analyzed individually for creditworthiness before the Company's standard payment and delivery terms and conditions are offered, thus set up individual credit limit in order to control credit risk.

(ii) Financial investments

The credit risk exposure in the bank deposits, fix income investments and other financial instruments are measured and monitored by the Company's finance department. As the Company deals with the banks and other external parties with good credit standing and financial institutions, corporate organization and government agencies which are graded above investment level, the management believes that the Company does not have any compliance issues, and therefore, there is no significant credit risk.

(iii) Guarantee

The Company only provide guarantee to parties listed under procedures for guarantee and endorsement. The Company did not provide guarantee to any third party not listed by the Company's policy as of December 31, 2023 and 2022.

d. Liquidity Risk

The Company is supporting the operation and reducing effects caused by cash flow fluctuations by manage and maintain sufficient cash and cash equivalents. The management of the Company monitors financing credit limits from banks and makes sure contracts were adhered to.

Bank borrowing is an important source of liquidity for the Company. As of December 31, 2023 and 2022, the Company's unused credit lines were amounted to \$6,124,777 and \$3,669,996, respectively.

e. Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates, and equity prices, will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

(ii) Currency risk

The Company is exposed to currency risk on sales and purchases that are denominated in a currency other than the respective functional currencies of the Company. The Group's functional currency is NTD, as well as USD and RMB. These transactions were in NTD, USD and RMB.

(iii) Interest rate risk

The Company borrows with both floating interest rate and fixed interest rate, thus change risk and cash flow risk were incurred for fair value. The Company can manage its interest risk through maintaining an appropriate portfolio of floating interest rate and fixed interest rate.

(iv) Other market price risk

The Company is exposed to equity price risk due to the investment in equity securities. This is a strategic investment and is not held for trading. The Company does not actively trade in these investments as the management of the Company minimizes the risk by holding different investment portfolios.

(24) Capital management

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence, and to sustain the future development of the business. The capital includes common stock, capital surplus, retained earnings and other equities. The board of directors are in control of ordinary shares' dividend value.

The Company use the debt-to-equity ratio to manage capital. This ratio is the total net debt divided by the total capital. The net debt from the balance sheet is derived from the total liabilities less cash and cash equivalents. The total capital is the total components of equity (i.e. share capital, capital surplus, retained earnings and other equities).

Debt-to-equity ratio for the years ended December 31, 2023 and 2022 as follows:

	Dece	December 31, 2022		
Total liabilities	\$	6,994,385	7,185,022	
Less: cash and cash equivalents		(2,058,206)	(2,458,617)	
Net liabilities		4,936,179	4,726,405	
Total equity	<u>\$</u>	5,256,504	<u>5,655,354</u>	
Debt-to-equity ratio		93.91%	83.57%	

(25) Investing and financing activities not affecting the current cash flow

Details of investing and financing activities not affecting the current cash flow of the Company for the years ended December 31, 2023 and 2022 were as follows:

a. Conversion of convertible bonds to ordinary shares, please refer to Note 6(17) for details.

Non-Cash changes

- Note 3: As the Company obtained the operation headquarters recognition document issued by the Industrial Bureau of the Ministry of Economic Affairs in June, 2023, it is not subject to the quota restrictions of the "Principles for Reviewing Investment or Technical Cooperation in Mainland China" by the Ministry of Economic Affairs.
- Note 4: As the Company obtained the operation headquarters recognition document issued by the Industrial Bureau of the Ministry of Economic Affairs in December, 2020, it is not subject to the quota restrictions of the "Principles for Reviewing Investment or Technical Cooperation in Mainland China" by the Ministry of Economic Affairs.

c. Significant transactions:

The significant inter-company transactions with the subsidiaries in Mainland China (which are eliminated when preparing the consolidated financial statements) for the year ended December 31, 2023 are disclosed in "Information on significant transactions".

(4) Major shareholders:

Unit: Shares

Shareholding Shareholder's Name	Shares	Percentage
Yuan Wan-Ting	8,863,487	6.59%

Note: (1)The information on major shareholders, which is provided by the Taiwan Depository & Clearing Corporation, summarized the shareholders who held over 5% of the total nonphysical common stocks and preferred stocks (including treasury stocks) on the last business date of each quarter. The registered nonphysical stocks

- may be different from the capital stocks disclosed in the financial statement due to different calculations basis.
- (2) If the aforementioned data contained shares which were kept in trust by the shareholders, the data disclosed will be deemed as the settlor's separate account for the fund set by the trustee. As for the shareholder who reports its share equity as an insider and whose shareholding ratio is greater than 10% in accordance with Securities and Exchange Act and include its self-owned shares and trusted shares, as well as the shares of the individuals who have power to decide how to allocate the trust assets. For the information on reported share equity of the insider, please refer to the Market Observation Post System.

14. Segment information:

(1) General Information

The Company has 4 reporting segments: connector, connector sets, metal stamping

segment and other segment. The connector segment is mainly engaging in processing, manufacturing and selling of connectors. The connector sets segment is mainly engaging in manufacturing and sales of consumer electronics, communication peripherals and industrial connectors sets. The metal stamping segment is mainly engaging in processing, manufacturing and selling of connectors. Other segment is mainly engaging in investment, sales, handling and packaging business of communication cable sets.

Each segment is responsible for its own strategic business unit in order to provide different products and services. Separate management is required because each strategic business required different techniques and marketing strategies.

(2)Information on Profit and Loss, Departmental Assets, Departmental Liabilities, and the Basis of Measurement and Adjustment for Reporting Segments

The consolidated company allocates unrecognized income tax expenses or non-recurring gains and losses to the reporting segments. In addition, not all gains and losses of reporting segments include significant non-cash items other than depreciation and amortization. The reported amounts are consistent with the reports used by operating decision-makers.

The accounting policies of the operating segments of the consolidated company are the same as those summarized in the significant accounting policies. The operating segment profit and loss of the consolidated company is measured based on operating profit before tax and serves as the basis for performance evaluation.

The information and adjustments for the operating segments of the consolidated company are as follows:

		For the year ended December 31, 2023

(5) A parent company only financial statement for the most recent fiscal year, certified by a CPA **Independent Auditors' Report**

To the Board of Directors of ACES Electronics Co., Ltd.:

Opinion

We have audited the parent company only financial statements of ACES Electronics Co., Ltd., which comprise the balance sheets as of December 31, 2023 and 2022, the statements of comprehensive income, statements of changes in equity, and statements of cash flows for the years ended December 31, 2023 and 2022, and notes to the parent company only financial statements including a summary of significant accounting policies.

In our opinion, the accompanying parent company only financial statements present fairly, in all material respects, the financial position of ACES Electronics Co., Ltd. as of December 31, 2023 and 2022, and its financial performance and its cash flows for each of the years then ended, in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of ACES Electronics Co., Ltd. in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

Description of key audit matter

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the parent company only financial statements of the current period. These matters were addressed in the context of our audit of the parent company only financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

1. Revenue Recognition

Please refer to Notes 4(13) to the parent only financial statements for the accounting policy on operating revenue; and refer to Notes 6(18) for disclosures relating to revenue.

Description of key audit matter:

ACES Electronics Co., Ltd. is mainly engaging in processing, manufacturing and selling of connectors. Sales revenue is one of the key audit matters to the financial statements. Therefore, the assessment for recognition of sales revenue is one of the key evaluation matter when we audit the Company's financial statements.

How the matter was addressed in our audit:

In relation to the key audit matter above, our principal audit procedures included:

- We inspected whether the Company's revenue recognition policies are in accordance with relevant guidelines.
- We tested the design of internal control process and its efficiency of execution for sales revenue.
- We focused on the top 10 clients, compared differences in numbers on the same period of the previous year, and checked if there's any significant abnormality.
- We selected sales transaction samples from a certain period before and after the end of current year, and examined revenue transaction records with vouchers arising from appropriate time period.
- We assessed if there is any significant sales return and discount after the balance sheet date.

2. Valuation of inventory

Please refer to Notes 4(7) to the parent only financial statements for the accounting policy on inventory valuation, Notes 5(1) for accounting estimates and assumptions of inventory, and Notes 6(4) for disclosure disclosures relating to inventory.

Description of key audit matter:

Inventory is valued at the lower of cost or net realizable value ACES Electronics Co., Ltd. mainly produces electronic products such as high precision connectors which are affected by the fast change of technology and updates of manufacturing technique; its product sales might have tremendous fluctuation which may cause the cost of inventory to be higher than its net realizable value. Therefore, the assessment for inventory valuation is one of the key evaluation matter when we audit the Company's financial statements.

How the matter was addressed in our audit:

- In relation to the key audit matter above, our principal audit procedures included:
- We assessed the inventory aging report, and analyzed changes in the inventory aging report from the previous to current year.
- We tested samples provided by the Company on inventory valued at the lower of cost and net realizable value.
- We understand the selling prices adopted by the management of the Company, and use it to assess the reasonableness of inventory net realizable value.
- We assessed if the inventory valuation is recorded according to the accounting policies of the Company.

Responsibilities of Management and Those Charged with Governance for the Parent Only Financial Statements

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and for such internal control as management determines is necessary to enable the preparation of parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent only financial statements, management is responsible for assessing ACES Electronics Co., Ltd.'s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate ACES Electronics Co., Ltd. or to cease operations, or has no realistic alternative but to do so.

Those charged with governance (inclusive of the Audit Committee) from ACES Electronics Co., Ltd are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Parent Only Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent only financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and professional skepticism throughout the audit. We also:

- 1.Identified and assessed the risks of material misstatement of the parent only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2.Obtained an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ACES Electronics Co., Ltd.'s internal control.
- 3.Evaluated the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Concluded on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on ACES Electronics Co., Ltd.'s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the parent only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the ACES Electronics Co., Ltd. to cease to continue as a going concern.
- 5.Evaluated the overall presentation, structure and content of the parent company only financial statements, including the disclosures, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6.Obtained sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision and performance of ACES Electronics Co., Ltd.'s audit. We remain solely responsible for our audit opinion.

We communicated with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identified during our audit.

We also provided those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicated with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determined those matters that were of most significance in the audit of the parent company only financial statements for the year ended December 31, 2023 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Lin, Heng-Shen and Chen, Zheng-Xue.

KPMG

Taipei, Taiwan (Republic of China) March 12, 2024

Notes to Readers

The accompanying parent company only financial statements are intended only to present the financial position, financial performance, and cash flows in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers. The standards, procedures, and practices to audit such parent company only financial statements are those generally accepted and applied in the Republic of China.

(Expressed in thousands of New Taiwan dollars, unless otherwise indicated)

1. Organization

ACES Electronics Co., Ltd. ("the Company") was established on November 7, 1996 with the approval of the Ministry of Economic Affairs. Its registered office is located at 13 Dong-Yuan Road, Chung-Li District, Taoyuan City, the Republic of China ("ROC"). The Company is mainly engaging in processing, manufacturing and selling of connectors. Shares of the Company are traded in TWSE since March 26, 2009.

2. The Authorization of Financial Statements

These parent company only financial statements were approved and authorized for issue by the Board of Directors on March 12, 2024.

3. Application of New and Revised Standards, Amendments and Interpretations

(1) Impact of adoption of new, revised or amended standards and interpretations endorsed by the Financial Supervisory Commission, ROC.

The Company has adopted the amendments to the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations with effective date from January 1, 2023. The adoption does not have a material impact on the Company's parent company only financial statements.

- ·Amendments to IAS 1 "Disclosure of Accounting Policies"
- ·Amendments to IAS 8 "Definition of Accounting Estimates"
- · Amendments to IAS 12 "Deferred Tax related to Assets and Liabilities arising from a Single Transaction"

The Company has adopted the amendments to the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations with effective date from May 23, 2023. The adoption does not have a material impact on the Company's parent company only financial statements.

- · Amendments to IAS 12 "International Tax Reform Pillar Two Model Rules"
- (2) Impact of the IFRSs that have been endorsed by the FSC but not yet in effect

The Company assessed that the adoption of the following amendments, effective for annual period beginning on January 1, 2024, would not have a material impact on its parent company only financial statements.

- · Amendments to IAS 1 "Classification of Liabilities as Current or Non-current"
- · Amendments to IAS 1 "Non-current Liabilities with Covenants
- · Amendments to IAS 7 and IFRS 7 "Supplier Finance Arrangements"
- · Amendments to IFRS 16 "Lease Liability in Sale and Leaseback"(3) The IFRSs issued by International Accounting Standards Board ("IASB") but not yet endorsed by the FSC

The Company assesses that the adoption of the following new or amended standards, not yet endorsed by the FSC, would not have a significant impact on its financial statements.

- · Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture"
- · IFRS 17 "Insurance Contracts" and amendments to IFRS 17 "Insurance Contracts"
- · Amendments to IAS 21 "Lack of Exchangeability"

Notes to the Parent Company Only Financial Statements

4. Summary of Significant Accounting Policies

The significant accounting policies applied in the preparation of these parent company only financial statements are set out as below. Unless otherwise stated, the significant accounting policies have been applied consistently to all periods presented in these parent company only financial statements.

(1) Statement of compliance

The parent company only financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers (hereinafter referred to as "the Regulations").

(2) Basis of preparation

a. Basis of measurement

The parent company only financial statements have been prepared on the historical cost basis except for the following material items in the balance sheets:

- (i) Financial assets at fair value through profit or loss;
- (ii) Defined benefit liability is recognized as the fair value of the plan assets less the present value of the defined benefit obligation.

b. Functional and presentation currency

The functional currency of the Company is determined based on the primary economic environment in which the entity operates. The parent company only financial statements are presented in New Taiwan Dollar ("NTD"), which is also the Company's functional currency. All financial information presented in NTD has been rounded to the nearest thousand.

(3) Foreign currency

a. Foreign currency transactions

Transactions in foreign currencies are translated into the respective functional currencies of the Company entities at the exchange rates at the dates of the transactions. At the end of each subsequent reporting period (hereinafter refer to as 'end of reporting period'), monetary items denominated in foreign currencies are translated into the functional currencies using the exchange rate at the date. Non-monetary items denominated in foreign currencies that are measured at fair value are translated into the functional currencies using the exchange rate at the date that the fair value was determined. Non-monetary items denominated in foreign currencies that are measured based on historical cost are translated using the exchange rate at the date of the transaction.

Exchange differences are generally recognized in profit or loss.

b. Foreign operations

The assets and liabilities of foreign operations, including good will and fair value adjustments arising on acquisition, are translated into the presentation currency at the exchange rates at the reporting date. The income and expense of foreign operations are translated into the presentation currency at the average exchange rate. Exchange differences are recognized in other comprehensive income.

When a foreign operation is disposed of such control, significant influence, or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. When Company disposes only part of it's investment in an associate or joint venture that includes a foreign operation while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to profit or loss.

When the settlement of a monetary receivable from, or payable to, a foreign operation is

Notes to the Parent Company Only Financial Statements

neither planned nor likely to occur in the foreseeable future, the exchange differences arising from such a monetary item that are considered to form part of the net investment in the foreign operation are recognized in other comprehensive income.

(4) Classification of current and non-current assets and liabilities

An asset is classified as current when:

- a. The asset expected to realize, or intends to sell or consume, in its normal operating cycle;
- b. The asset primarily held for the purpose of trading;
- c. The asset expected to realize within twelve months after the reporting date; or
- d. The asset is cash and cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current when:

- a. The liability is expected to be settled within the Company's normal operating cycle;
- b. The liability is held primarily for the purpose of trading.
- c. The liability is due to be settled within twelve months after the reporting date; or
- d. The Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments, do not affect its classification.

(5) Cash and cash equivalents

Cash and cash equivalents comprise cash balances and demand deposits. Cash equivalents comprise short-term highly liquid investments that are readily convertible into known amount of cash and are subject to an insignificant risk of changes in their fair value. Time deposits with short-term maturity but not for investments and other purposes and are qualified with the aforementioned criteria are classified as cash equivalent.

(6) Financial instruments

Account receivables initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value, plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issuance. A trade receivable without a significant financing component is initially measured at the transaction price.

a. Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade basis.

On initial recognition, a financial asset is classified as measured at amortized cost, fair value through other comprehensive income (FVOCI) – debt investment, FVCI – equity investment, or FVTL. Financial assets are not reclassified subsequent to their initial

Notes to the Parent Company Only Financial Statements

recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the changes in the business model.

(i) Financial assets measured at amortized cost

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

These assets are subsequently measured at amortized cost, which is the amount at which the financial asset is measured at initial recognition, plus/minus, the cumulative amortization using the effective interest method, adjusted for any loss allowance. Interest income, foreign exchange gains and losses, as well as impairment, are recognized in profit or loss. Any gain or loss on de-recognition is recognized in profit or loss.

(ii) Financial assets at fair value through profit or loss

All financial assets not classified as at amortized cost or at fair value through other comprehensive income as described above are measured at fair value through profit or loss. This includes all derivative financial assets. The Company has the intention to sell account receivable at fair price through profit and loss immediately or recently; these amounts are recorded under account receivables currently. On initial recognition, the Company may irrevocably designate a financial asset, which meets the requirements to be measured at amortized cost or at fair value through other comprehensive income, as at fair value through profit and loss if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit and loss.

(iii) Business model assessment

The Company makes an assessment of the objective of the business model in which a financial asset is held at portfolio level, because this best reflects the way the business is managed, and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;
- · how the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way in which those risks are managed;
- · how managers of the business are compensated, for example, whether the

Notes to the Parent Company Only Financial Statements

compensation is based on the fair value of the assets managed or on the contractual cash flows collected; and

• the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sale activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, and are consistent with the Company's continuing recognition of the assets.

(iv) Assessment on whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial assets on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

(v) Impairment of financial assets

The Company recognizes loss allowances for expected credit losses (ECL) on financial assets measured at amortized cost (including cash and cash equivalents, notes and trade receivables, other receivables and refundable deposit) and contract assets.

The Company measures loss allowances at an amount equal to lifetime ECL, except for the following which are measured as 12-month ECL:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowance for trade receivables and contract assets are always measured at an amount equal to lifetime ECL.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Company's historical experience and informed credit assessment as well as forward-looking information.

The maximum period considered when estimating ECL is the maximum contractual period over which the Company is exposed to credit risk.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 60 days past due.

The Company considers a financial asset to be in default when the financial asset is more than 180 days past due or the debtor is unlikely to pay its credit obligations to the Company in full.

Notes to the Parent Company Only Financial Statements

The Company considers a time deposit to have low credit risk when only deal with financial institutions with good credit rating.

Lifetime ECL are the ECL that result from all possible default events over the expected life of a financial instrument.

12-month ECL are the portion of ECL that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

ECL are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive). ECL is according to financial assets' effective discount rate.

At each reporting date, the Company assesses whether financial assets carried at amortized cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being more than 180 days past due;
- the lender of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender would not otherwise consider;
- it is probable that the borrower will enter bankruptcy or other financial reorganization; or
- the disappearance of an active market for a security because of financial difficulties.

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For corporate customers, the Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

(vi) Derecognition of financial assets

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers the assets recognized in its statement of balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognized.

Notes to the Parent Company Only Financial Statements

b. Financial liabilities and equity instruments

(i) Classification of debt or equity

Debt and equity instruments issued by the Company are classified as financial liabilities or equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

(ii) Equity instrument

An equity instrument is any contract that evidences residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued are recognized as the amount of consideration received, less the direct cost of issuing.

(iii) Compound financial instruments

Compound financial instruments issued by the Company comprise convertible bonds denominated in NTD that can be converted to common stocks at the option of the holder, when the number of shares to be issued is fixed and does not vary with changes in fair value.

The liability component of compound financial instruments is initially recognized at the fair value of a similar liability that does not have an equity conversion option. The equity component is initially recognized at the difference between the fair value of the compound financial instrument as a whole and the fair value of the liability component. Any directly attributable transaction costs are allocated to the liability and equity components in proportion to their initial carrying amounts.

Subsequent to initial recognition, the liability component of a compound financial instrument is measured at amortized cost using the effective interest method. The equity component of a compound financial instrument is not remeasured.

Interest related to the financial liability is recognized in profit or loss. On conversion at maturity, the financial liability is reclassified to equity and no gain or loss is recognized.

(iv) Financial liabilities

Financial liabilities are classified as measured at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss.

(v) Derecognition of financial liabilities

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.

On derecognition of a financial liability, the difference between the carrying amount of a financial liability extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

(vi) Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset and the net amount presented in the statement of balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

c. Derivative financial instruments

Notes to the Parent Company Only Financial Statements

Derivatives are initially measured at fair value and the transaction cost was recognized in profit or loss. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are generally recognized in profit or loss, and recorded under non-operating revenue or expenses in comprehensive income statements.

(7) Inventories

Inventory is valued at the lower of cost or net realizable value The cost of inventories is calculated using the weighted average method, and includes expenditure incurred in acquiring the inventories, production or conversion costs, and other costs incurred in bringing them to their present location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

(8) Investments in subsidiaries

When preparing the parent company only financial statements, investment in subsidiaries which are controlled by the Company is accounted for using the equity method. Under the equity method, an investment in a subsidiary is initially recognized at cost and adjusted thereafter to recognize the Company's share of profit or loss and other comprehensive income of the subsidiary as well as the distribution received. The Company also recognized its share in the changes in the equity of subsidiaries. In subsidiaries which are controlled by the Company is accounted for preparing the consolidated statement by each period.

Changes in a parent's ownership interest in a subsidiary that do not result in the loss of control are accounted for within equity.

(9) Property, plant and equipment

a. Recognition and measurement

Items of property, plant and equipment are measured at cost, which includes capitalized borrowing costs, less accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognized in profit or loss.

b. Subsequent expenditure

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

c. Depreciation

Depreciation is calculated on the cost of an asset less its residual value and is recognized in profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property, plant and equipment.

Land is not depreciated.

The estimated useful lives of property, plant and equipment for current and comparative periods are as follows:

- (i) Property and plant: $3 \sim 35$ years
- (ii) Machinery and equipment: 5 years
- (iii) Mold equipment: 2 years

Notes to the Parent Company Only Financial Statements

(iv) Other equipment: $3 \sim 5$ years

Depreciation methods, useful lives and residual values are reviewed at each annual reporting date and adjusted if appropriate.

(10) Lease

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

a. As a lessee

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. • In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be reliably determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- (i) fixed payments, including in-substance fixed payments;
- (ii) payments for purchase or termination options that are reasonably certain to be exercised.

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when:

- (i) there is a change in the lease term resulting from a change of its assessment on whether it will exercise an option to purchase the underlying asset, or
- (ii) there is a change of its assessment on whether it will exercise an extension or termination option; or
- (iii) there is any lease modification.

Notes to the Parent Company Only Financial Statements

When the lease liability is remeasured, other than lease modifications, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or in profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

When the lease liability is remeasured to reflect the partial or full termination of the lease for lease modifications that decrease the scope of the lease, the Company accounts for the remeasurement of the lease liability by decreasing the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognize in profit or loss any gain or loss relating to the partial or full termination of the lease.

The Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases and leases of low-value assets, including houses, buildings, and part of transportation equipment. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

b. As a lessor

When the Company acts as a lessor, it determines at lease commencement whether each lease is a finance lease or an operating lease. To classify each lease, the Company makes an overall assessment of whether the lease transfers to the lessee substantially all of the risks and rewards of ownership incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then the lease is an operating lease. As part of this assessment, the Company considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

(11) Intangible assets

a. Recognition and measurement

The goodwill acquired by the Company are measured at cost less accumulated impairment losses. For computer software and other intangible assets acquired by the Company and have finite useful lives are measured at cost less accumulated amortization and any accumulated impairment losses.

b. Subsequent expenditure

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognized in profit or loss as incurred.

c. Amortization

Amortization is calculated over the cost of the asset, less its residual value, and is recognized in profit or loss on a straight-line basis over the estimated useful lives of intangible assets, other than goodwill, from the date that they are available for use.

(i) Software: $1 \sim 2$ years

(ii) Other intangible assets $1 \sim 3$ years

Amortization methods, useful lives and residual values are reviewed at each annual reporting date and adjusted if appropriate.

(12) Impairment of non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than inventories and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash-generating units (CGUs).

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

Notes to the Parent Company Only Financial Statements

An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount.

Impairment losses are recognized in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(13) Revenue Recognition

Revenue is measured based on the consideration to which the Company expects to be entitled in exchange for transferring goods or services to a customer. The Company recognizes revenue when it satisfies a performance obligation by transferring control of a good or a service to a customer.

The Company recognizes revenue when control of the products has transferred, being when the products are delivered to the customer, the customer has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the Company has objective evidence that all criteria for acceptance have been satisfied.

The Company often offers volume discounts to its customers. Revenue from these sales is recognized based on the price specified in the contract, net of estimated volume discount. Accumulated experience is used to estimate the discounts, using the expected value method, and revenue is only recognized to the extent that is highly probable that a significant reversal will not occur. No element of financing is deemed present as the sales of goods are made, with a credit term of 90~150 days, which is consistent with the market practice.

A receivable is recognized when the goods are delivered as this is the point in time that the Company has a right to an amount of consideration that is unconditional. The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the consolidated company does not adjust any of the transaction prices for the time value of money.

(14) Government grants

The Company has obtained low interest rate loans from banks facilitated by the government, through the "Welcome Businesses Returning to Taiwan to Invest Solutions" launched by the Executive Yuan. The difference between such loan calculated by market borrowing interest rate valued at fair price and the amount received is recorded as deferred income. Grants that compensate the Company for expenses or losses incurred are recognized in profit or loss on a systematic basis in the periods in which the deferred income is recognized as deduction of expenses.

(15) Employee benefits

a. Defined contribution plans

Obligations for contributions to defined contribution pension plans are recognized as an employee benefit expense in profit or loss in the periods during which services are rendered by employees.

b. Defined benefit plans

The Company's net obligation in respect of defined benefit plans is calculated by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of plan assets.

Notes to the Parent Company Only Financial Statements

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Company, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income, and accumulated in retained earnings within equity. The Company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (asset). Net interest expense and other expenses related to defined benefit plans are recognized in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss. The Company recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

c. Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(16) Income taxes

Income taxes comprise current taxes and deferred taxes. Except for expenses related to business combinations or recognized directly in equity or other comprehensive income, all current and deferred taxes are recognized in profit or loss.

Current taxes comprise the expected tax payables or receivables on the taxable profits (losses) for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payables or receivables are the best estimate of the tax amount expected to be paid or received that reflects uncertainly related to income tax, if any. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred taxes arise due to temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their respective tax bases. Deferred taxes are recognized except for the following:

- a. temporary differences on the initial recognition of assets and liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profits (losses) at the time of the transaction;
- b. temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and deferred taxes are measured at tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

Deferred tax assets and liabilities are offset if the following criteria are met:

- a. the Company has a legally enforceable right to set off current tax assets against current tax liabilities: and
- b. the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either:

Notes to the Parent Company Only Financial Statements

- (i) the same taxable entity; or
- (ii) different taxable entities which intend to settle current tax assets and liabilities on a net basis, or to realize the assets and liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Deferred tax assets are recognized for deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefits will be realized.

(17) Earnings per share

The Company discloses the Company's basic and diluted earnings per share attributable to ordinary shareholders of the Company. Basic earnings per share is calculated as the profit attributable to ordinary shareholders of the Company divided by the weighted average number of common stocks outstanding. Diluted earnings per share is calculated as the profit attributable to ordinary shareholders of the Company divided by the weighted average number of common stocks outstanding after adjustment for the effects of all potentially dilutive common stocks, such as convertible bonds and estimated employee compensation.

(18) Operating segments

Company has provided the operating segments disclosure in the consolidated financial statements. Thus, disclosure of the segment information in the parent company only financial statements is waived.

5. Critical Accounting Judgments and Key Sources of Estimations and Assumptions Uncertainty

The preparation of the parent company only financial statements in conformity with the Regulations requires management to make judgments, estimates and assumptions that affect the application of the accounting policies and the reported amount of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed by management on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

There is no information involving critical judgments in applying the accounting policies in the consolidated financial statements.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year is as follows:

(1) Valuation of inventories

As inventories are stated at the lower of cost or net realizable value, the Company estimates the net realizable value of inventories for obsolescence and unmarketable items at the end of the reporting period and then writes down the cost of inventories to net realizable value. The net realizable value of the inventory is mainly determined based on assumption as to future demand within a specific time horizon. Due to the obsolescence of aircraft models, there may be significant changes in the net realizable value of inventories. Please refer to note 6(4) for further description on the valuation of inventories.

(2) Valuation process

The Company's accounting policies include measuring financial and non-financial assets and liabilities at fair value through profit or loss. The Company's financial instrument valuation group conducts independent verification on all significant fair values (including level 3 fair value), and reports directly to the chief financial officer. The Company also periodically

Notes to the Parent Company Only Financial Statements

reviews significant unobservable inputs and adjustments. If third-party information (i.e. through securities brokers or price setting service institutes) for evaluating fair value inputs were used, evidence for supporting inputs from third-party will be assessed in order to make sure the valuation and its fair value categorization is compliant with regulations from IFRSs. The Company strives to use market observable inputs when measuring assets and liabilities. Different levels of the fair value hierarchy to be used in determining the fair value of financial instruments are as follows:

- a. Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- b. Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- c. Level 3: inputs for the assets or liability that are not based on observable market data.

For any transfer within the fair value hierarchy, the impact of the transfer is recognized on the reporting date.

For assumptions used in measuring fair value, please refer to Note 6(2) financial instrument.

6. Description of Significant Accounts

(1) Cash and Cash Equivalents

	Dece	ember 31, 2023	December 31, 2022
Cash on hand	\$	279	283
Cash in banks		471,752	865,911
	<u>\$</u>	472,031	<u>866,194</u>

Please refer to note 6(22) for exchange rate risk and sensitivity analysis of the financial assets and liabilities.

According to the IFRSs Q&A updated by Securities and Futures Bureau, FSC on January 5, 2024, the Company reclassified the deposits balance in repatriated offshore funds accounts amounting to \$40,124 thousand and \$61,468 thousand as of December 31, 2022 and January 1, 2022, respectively, from other current assets to cash and cash equivalent. In addition, the Company decreased the amount in "decrease in other current assets" under investing activities for the year ended December 31, 2022 by \$21,344 thousand. As time deposits with original maturity date within 1 year, are held for the purpose of meeting short term cash commitments rather than for investment or other purposes, readily convertible to known amounts of cash and subject to an insignificant risk of changes in value, those are recognized as cash and cash equivalents.

Notes to the Parent Company Only Financial Statements

(2) Financial Assets and Liabilities at Fair Value through Profit or Loss ("FVTPL") – current and non-current

	Dec	ember 31, 2023	December 31, 2022
Financial assets mandatorily measured a	at		
FVTPL:			
Funds	\$	71,866	71,070
Convertible bonds of embedded		<u> </u>	62
derivatives			
Total	\$	71,866	71,132

Please refer to Note 6(20) for amounts remeasured at fair value through profit and loss, and Note 6(21) for fair value information.

As at December 31, 2023 and 2022 none of the Company's financial assets measured at fair value through profit and loss was pledged as collateral.

(3) Notes, trade and other receivables

a. Details as follows:

	De	ecember 31, 2023	December 31, 2022
Notes receivable	\$	122	42
Accounts receivable		763,817	807,001
Accounts receivable – related parties		120,929	148,889
Other receivables		246,248	55,462
Other receivables – related parties		4,739	5,275
Less: Loss allowance		(1,668)	(2,413)
	<u>\$</u>	<u>1,134,187</u>	1,014,256

b. The Company applies the simplified approach to provide for its expected credit losses, i.e. the use of lifetime expected loss provision for all receivables. To measure the expected credit losses, notes, accounts and other receivables have been grouped based on shared credit risk characteristics and the days past due, as well as incorporated forward looking information. The loss allowance provision for notes receivable, accounts receivable and other receivables for the years ended December 31 2023 and 2022 was analyzed as follows:

		De	ecember 31, 2023	3
	note	ying amount of s, accounts and er receivables	Weighted-average loss rate	Loss allowance for lifetime expected credit losses
Not past due	\$	1,112,650	0%	-
Past due less than 60 days		20,140	0%	-
Past due 61~120 days		2,783	50%	1,391
Past due 121~180 days		16	70%	11
Past due over 181 days		266	100%	266
	<u>\$</u>	1,135,855		1,668

Notes to the Parent Company Only Financial Statements

December 31, 2022

	notes,	ring amount of , accounts and r receivables	Weighted-average loss rate	Loss allowance for lifetime expected credit losses	
Not past due	\$	991,415	0%	-	
Past due less than 60 days		21,309	0%	-	
Past due 61~120 days		2,442	50%	1,221	
Past due 121~180 days		1,038	70%	727	
Past due over 181 days		465	100%	465	
	<u>\$</u>	1,016,669		2,413	

The movement of the loss allowance for notes, accounts and other receivables was as follows:

	e Dece	the years ended ember 31, 2023	For the years ended December 31, 2022
Balance at beginning of the year	\$	2,413	2,644
Impairment losses recognized (reversal gains)		(745)	(231)
Balance at end of the year	<u>\$</u>	1,668	2,413

c. The Company has signed accounts receivable factoring contracts without recourse with financial institutions. As stated in the contract, the Company does not have to bear the risks of uncollectable accounts receivables but the loss incurred due to commercial arguments. Due to the fact that the Company has already transferred almost all the risk and revenues of the above mentioned account receivables without further participation, hence meets the criteria of derecognition of financial assets. After derecognition of accounts receivable, the claim to financial institutes were recorded under other receivables. Factored accounts receivables which were not due as of the report date were as follows:

1			Dece	mber 31, 2023		
	Factoring amount \$ 189,616	Acceptable advances 663,228	Amount collected in advance	Transfer to other receivable amount 189,616	Interest rate	Amount pledged (in thousands of USD)
			Dece	mber 31, 2022		
			Amount	Transfer to other		Amount pledged
Underwriting bank	Factoring amount	Acceptable advances	collected in advance	receivable amount	Interest rate	(in thousands of USD)
Financial institutes	\$ 207,627	476,471	186,865	20,762	0.6812%~ 6.1311%	

d. None of notes and accounts receivables held by the Company were pledged as of December 31, 2023 and 2022.

Notes to the Parent Company Only Financial Statements

(4) Inventories

a. Details as follows:

	Dece	December 31, 2022	
Raw materials	\$	97,207	39,777
Semi-finished goods		40,293	66,487
Work-in-progress		1,737	5,415
Finished goods		144,922	169,553
Merchandise		30,210	23,373
	\$	314,369	304.605

b. Details of the Company's cost of inventories recorded as cost and expenses of goods sold for the years ended December 31 2023 and 2022 are as follows:

	ende	r the years ed December 31, 2023	For the years ended December 31, 2022
Cost of goods sold	\$	2,327,129	2,599,484
Loss on obsolescence write-off		9,783	13,448
Loss on inventory write-down		4,690	8,119
Unamortized manufacturing expenses		52,195	60,865
Others		5,286	2,217
	\$	2,399,083	2,684,133

c. As at December 31, 2023 and 2022, none of the Company's inventories was pledged as collateral.

(5) Investments accounted for using equity method

For changes in investments accounted for using equity method other than the ones mentioned below, please refer to consolidated financial statements for the year ended December 31, 2023.

- a. The dissolution and liquidation procedures of the subsidiary of the Company, ACES(HONG KONG)ELECTRONIC CO.,LTD., have been completed in 2023. Please refer to Note 6(20) for losses on disposals of investments.
- b. Change in ownership of subsidiaries

(i) MEC IMEX INC.

The Company subscribed 9,999 thousand of shares of MEC IMEX INC. in cash capital increase by cash of \$99,998 thousand in 2022, which increase its shareholding percentage from 99.79% to 99.84%. The resulting changes in equity increase the capital surplus by \$87 thousand.

The Company subscribed 2,007 thousand of shares of MEC IMEX INC. in cash capital increase by cash of \$119,907 thousand in 2023, which increase its shareholding percentage from 99.84% to 99.86%. The resulting changes in equity increase the capital surplus by \$20 thousand.

- a. The Company entered into a syndicated loan agreement with group of banks. During the loan term, the Company is required to calculate and maintain certain financial ratios at an agreed level based on the consolidated financial statements audit. Up to the date of December 31, 2023, there is no incident of the Company violating such financial ratios.
- b. The Company has obtained special low-interest rate loans of \$600,000 thousand from banks according to "Welcome Businesses Returning to Taiwan to Invest Solution" on June 2020. The actual special loan interest rate was 0.85%, the difference calculated by the fair loan value on market interest rate of 1.35% was regarded as government grants and recorded as deferred income. As of December 31, 2023 and 2022, deferred income were \$3,526 thousand and \$6,500 thousand respectively. These amounts were recorded under "other non-current liabilities."

Notes to the Parent Company Only Financial Statements

(12) Bonds payable

a. The details of unsecured convertible bonds were as follows:

		December 31, 2023	December 31, 2022
Total convertible corporate bonds issued	\$	600,000	600,000
Unamortized discounted corporate bonds payable		(20,698)	(42,994)
Cumulative converted amount		(1,100)	(1,100)
Corporate bonds issued balance at year-end (recognized in current portion of corporate bonds and bonds payables)	<u>\$</u>	578,202	555,906
Embedded derivative – redeem options (recognize in financial assets at fair value through profit (loss)			<u>62</u>
Equity component – conversion options (recognized in capital surplus)	d <u>\$</u>	71,065	71,065

	For the years ended December 31, 2023	For the years ended December 31, 2022
Embedded derivative – gains or losses from remeasurement of fair value of redeem options (recognized in other gains and losses)	(62)	(1,184)
Interest expenses	22,296	21,458

The bondholders of the Company's convertible bonds redeemed the bonds during the year of 2022 and 22 thousand new shares were issued at par value.

- b. Major terms and conditions of the second issuance of convertible company bonds:
 - (i) Issued period: Three years, from November 22, 2021 to November 22, 2022.
 - (ii) Interest rate: 0%
 - (iii) Redemption at the option of the Company: The Company may redeem the bonds under the following conditions:
 - A. The Company may redeem the bonds, in whole or in part, 3 months after the issuance and forty days prior to the maturity date, at the principal amount of the bonds if the closing price of the Company's common stocks on the Taiwan Stock Exchange for a period of 30 consecutive trading days, is at least 130% of the conversion price.
 - B. The Company may redeem the bonds, in whole or in part, 3 months after the issuance and forty days prior to the maturity date, at the early redemption conversion price if at least 90% in principal amount of the bonds has already been exchanged, redeemed, purchased or canceled.

Notes to the Parent Company Only Financial Statements

(iv) Terms of conversion:

- A. From February 23, 2022 to November 23, 2024, bondholders may convert bonds into common shares of the Company according to terms of conversion.
- B. Conversion price: The conversion price at the time of issuance was NT\$51.3 per share. The conversion price will be subject to adjustments upon the occurrence of certain events set out in the indenture. This bond does not have reset clause.

The Company announced capital increase by issuing new share on December 8, 2021. As of December 16, 2021, the conversion price per share is from \$51.3 New Taiwan dollars to \$50.4 New Taiwan dollars

The Company announced due to the distribution of cash dividends for common stocks, the conversion price per share is from \$50.4 New Taiwan dollars to \$48.5 New Taiwan dollars as of August 22, 2022.

(v) If the bondholder does not convert the bonds at maturity, the Company has to pay in full in cash for redemption of bonds held at the principal amount of bonds with additional interest for compensation (interest compensation at maturity is 1.5075% of the principal amount).

The Company's employee benefit liability deta		follows: ecember 31, 2023	December 31, 2022
Net defined benefit obligation liabilities	\$	8,448	17,259
(under 'other non-current liabilities')			
Compensated absences liabilities (under 'other payables')		12,877	12,877
Total employee benefit liabilities	\$	21,325	30,136

Notes to the Parent Company Only Financial Statements

The Company makes defined benefit plan contributions to the pension fund account with Bank of Taiwan that provides pensions for employees upon retirement. Plans (covered by the Labor Standards Law) entitle a retired employee to receive retirement benefits based on years of service and average monthly salary for the six months prior to retirement.

(i) Composition of plan assets

The Company allocates pension funds in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund, and such funds are managed by the Bureau of Labor Funds, Ministry of Labor. With regard to the utilization of the funds, minimum earnings shall be no less than the earnings attainable from two-year time deposits with interest rates offered by local banks.

As of reporting date, the Company's Bank of Taiwan labor pension reserve account balance amounted to \$23,835 thousand. For information on the utilization of the labor pension fund assets, including the asset allocation and yield of the fund, please refer to the website of the Bureau of Labor Funds, Ministry of Labor.

(ii) Changes on current value of defined obligation

The changes on current value of defined obligation for the years ended December 31, 2023 and 2022 were as follows:

		the years ended ember 31, 2023	For the years ended December 31, 2022
Defined benefit obligation on January 1	\$	39,819	44,442
Current service cost and interest		696	278
Remeasurements of net defined benefit liabilities (assets)		(8,232)	(4,901)
Defined benefit obligation on December 31	<u>\$</u>	32,283	39,819

(iii) Movements on fair value of plan assets

The changes on current value of defined benefit asset plan for the years ended December 31, 2023 and 2022 were as follows:

	For the years ended December 31, 2022	For the years ended December 31, 2021
Fair value of plan assets on January 1	\$ 22,560	20,100

Remeasurements of net defined benefit liabilities (assets)	79	1,549
Amount appropriated to plan	795	783
Fair value of plan assets on December 31	<u>\$ 23,835</u>	22,560

Notes to the Parent Company Only Financial Statements

(iv) Expenses recognized in profit or loss

The expenses recognized in profit or loss for the Company for the years ended December 31, 2023 and 2022 were as follows:

	For the years ended		For the years ended	
	Dece	mber 31, 2023	December 31, 2022	
Net interest of net defined benefit liabilities (assets)	\$	<u> 295</u>	150	
Operating costs and expenses	\$	295	<u>150</u>	

(v) Recognized as remeasurements of net defined benefit liabilities under other comprehensive profit and loss.

As of at December 31, 2023 and 2022, details of the Company's remeasurements of net defined benefit liabilities under other comprehensive profit and loss was as follows:

	For the ye December		For the years ended December 31, 2022	
Accumulated balance on January 1	\$	(16,859)	(27,739)	
Current recognition				
The Company		8,311	6,450	
Subsidiaries		(6,400)	4,430	
Accumulated balance on December 31	<u>\$</u>	(14,948)	(16,859)	

(6) Actuarial assumptions

Details of actuarial assumptions used to decide defined benefit obligation at the end of reporting date as follows:

	December 31, 2023	December 31, 2022
Discount rate	1.625%	1.750%
Increase on future payroll	3.000%	5.500%

The Company has planned to appropriate in the amount of \$790 thousand for defined benefit plan within 1 year after the reporting date of the year ended December 31, 2023. The weighted average duration for defined benefit plan is 12.40 years.

(vii) Sensitivity analysis

Details of the impact to current value of defined benefit obligation by using main actuarial assumption change of 0.25% for the years ended December 31, 2023 and 2022 was as follows:

	Impact to defined benefit obligat				
	Increase	by 0.25%	Decrease by 0.25%		
December 31, 2023					
Discount rate	\$	(771)	797		
Increase on future payroll		768	(747)		
December 31, 2022					
Discount rate		(1,088)	1,128		
Increase on future payroll		911	(889)		

Reasonably possible changes to one of the relevant actuarial assumptions, holding other assumptions remain constant, would have affected the defined benefit obligation by the

Notes to the Parent Company Only Financial Statements

amounts shown above. In practical, the relevant actuarial assumptions are correlated to each other. The approach used in recognizing the net defined liability in the balance sheets is the same as the one used in developing the sensitivity analysis.

And the relevant actuarial assumptions in the current and previous years.

b. Defined contribution plans

The Company allocates 6% of each employee's monthly wages to the labor pension personal account at the Bureau of Labor Insurance, Ministry of Labor (hereinafter referred to as the Bureau of Labor Insurance) in accordance with the provisions of the Labor Pension Act. Under this defined contribution plan, the Company allocates a fixed amount to the Bureau of Labor Insurance without additional legal or constructive obligations. The Company's pension costs under the defined contribution method were \$24,587 thousand and \$23,969 thousand for the years ended December 31, 2023 and 2022, respectively. Payment was made to the Bureau of Labor Insurance.

(15) Income taxes

- a. Income tax expenses
 - (i) The components of income tax expenses in the years 2023 and 2022 were as follows:

T---1----

b. Assessment of tax

The Company's tax returns for the years through 2020 were assessed by the tax authority.

(16) Capital and other equity

a. Share capital

As of December 31, 2023 and 2022, the authorized common stock of the Company was \$2,000,0000 thousand in both years, comprising 200,000 thousand shares with a par value of \$10 per share. The issued common stocks were both 134,418 thousand shares.

(a) Common stock

The bondholders of the Company's convertible bonds redeemed the bonds during the year of 2022 and 22 thousand new shares were issued at par value. All the capital for issued shares had been received and relevant statutory registration procedures have since been completed and categorized under equity.

Notes to the Parent Company Only Financial Statements

b. Capital surplus

The balances of capital surplus were as follows:

	Dece	ember 31, 2023	December 31, 2022
Additional paid-in capital	\$	756,155	756,155
Consolidation excess		3,831	3,831
Changes in net value of equity		105,197	100,542
investment in affiliated companies			
accounted for using equity method			
Employee stock options		13,978	13,978
Expired employee stock options		30,378	30,378
Stock option for conversion of convertible bonds		71,065	71,065
Others		12,666	12,666
	\$	993,270	988,615

According to the ROC Company Act, capital surplus can only be used to offset a deficit, and only the realized capital surplus can be used to increase the common stock or be distributed as cash dividends. The aforementioned realized capital surplus includes capital surplus resulting from premium on issuance of capital stock and earnings from donated assets received. According to the Regulations Governing the Offering and Issuance of Securities by Securities Issuers, capital increases by transferring capital surplus in excess of par value should not exceed 10% of the total common stock outstanding.

Please refer to Note 6(5) and 6(12) for other changes in capital surplus.

c. Retained earnings

In accordance with the Articles of Incorporation, the current year's after-tax earnings should be used initially to cover any accumulated deficit (including adjustments for undistributed earnings) and set aside 10% of the remaining earnings as legal reserve; however this is not required if total legal reserve equals total paid-in capital. Special legal reserve was set aside according to the Company's operational requirements and rules and regulations of relevant laws. The distribution of the remaining amount, plus unappropriated earnings from prior years, shall be proposed by the Board of Directors and resolved by shareholders in their general meeting.

If dividend is distributed in issued new shares, shall be made in accordance with the provisions of Article 241 of the Company Law. If dividend is distributed in cash, the board of directors shall be attended by two-thirds of the total directors, and resolved by a majority votes at the board of directors, to distribute dividends and bonuses in whole or in part to be paid in cash, and report to the shareholders' meeting.

The Company's dividend appropriation plan is based on current earning, with the principle of stabilizing share interest, and for adaptation with this matured industry and company capital structure. As for the distribution plan, cash dividends shall not be lower be 20% of combined share dividend and cash dividend. However, the shareholders' meeting will review actual earning situation of the current year and future capital planning for any adjustment.

Notes to the Parent Company Only Financial Statements

(i) Legal reserve

When a company incurs no loss, it may, pursuant to a resolution by a shareholders' meeting, distribute its legal reserve by issuing new shares or by distributing cash, and only the portion of legal reserve which exceeds 25% of capital may be distributed.

(ii) Special reserve

In accordance with the guidelines of FSC, a portion of current-period earnings and undistributed prior-period earnings shall be retained as a special reserve. The amount to be retained should be equal to the current-period total reduction of other shareholders' equity. Similarly, a portion of undistributed prior-period earnings shall be reclassified as a special reserve to account for cumulative changes to other shareholders' equity pertaining to prior periods. Amounts of subsequent reversals pertaining to the net reduction of other shareholders' equity shall qualify for additional distributions.

According to the regulations of FSC, the Company reserved special earning surplus from current profit and loss and undistributed earnings from previous period as net debit item of other shareholders' equity. Similarly, a portion of undistributed prior-period earnings shall be reclassified as a special reserve (which does not qualify for earnings distribution) to account for cumulative changes to other shareholders' equity pertaining to prior periods. Amounts of subsequent reversals pertaining to the net reduction of other shareholders' equity shall qualify for additional distributions.

(iii) Earnings distribution

The amount of cash dividends of appropriations of earnings for the years ended December 31, 2022 and 2021 had been approved in the board meeting held on March 24, 2023 and March 30, 2022, respectively. The proposals of appropriations were resolved on June 27, 2023 and June 29, 2022 by the shareholders' meetings respectively. These earnings were appropriated as follows:

		year ended er 31, 2022	For the year ended December 31, 2021

For details on notes and accounts receivable (including related parties) and allowance for impairment, please refer to note 6(3).

(19) Remunerations to employees and directors

In accordance with the Articles of Incorporation, if there's any profit of the year, no less than 1% shall be appropriated to employees remuneration and no more than 3% to directors remuneration. However, if the Company has accumulated deficits, this profit shall be reserved for covering losses. The aforementioned employees remuneration must be controlled with conditions set forth by the Board of Directors or its proxy, or employees of subsidiaries.

The aforementioned employees compensation shall be distributed in the form of shares or cash. Those who received shares by the resolution of the board of directors can resolve in new share or purchase own shares. Compensation for the board of directors can only be distributed in the form of cash.

The employee compensation and directors' remuneration were estimated as the income before tax, excluding the amount of employee compensation and directors' remuneration, multiplied by the percentage of remuneration to employees and directors as specified in the Company's articles. These remunerations were expensed under operating costs or operating expenses. If there is a difference between estimation and actual appropriated amounts, changes in accounting estimates shall be applied. Such effect on changes shall be recognized in profit and loss in the next year. As the Company incurred loss in the year ended December 31, 2023, the amounts were not estimated.

		mber 31, 2023	December 31, 2022
Employees remuneration	\$	=	10,776

The amount, as stated in the parent company only financial statements, are identical to those of the actual distributions for 2023 and 2022. Relevant information can be referred to on the "Market Observation Post System".

Notes to the Parent Company Only Financial Statements

(20) Non-operating income and expenses

a. Other gains and losses

Details of other gains and losses of the Company for the years ended December 31, 2023 and 2022 were as follows:

		ne year ended nber 31, 2023	For the year ended December 31, 2022
Foreign exchange gains	\$	11,283	63,196
Gains (losses) on disposals of property, plant and equipment		(907)	(75)
Gains on lease modification		48	-
Losses on disposals of investments		(26,725)	-
Gains (losses) on financial assets at fair value through profit or loss	;	14,034	(37,358)
Other losses		(4,151)	(2,045)
	\$	(6,418)	23,718

The Company can longer obtain market price from periodical financial tools SPECTRA SPC POWERFUND. According to Article 13 'Fair value measurement' of IFRS on assessment of relevant information credibility and limitations, it is therefore moved from Level 1 to Level 3. The Company measured loss on fair value of the aforementioned asset recognized under "other gains and losses." Please refer to note 6(2) and 6(21) for details

The dissolution and liquidation of the subsidiaries of the Company, ACES (HONG KONG) ELECTRONIC CO., LTD, have been resolved by the board of directors on October 2, 2023, and the relevant procedures have been completed on November 10, 2023. As of December 31, 2023, the Group has recovered distribution of liquidated remaining properties of \$14,860 thousand, and recognized losses on disposals of investments of \$26,725 thousand, which were presented in "other gains and losses."

b. Finance costs

Details of finance costs of the Company for the years ended December 31, 2023 and 2022 were as follows:

	For the year ended		For the year ended	
	Decemb	ber 31, 2023	December 31, 2022

Convertible company bond interest		22,296	21,458	
	\$	69,189	49,829	

(21) Financial instruments

a. Credit risk

(i) Credit risk exposure

The carrying amount of financial assets represents the maximum amount exposed to credit risk.

(ii) Concentration to credit risk

The customers of the Company has a significant concentration on hi-tech industry. As of December 31, 2023 and 2022, the balance of accounts receivable had 55% and 61% from 7 and 7 customers respectively. This has presented high concentration of credit risk for the Company. In order to reduce accounts receivable credit risk, the Company continues to assess financial status of its customers.

Notes to the Parent Company Only Financial Statements

(including current portion)	1,724,500	1,764,926		632,582	<u> </u>
À	\$ 4,295,083	4,394,065	3,160,130	4,064,321	

The Company does not expect the cash flows included in the maturity analysis to occur significantly earlier or at significantly different amounts.

c. Currency risk

(i) Exposure to foreign currency risk

The Company's significant exposure to foreign currency risk was as follows:

Currency: expressed in thousands of dollars

December 31, 2023				Dec	ember 31, 202	2
		Exchange			Exchange	
I	Foreign	rate		Foreign	rate	
C	urrency	(dollar)	NTD	currency	(dollar)	NTD
						_
\$	45,903	30.705	1,409,451	41,161	30.710	1,264,054
	34,395	30.705	1,056,098	29,657	30.710	910,766
	<u></u>	Foreign currency \$ 45,903	Foreign currency Exchange rate (dollar) \$ 45,903 30.705	Foreign currency rate (dollar) NTD \$ 45,903 30.705 1,409,451	Foreign rate (dollar) NTD Foreign currency \$ 45,903 30.705 1,409,451 41,161	Foreign currency (dollar) NTD Exchange rate (dollar) NTD currency (dollar) Superior (dollar) 1,409,451 41,161 30.710

(ii) Sensitivity analysis

The foreign currency risk mainly arose from the translation of cash and cash equivalents, accounts receivable, other receivables, accounts payable, and other payables.

As of December 31, 2023 and 2022, if the exchange rate had changed, given no changes in other factors, when NTD is depreciated or appreciated against USD by 5%, profit after tax would have increased or decreased by \$17,668 thousand and \$17,665 thousand

Notes to the Parent Company Only Financial Statements

for the years ended December 31, 2023 and 2022, respectively. The method of analysis remains the same for both periods.

(iii) Foreign exchange gains and losses on monetary items

The Company's information on foreign exchange gain (loss) on monetary items is disclosed by total amount. For years ended December 31, 2023 and 2022, foreign exchange gains (loss) (including realized and unrealized portions) amounted to \$11,283 thousands and \$63,196 thousands, respectively.

iv. Interest rate analysis

The Company's exposure to interest rate risk arising from financial assets and liabilities is described in the liquidity risk part of this note.

The following sensitivity analysis is determined through the exposure to interest rate risk of derivative and non-derivative instruments on the reporting date. For floating rate liabilities, the analysis assumes that the balances of outstanding liabilities on the reporting date have been outstanding for the whole period, and their rational change intervals are being estimated. If the interest rate increases/decreases by 1%, representing the reasonable interest rates changes made by management.

If the interest rate increased or decreased by 1%, given no changes in other factors, the profit before tax will decrease or increase by \$29,915 thousand and \$23,745thousand for the years ended December 31, 2023 and 2022 respectively. This is mainly because of the Company's floating rate loans.

v. Fair value

(i) Fair value hierarchy

The fair value of financial assets and liabilities at fair value through profit or loss are measured on a recurring basis. The carrying amount and fair value of the Company's financial assets and liabilities, including the information on fair value hierarchy are stated below:

Notes to the Parent Company Only Financial Statements

	December 31, 2023 Fair value

Notes to the Parent Company Only Financial Statements

(ii) Valuation techniques of financial instruments not measured at fair value

A. Non-derivative financial instruments

Financial instruments traded in active market are based on quoted market prices. The quoted price of a financial instrument obtained from main exchanges and on-the-run bonds from Taipei Exchange can be used as a basis to determine the fair value of the listed companies equity instrument and debt instrument of the quoted price in an active market.

If a quoted price of a financial instrument can be obtained readily and regularly from exchanges, brokers, underwriters, industrial union, pricing institute, or authorities, and such price can reflect those actual trading and regularly occurring in the market. Then the financial instrument is considered to have a quoted price in an active market. If a financial instrument is not in accord with the definition mentioned above, then it is considered to be without a quoted price in an active market. In general, market with low trading volume or high bid-ask spreads is an indication of a nonactive market.

If the financial instrument held by the Company is of an active market, the fair value of it is determined in accordance with market price. If its of a nonactive market, the fair value is measured by net assets.

B. Derivative financial instruments

Measurement of the fair value of derivative instruments is based on the valuation techniques generally accepted by market participants such as the discounted cash flow or option pricing models (Black-Scholes Model).

(iii)Changes on Level 3 table

	assets r	nandatory measured at FVTPL
January 1, 2022	\$	-
Recategorized from Level 1		46,683
Total loss (recognized on profit and loss)		(46,683)
December 31, 2022	\$	

Non-derivative financial

The Company can longer obtain market price from periodical financial tools. According to Article 13 'Fair value measurement' of IFRS on assessment of relevant information credibility and limitations, it is therefore moved from Level 1 to Level 3. The above loss was recorded under 'other gain and loss'.

(iv) Quantified information on significant unobservable inputs (Level 3) used in fair value measurement

The Company's financial instruments that use Level 3 inputs to measure fair value include financial assets and liabilities measured at fair value through profit and loss.

Most of the Company's fair value were classified as Level 3 with only one significant unobservable input. Only liabilities instruments of nonactive market has more than one significant unobservable inputs. The significant unobservable inputs of financial instrument investments without an active market are individually independent, and there is no correlation between them.

Notes to the Parent Company Only Financial Statements

Quantified information of significant unobservable inputs was as follow:

Item	Valuation technique	Significant unobservable inputs	Interrelationship between significant unobservable inputs and fair value measurement
Financial assets at fair value through profit and loss - non-current	Net asset valuation method	Net asset valuation	Not applicable
Financial assets at fair value through profit and loss -	r value through method and credit risk	hod and credit risk adjustment (including risk of breach of	• The higher the market illiquidity discount is, the lower the fair value.
current		contract) were 100%.	• The higher the credit risk is, the lower the fair value.

(23) Financial risk management

a. Overview

The Company have exposures to the following risks from its financial instruments:

- (i) Credit risk
- (ii) Liquidity risk
- (iii) Market risk

The following likewise discusses the Company's objectives, policies and processes for measuring and managing the above mentioned risks. For more disclosures about the quantitative effects of these risks exposures, please refer to the respective notes in the accompanying parent company only financial statements.

b. Structure of risk management

Detailed financial information on the Company's significant financial instruments were disclosed under notes of each listing. However, the Company is still exposed to financial risks posed by aforementioned financial instruments. Such risks include market risks (including exchange rate risks, interest rate risks and other pricing risks) credit risk and liquidity risk.

The Company has stipulated risk management policies or risk management procedure in writing which were in resolution with the board of directors in order to identify, measure, monitor and control credit risks, market risks and liquidity risks. Risk management of the Company is executed by the finance department in accordance with risk management polices approved by the board of directors. Risk management department works closely with other departments to identify, evaluate and avoid any kind of financial risks. The board of directors has stipulated written policies for risk management. Such policies included certain risk exposures such as exchange rate risks, interest rate risks, credit risks, derivatives and non-derivatives financial instrument risks and etc. Moreover, the internal audit department is also responsible for risk management and control of environment for independent audit.

c. Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investment of marketable securities.

(i) Accounts receivable and other receivables

The Company has established a credit policy under which each new customer is analyzed individually for creditworthiness before the Company's standard payment and delivery terms and conditions are offered, thus set up individual credit limit in order to control credit risk.

Notes to the Parent Company Only Financial Statements

(ii) Financial investments

The credit risk exposure in the bank deposits, fix income investments and other financial instruments are measured and monitored by the Company's finance department. As the Company deals with the banks and other external parties with good credit standing and financial institutions, corporate organization and government agencies which are graded above investment level, the management believes that the Company does not have any compliance issues, and therefore, there is no significant credit risk.

(iii) Guarantee

The Company only provide guarantee to parties listed under procedures for guarantee and endorsement. The Company did not provide guarantee to any third party not listed by the Company's policy as of December 31, 2023 and 2022.

d. Liquidity risk

The Company is supporting the operation and reducing effects caused by cash flow fluctuations by manage and maintain sufficient cash and cash equivalents. The management of the Company monitors financing credit limits from banks and makes sure contracts were adhered to.

Bank borrowing is an important source of liquidity for the Company. As of December 31, 2023 and 2022, the Company's unused credit line were amounted to \$3,646,482 and \$1,779,550, respectively.

e. Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates, and equity prices, will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

(i) Currency risk

The Company is exposed to currency risk on sales and purchases that are denominated in a currency other than the respective functional currencies of the Company. The currencies used in these transactions are the US dollar (USD).

(ii) Interest rate risk

The Company borrows with both floating interest rate and fixed interest rate, thus change risk and cash flow risk were incurred for fair value. The Company can manage its interest risk through maintaining an appropriate portfolio of floating interest rate and fixed interest rate.

(iii) Other market price risk

The Company is exposed to equity price risk due to the investment in equity securities. This is a strategic investment and is not held for trading. The Company does not actively trade in these investments as the management of the Company minimizes the risk by holding different investment portfolios.

(23) Capital management

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence, and to sustain the future development of the business. The capital includes common stock, capital surplus, retained earnings and other equities. The board of directors are in control of common stocks' dividend value.

Notes to the Parent Company Only Financial Statements

Relationship with the Name of related parties Company

The Company use the debt-to-equity ratio to manage capital. This ratio is the total net debt divided by the total capital. The net debt from the balance sheet is derived from the total liabilities less cash and cash equivalents. The total capital is the total components of equity (i.e. share capital, capital surplus, retained earnings and other equities).

Debt-to-equity ratio for the years ended December 31, 2023 and 2022 as follows:

	Dec	ember 31, 2023	December 31, 2022	
Total liabilities	\$	5,290,727	4,651,294	
Less: cash and cash equivalents	-	(472,031)	(866,194)	
Net liabilities	<u>\$</u>	4,818,696	3,825,224	
Total equity	\$	5,254,759	5,637,120	
Debt-to-equity ratio		91.70%	67.86%	

(25) Investing and financing activities not affecting the current cash flow

Details of investing and financing activities not affecting the current cash flow of the Company for the years ended December 31, 2023 and 2022 were as follows:

a. Conversion of convertible bonds to common stocks, please refer to Note 6(16) for details.

Non-Cash

December

b. Reconciliation of liabilities arising from financing activities was as follows: January 1.

- (Note 1): There are 3 types of investment:
 - (1) Direct investment from Mainland China.
 - (2) Investment through a company located at a third party area.
 - (3) Other methods.
- (Note 2): The recognition basis for gain or loss from investment is based on the financial report audited by auditors from parent company in Taiwan.
- (Note 3): Direct investment of KUNSHAN ACES ELECTRONIC CO., LTD. in the amount of RMB43,397 thousand.
- (Note 4): Indirect investment of MEC IMEX INC.
- (Note 5): Direct investment of COMPUPACK TECHNOLOGY CO., LTD. in the amount of USD350 thousand.
- (Note 6): Indirect investment of KUANG YING COMPUTER EQUIPMENT CO., LTD.
- (Note 7): Direct investment of ACECONN ELECTRONIC CO., LTD. In the amount of RMB120,322 thousand.
- (Note 8): Indirect investment of GENESIS INNOVATION GROUP LIMITED.
- (Note 9): Indirect investment of GENESIS ELECTRO-MACHANICAL LIMITED.
- (Note 10): Direct investment of KUNSHAN ACES ELECTRONIC CO., LTD. in the amount of RMB3,750

Notes to the Parent Company Only Financial Statements

thousand.

- (Note 11): The Company set up ACES ZHUHAI TECHNOLOGY LTD on February 1, 2023, which is included into the Group since that day.
- (Note 12): The dissolution and liquidation procedures of the subsidiaries of the Company, GENESIS INTERCONNECT CO., LTD., and SHENZHEN JINO ELECTRONIC CO., LTD. have been completed in 2023.
- (Note 13): The subsidiary of the Company, GENESIS GUIZHOU TECHNOLOGY CO., LTD., has been sold in 2023.

Notes to the Parent Company Only Financial Statements

b. Limitation on investment in Mainland China:

Accumulated remittance from Taiwan to China as of December 31, 2023 (Note 1)	Investment Amounts Authorized by Investment Commission, MOEA	Upper Limit on investment in Mainland China set by Investment Commission, Ministry of Economic Affairs
1,592,780	2,885,782	3,159,779
(USD 53,316 thousand)	(USD 93,984 thousand)	
	(Note 2)	

⁽Note 1) Accumulated remittance amount from Taiwan to China as of December 31, 2023 was estimated by historical exchange rates.

c. Significant transactions:

The significant inter-company transactions with the subsidiaries in Mainland China for the year ended December 31, 2023 are disclosed in "Information on significant transactions" in the consolidated financial statements.

(4) Major shareholders:

Shareholder's Name	reholding Share	es Percentage
Wan Ding Yuan	8,8	63,487 6.59%

Note: (1)The information on major shareholders, which is provided by the Taiwan Depository & Clearing Corporation, summarized the shareholders who held over 5% of the total nonphysical common stocks and preferred stocks (including treasury stocks) on the last business date of each quarter. The registered nonphysical stocks may be different from the capital stocks disclosed in the financial statement due to different calculations basis.

(2) If the aforementioned data contained shares which were kept in trust by the shareholders, the data disclosed will be deemed as the settlor's separate account for the fund set by the trustee. As for the shareholder who reports its share equity as an insider and whose shareholding ratio is greater than 10% in accordance with Securities and Exchange Act and include its self-owned shares and trusted shares, as well as the shares of the individuals who have power to decide how to allocate the trust assets. For the information on reported share equity of the insider, please refer to the Market Observation Post System.

14. Segment information:

Please refer to the consolidated financial statements for the year ended December 31, 2023.

⁽Note 2) Inclusive on the amount of USD34,745 thousand authorized by Investment Commission as capital reserve to increase.

(6)	If the company or its affiliates have experienced financial difficulties in the most recent fiscal year or during the current fiscal year up to the date of publication of the annual report, the annual report shall explain how said difficulties will affect the company's financial situation: None.

VII. A review and analysis of the Company's financial position and financial performance, and a listing of risks

(1) Financial position: The main causes and effects of significant changes in assets, liabilities, and equity in the past two years should be stated if the impact is significant.

Unit: NTD thousand;%

Year	2022	2022	Difference			
Item	2022	2023	Amount	Ratio		
Current assets	6,997,696	6,175,416	(822,280)	(11.75)		
Non-current assets	5,842,680	6,075,473	232,793	3.98		
Total assets	12,840,376	12,250,889	(589,487)	(4.59)		
Current liabilities	5,392,056	4,663,735	(728,321)	(13.51)		
Non-current liabilities	1,792,966	2,330,650	537,684	29.99		
Total liabilities	7,185,022	6,994,385	(190,637)	(2.65)		
Common stock	1,344,177	1,344,177	0	0		
Capital surplus	988,615	993,270	4,655	0.47		
Retained earnings	3,363,445	3,024,883	(338,562)	(10.07)		
Other equity	(59,117)	(107,571)	(48,454)	81.96		
Treasury stock	-	-	-	-		
Non-controlling interests	18,234	1,745	(16,489)	(90.43)		
Total equity	5,655,354	5,256,504	(398,850)	(7.05)		

Explanation of significant changes (changes between periods exceeding 20% and with a change amount of at least NT\$10 million):

- Increase in non-current liabilities: Mainly due to an increase in long-term borrowings.
- 2. Decrease in other equity: Mainly due to adverse exchange differences from the translation of financial statements of overseas operating entities.
- 3. Decrease in non-controlling interests: Mainly due to the Company repurchasing its shares from minority shareholders in the year 2023.

(2) Financial performance

A. Analysis of the main reasons for significant changes in operating revenue, operating net profit, and pre-tax net profit in the past two years:

Unit: NTD Thousand; %

				,
Item	2022	2023	Increased(Decreased) Amount	% change
Net revenue from operations	10,392,504	8,486,228	(1,906,276)	(18.34)
Operating costs	8,159,619	6,734,424	(1,425,195)	(17.47)
Gross profit	2,232,885	1,751,804	(481,081)	(21.55)
Operating expenses	2,176,138	2,082,533	(93,605)	(4.30)
Operating profit	56,747	(330,729)	(387,476)	(682.81)
Non-operating income and expenses	258,316	61,037	(197,279)	(76.37)
Profit before income tax	315,063	(269,692)	(584,755)	(185.60)
Less: Income tax expenses	91,730	(1,504)	(93,234)	(101.64)
Profit for the year	223,333	(268,188)	(491,521)	(220.08)

Explanation of significant changes (when the changes between the current and previous period exceed 20% and the amount of change is at least NT\$10 million):

- 1. Decrease in gross profit: Mainly due to higher allocation of fixed costs.
- 2. Decrease in operating net profit: Mainly due to the decrease in gross profit.
- 3. Decrease in non-operating income and expenses: Mainly due to a decrease in exchange gains for the company.
- 4. Decrease in pre-tax net profit: Mainly due to the decrease in gross profit and non-operating income and expenses.
- 5. Decrease in income tax expense: Mainly due to the decrease in pre-tax net profit.
- 6. Decrease in profit for the year: primarily due to a decrease in operating profit.
- B. The expected sale amount and its basis, the Company's future financial performance, and the plan for any possible impact

The Company's estimated sales volume is based on the overall industry supply and demand, capacity planning, and past operational performance. With the overall industry still showing a growth trend, we anticipate an increase in our sales volume. In addition to enhancing product range and customer diversification in the existing laptop market, considering the high developmental potential of consumer electronics, automotive electronics, cloud servers, network communications, and industrial settings, our company will continue to develop and manufacture related product connectors and cable assemblies. To support operational growth, our company has also formulated appropriate financial strategies. For an analysis of cash flow liquidity for the upcoming year, please refer to the following detailed explanation.

(3) Cash flow

A. Explanation of changes in cash flows for the recent year

Year Item	2022	2023	% change
Cash flow ratio (%)	21.08	14.22	(32.54%)
Cash flow adequacy ratio (%)	75.24	76.14	1.20%
Cash reinvestment ratio (%)	9.70	5.77	(40.52%)

Explanation of Changes in Proportions:

- 1. Cash flow ratio: Mainly attributable to the decrease in net cash flow from operating activities, resulting in a decrease in the cash flow ratio compared to the previous period.
- 2. Cash reinvestment ratio: Mainly due to the decrease in net cash flows from operating activities and the increase in capital expenditures.

- B. Insufficient Capital liquidity improvement plan: Not applicable.
- C. Future year cash flow analysis

Unit: NTD thousand

halance (I)	Cash flow from operating activities (2)	Projected cash inflows and outflows (3)	Net cash flow balance (1)+(2)+(3)	Cash shortage contingency plan Investment Financing		
				plan	plan	
2,058,206	1,071,121	(828,415)	2,300,912	_		

- (1) Analysis of changes in cash flow over the next year:
 - I. Operating Activities: It is expected that there will still be profit generated in the fiscal year 2024, leading to net cash inflows from operating activities.
 - II. Investing Activities: Considering the need for long-term strategic development, the company is integrating its overall resources and expanding its business scale to enhance global competitiveness. Additionally, to sustain long-term competitive development and deepen technological advancement, the company has purchased land and constructed factories in Taiwan, as well as continuously increased investments in machinery, molds, and other equipment. This includes expanding production capacity in parts of mainland China, which has resulted in net cash outflows from investment activities.
 - III. Financing Activities: The Company will flexibly utilize operating funds and bank borrowing facilities.
- (2) Remedial measures for expected cash shortages and liquidity analysis: Not applicable.
- (4) The effect upon financial operations of any major capital expenditures in the most recent fiscal year: None.
- (5) The Company's reinvestment policy for the most recent fiscal year, the main reasons for the profits/losses generated thereby, the plan for improving re-investment profitability, and investment plans for the coming year
 - A. Recent year's reinvestment policy
 - The Company's management policy regarding its reinvestment activities is based on the internal control system's "investment cycle" and "acquisition or disposal of assets processing procedures" as guidelines for managing the operations of its investee companies. The investee companies regularly provide their financial information to the Company to ensure that it is informed of its financial and operational status. In addition, the Company's internal auditing team periodically conducts on-site audits of the operations and internal control execution of the investee companies to facilitate effective management of these investments and achieve effective control over their operations.
 - B. The main reasons for reinvestment losses in the recent fiscal year

 The Company's investment income recognized under the equity method for the fiscal
 year 2023 amounted to NT\$(167,794) thousand. The losses primarily stemmed from
 weakened global demand for the investee companies' terminal products, leading to
 production volumes that did not achieve economies of scale. Future adjustments to
 operational planning will be made based on market conditions, capacity, and the Group's
 logistical status, with an expectation of gradual improvements in operations.
 - C. Investment plan for the next year
 - The Company has always adhered to the principles of "knowledge, vision, value, attitude, commitment, and execution," operating with integrity and striving to enhance the operational efficiency of the group. To meet the needs of long-term strategic development and to maximize the output and efficiency of various business groups, the company focuses on expansion in overseas and mainland China markets. Our overseas sales bases cover the United States, Japan, Germany, the Philippines, Vietnam, and Singapore, providing products and services such as connectors, cables, electromagnetic shields, internal mechanisms, and external casings for electronic products, and complete machine assembly and testing. These offerings aim to provide higher value-added products and services to increase growth momentum.

For long-term development, the company began constructing a research and development headquarters in Taoyuan, Taiwan, in April 2022, with completion expected in the first half of 2024. This will expand Taiwan's production capacity and enhance the group's competitiveness. The company has also established substantial production capabilities in Asia, with manufacturing locations in Taiwan, mainland China (Kunshan, Dongguan), the Philippines, and Vietnam. We will continue to implement lean

manufacturing programs and increase the proportion of automated production to optimize cost structures, aiming to become the preferred supplier for international clients.

(6) Risk analysis

A. Impact of interest rates, exchange rates, and inflation on the company's profit and loss, and future response measures

Unit: NTD thousand

	Cint. 111D thousand					
Item	2022	2023	Q1, 2024			
Net gain (loss) on foreign exchange (A)	227,551	31,627	46,126			
Net revenue from operations (B)	10,392,504	8,486,228	1,943,259			
Profit before income tax (C)	315,063	(330,729)	(7,360)			
Ratio of net gain (loss) on foreign exchange to net revenue from operations (A)/(B)	2.19%	0.37%	2.37%			
Ratio of net gain (loss) on foreign exchange to profit before income tax (A)/(C)	72.22%	(9.56%)	(626.71%)			
Net interest income (expense). (D)	(57,857)	(58,995)	(15,204)			
Ratio of net interest income (expense) to net revenue from operations (D)/(B)	(0.56%)	(0.70%)	(0.78%)			
The ratio of the net interest income (expense) to profit before income tax(D)/(C)	(18.36%)	17.84%	206.58%			

Source of information: Parent company only financial statements are audited by accountants.

(A)Impact of interest rate changes on the Company's profit and loss, and future response measures.

The Company's interest expenses for the years 2023 and 2022 were NT\$108,725 thousand and NT\$85,069 thousand, respectively, which accounted for a very small ratio of net operating revenue for each period. As such, there was no significant adverse impact on the Company's profit and loss. In line with the Company's strategy of continuing business growth and development towards the capital market, except for significant capital expenditures and long-term investments financed by medium- to long-term funds, short-term operating cash flow remains the main financial adjustment used. Therefore, interest rate fluctuations are not expected to have a significant impact on the Company's profit and loss.

(B) Impact of exchange rate fluctuations on the Company's profit and loss, and future response measures

The Company's business is primarily export-oriented, and the pricing of its sales transactions is mostly based on the US dollar. However, as some of the Company's purchases are also priced in US dollars, there is a partial offsetting effect between purchases and sales. Nevertheless, exchange rate fluctuations still have a certain impact on the Company's overall operations.

The Company's exchange gains and losses for 2023 and 2022 were NT\$31,627 thousand and NT\$227,551 thousand, respectively, which accounted for 0.37% and 2.19% of the net operating revenue for each period. As such, they had a certain impact on the Company's profit and loss. Additionally, the Company has established foreign currency deposit accounts with major banks to handle incoming funds from customers. The Company will decide whether to convert the funds into local currency or deposit them into foreign currency accounts based on its actual fund requirements and exchange rate fluctuations. Furthermore, through its export and raw material import transactions, natural hedging effects can be generated from foreign currency receivables and payables, which can help mitigate the impact of exchange rate fluctuations on the Company's operations.

To strengthen the management of foreign exchange positions and exchange losses and gains, the Company utilizes the characteristics of natural hedging by using foreign currency accounts receivable to pay off foreign currency accounts payable generated from purchases. At the same time, when the business unit quotes prices

to customers, they should consider the future trend of exchange rates and the factors that affect exchange rates, and provide a more conservative quote to minimize the impact of exchange rate fluctuations. In addition, our company has signed foreign exchange hedging contracts with banks, which can take hedging measures at any time to reduce the impact of exchange rate fluctuations on our Company's operations.

- (C) Impact of inflation on the Company's profit and loss and future response measures In recent years, there has been a gradual upward trend in inflation. However, the Company has not yet experienced any significant immediate impact from inflation. The Company is also closely monitoring fluctuations in raw material market prices and maintaining good interaction with suppliers and customers to avoid any significant impact from inflation in the future.
- B. The main reasons for engaging in high-risk, high-leverage investments, lending funds to others, endorsing guarantees, and trading in derivative products, as well as the policies, profits or losses, and future response measures

The Company has established the "Acquisition or Disposal of Asset Processing Procedures," "Endorsement and Guarantee Operations Procedures," and "Funds Lending Operations Procedures," which were approved by the shareholders' meeting as the basis for the Company to carry out relevant transactions. The following is an explanation of the above items:

- (A) The main reasons for engaging in high-risk, high-leverage investments, lending funds to others, endorsing guarantees, and trading in derivative products, as well as the policies, profits or losses, and future response measures
 - The Company primarily focuses on the development of its core business and has not ventured into investments in other high-risk industries. The Company has always maintained a stable and financially sound operation and has not engaged in high-risk and high-leverage investments.
- (B) Policy, main reasons for profit or loss in lending funds to others, and future strategies: As of the printing date of the annual report for the most recent fiscal year, the Company has not engaged in any fund lending activities, which have no significant adverse effects on the Company's financial condition.
 - As for our subsidiary, as of the printing date of our annual report for the most recent fiscal year, all of the recipients of the fund lending activities of the subsidiary are companies that directly or indirectly hold 99.86% or more of voting rights in the Company. These fund lending activities mainly support the subsidiary's expansion of its operational business. All of the aforementioned transactions were approved by the subsidiary's board of directors in accordance with regulations and announced and reported publicly. The balance of fund lending by the subsidiary did not exceed the limit set by the "Operating Procedures for Fund Lending to Others" of the subsidiary, and therefore, had no significant adverse effects on the subsidiary's financial condition.
- (C) Policy, main reasons, and future response measures on endorsing guarantees for profit or loss:

As of the printing date of our annual report for the most recent fiscal year, the parties to whom we provided endorsements and guarantees were our subsidiary companies, KUNSHAN ACES ELECTRONIC CO., LTD., CONG TY TNHH CHINH XAC NGAN VUONG, and ACES Precision Machinery Co., Ltd., all of which indirectly held 100% of voting shares in our company. The purpose of endorsing these guarantees was to assist our subsidiary companies in meeting their funding requirements for business expansion and obtaining financing from banks. All of these transactions were approved by our board of directors in accordance with regulations and publicly announced and reported. The balance of endorsement and guarantee did not exceed the limit set by the Company's "Endorsement and Guarantee Operating Procedures" and therefore had no significant adverse effects on our financial condition.

As for our subsidiary, as of the printing date of our annual report for the most recent fiscal year, the parties to whom the subsidiary provided endorsements and guarantees were companies that directly or indirectly held 100% of the subsidiary's voting shares. The purpose of endorsing these guarantees was to assist the subsidiary's subsidiary companies in meeting their funding requirements for business expansion and obtaining financing from banks. All of these transactions were approved by the subsidiary's board of directors in accordance with regulations and publicly announced and reported. The balance of endorsement and guarantee did not exceed the limit set by the subsidiary's "Endorsement and Guarantee Operating Procedures" and therefore had no significant adverse effects on the subsidiary's financial condition.

(D) Policy, main reasons for engaging in derivative trading for profit or loss, and future response measures:

If the Company and its subsidiaries engage in derivative trading, they will strictly abide by the "Acquisition or Disposal of Assets Processing Procedures" regulations and regularly report on derivative trading to the Board of Directors. At the same time, they will also disclose derivative trading in accordance with regulations.

C. Future research and development plans and projected R&D expenses

As of May 10, 2024

As of May 10, 2024						
Item	The current progress of ongoing research and development projects	Projected R&D expenses	Estimated time of completion for mass production	The primary factors that could influence future research and development success		
Commissioned research for the development of supercritical cable extrusion technology	In the process of product development	NTD 50 million	Second half of 2024	Insulation material forming stability and metal plating coverage		
High-speed transmission cables for gaming graphics cards (PCIe Gen4+USB4)	In the process of product development	NTD 2 million	Second half of 2024	Product high-speed design, SI analysis verification capability, and production testing technology capability		
DP2.1 Cable	In the process of product development	NTD 1 million	Second half of 2024	Product high-speed design, SI analysis verification capability, and production testing technology capability		
OCP's next-generation internal high-speed interconnect solution, Multitrak PCIe6	In the process of product development	NTD 20 million	Second half of 2024	Product high-speed design, SI analysis verification capability, and production testing technology capability		
Development of PCIE RISER CABLE DA direct soldering series connector wire set	In the process of product development	NTD 22 million	Second half of 2024	Product high-speed design, SI analysis verification capability, and mass production technology capability		
Development of PCIE CEM GEN6 connector	In the process of product verification	NTD 20 million	Second half of 2024	Product high-speed design, SI analysis verification capability		
Automotive waterproof Type-C project	In the process of product development	NTD 3 million	Second half of 2024	Waterproof inspection methods, the durability of waterproof gaskets, strength, and smoothness of snap-fit mechanisms, appearance quality of die castings, and solderability of the board		
Mega Power 2 project	In the process of product development	NTD 4.2 million	Second half of 2024	Direct soldering design for wire ends, avoidance of the first generation, and addition of new patents		
Development of next-generation PCIE GEN6 GENZ series connectors.	In the process of product design	NTD 20 million	First half of 2025	Product high-speed design, SI analysis verification capability		
USB4(V2.0) Gen4 80Gbps Cable	In the process of product design	NTD 1 million	First half of 2024	Product high-speed design, SI analysis verification capability, and production testing technology capability		

- Note: The projected R&D expenses refer to the estimated amount to be invested in the research and development project. However, the actual recognition of "R&D expenses and fixed assets" will depend on the progress of the research project and the nature of the investments made, before it can be confirmed.
- D. The impact of significant domestic and international policy and legal changes on the Company's financial operations and the corresponding measures taken
 - The Company has not been financially or operationally affected by significant domestic or international policy and legal changes in the recent years up to the printing date of the annual report. The Company operates in compliance with relevant domestic and international laws and regulations and constantly monitors changes in domestic and international policies and laws. It is anticipated that the Company's financial and business operations will not be significantly adversely affected by future important domestic or international policy and legal changes.
- E. The impact of technological advancements (including information security risks) and industry changes on the Company's financial operations, as well as the corresponding measures to address them
 - The Company always keeps track of technological changes in the industry and timely launches products that align with market trends. We stay informed about market trends and evaluate their impact on the Company's operations. However, there have been no significant technological changes in recent years that have had a significant impact on the company's financial and business operations.
- F. The impact of corporate image change on crisis management and corresponding measures
 - The Company has always adhered to the principles of integrity and sound management. Since its establishment, we have actively strengthened internal management to enhance the quality and efficiency of our operations. The Company's corporate image has been consistently positive, and there have been no significant changes in the corporate image that would lead to a crisis.
- G. Expected benefits, potential risks, and mitigation measures of mergers and acquisitions As of the date of printing of the annual report, the Company has no plans for any acquisitions.
- Expected benefits, potential risks, and mitigation measures for expanding the plant H. After the official launch of the Taiwan Precision Center in the first quarter of 2012, the Company can accelerate the development of key technologies and products required in the precision fine-pitch connector, smartphone, automotive electronics, and network communication markets. It will gradually generate benefits in terms of production quality and technological accumulation. At the same time, it will also be responsible for the development of precision molds and mold components, serving as the Group's mold coordination center, effectively utilizing and allocating resources for the production of mold components used by various manufacturing units for molding and stamping, aiming to reduce costs and maintain quality stability. For highly automated processes and high-end niche products, production will be planned in the Precision Center. In addition, for long-term operational development and to master core technologies in the Taiwan headquarters, the Company will also leverage Taiwan's abundant technical human resources to cultivate excellent product development and precision mold design and manufacturing personnel, building a complete technical team. In April 2022, the Company started the construction of the Precision Center R&D Headquarters Building in Taoyuan, Taiwan, to enhance the long-term competitiveness and profitability of the Group. The establishment of the new building for the establishment of the Precision Center R&D Headquarters was funded through cash capital increase and the issuance of the second unsecured convertible corporate bonds in the domestic market in the fourth quarter of 2021, providing medium to

- long-term funds to cope with the Company's operations without causing significant impact.
- I. The risks and corresponding measures associated with concentrated procurement or sales
 - (A) Assessment of concentrated procurement risks and corresponding measures The Company has two or more fixed qualified suppliers for each of its major raw materials to ensure the quality and stability of the supply, thereby mitigating the risk of over-reliance on a single source of supply.
 - (B) Assessment of concentrated sales risk and corresponding measures

 In the past two fiscal years and the first quarter of 2024, the proportion of sales
 from customers of the Company to net revenue did not exceed 10%. Due to the
 recent vertical integration of the Company's industry and the increase in revenue,
 the proportion of net sales from U Company has increased in the Company's net
 revenue. U Company is one of the world's top five notebook computer contract
 manufacturers and is a major customer of the Company, which is reasonable.
 In the future, the Company will continue to expand sales to domestic and
 international customers and actively develop connectors and related products in
 other fields. This should help reduce the risk associated with reliance on products
- J. Directors, supervisors, or major shareholders holding more than ten percent of the shares, the impact, risks, and response measures of significant transfers or changes in ownership on the Company
 - The Company has not experienced significant transfers or changes in equity during the recent fiscal year and up to the date of printing of the annual report.
- K. The impact, risks, and mitigation measures of changes in ownership on the company's operations
 - The Company's directors and supervisors have long been involved in the Company's operations, and the management team has a strong sense of mission towards the company, considering the company's management as a lifelong career aspiration. In addition, employees identify with the company's development direction and are willing to hold the company's stocks for the long term, sharing in the Company's growth. Therefore, the Company should have no risk of a change in management control.
- L. Litigation or non-litigation events

in a single field.

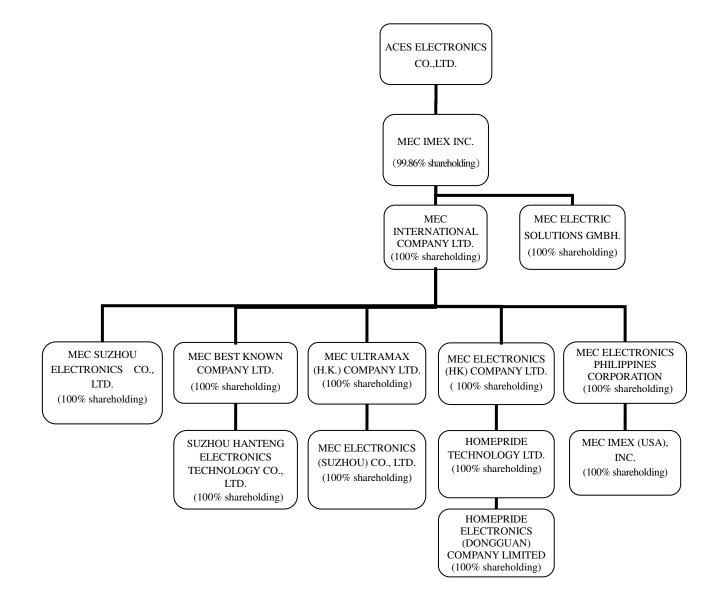

- Significant litigation, non-litigation, or administrative disputes involving the Company, its directors, supervisors, general manager, substantial shareholders with a stake exceeding 10%, and subsidiary companies, which have been finally judged or are currently pending and may have a significant impact on shareholder equity or securities prices, should disclose the disputed facts, the amount in dispute, the commencement date of the litigation, the main parties involved, and the status of the proceedings as of the date of the annual report publication.
- 1. As of the date of the annual report publication, there are no litigation, non-litigation, or administrative disputes that have been finally judged or are currently pending, which could have a significant impact on shareholder equity or securities prices.
- 2. For lawsuits, non-litigation, or administrative disputes involving the Company's directors, supervisors, general manager, substantial shareholders with a stake exceeding 10%, and subsidiary companies, where the judgments have been finalized or are currently pending as of the date of the annual report publication, and the outcomes may have a significant impact on shareholder equity or securities prices: None.
- M. Other significant risks and corresponding measures
 The Company has not identified any other significant risk factors in its recent annual report up until the date of printing.
- (7) Other important matters: None.

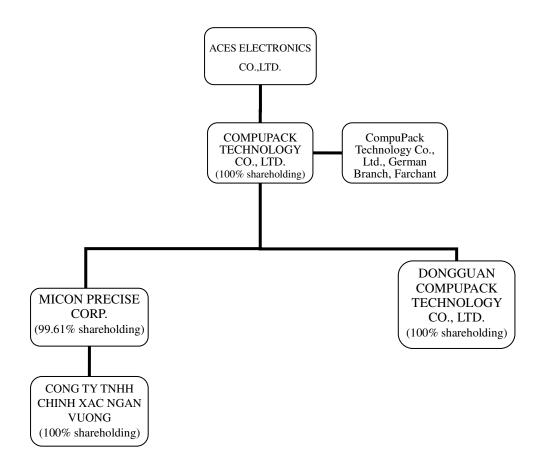

VIII. Other items deserving special mention

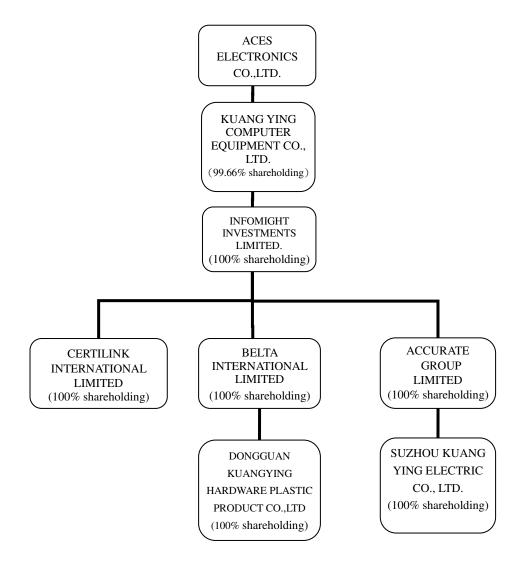

- (1) information related to the company's affiliates
 - A. Consolidated business report of related companies
 - (A) Related company organizational chart (As of December 31, 2023)

Note 1: The affiliated company is a limited company without shares, so it is not possible to calculate earnings per share.

Note 2: ACES (HONG KONG) ELECTRONIC CO., LTD., GENESIS INTERCONNECT CO., LTD., and SHENZHEN JINO ELECTRONIC CO., LTD. completed the dissolution and liquidation process in 2023.

Note 3: GENESIS GUIZHOU TECHNOLOGY CO., LTD. was sold in 2023.

B. Consolidated financial statements for related companies' merger

The company will not prepare a separate consolidated financial statement for related party mergers for the fiscal year 2023 (from January 1, 2023, to December 31, 2023) in accordance with the "Guidelines for the Preparation of Consolidated Financial Statements for Related Party Mergers, Related Financial Statements, and Reports" and International Accounting Standard No. 27 recognized by the Financial Supervisory Commission for the preparation of consolidated financial statements for parent and subsidiary companies. The relevant information required for the related party consolidated financial statements has already been disclosed in the aforementioned consolidated financial statements for parent and subsidiary companies, therefore, there is no need to prepare a separate consolidated financial statement for related party mergers.

C. Relationship report

According to Article 369-12 of the Company Law, as a subsidiary of a non-publicly traded stock company, our company is not required to prepare a related-party transaction report.

(2) Execution status and disclosure items for the Company has carried out a private placement of securities during the most recent fiscal year or during the current fiscal year up to the date of publication of the annual report: None.

- (3) Holding or disposal of shares in the company by the company's subsidiaries during the most recent fiscal year or during the current fiscal year up to the date of publication of the annual report: None.
- (4) Other matters that require additional description: None.
- (5) If any of the situations listed in Article 36, paragraph 3, subparagraph 2 of the Securities and Exchange Act, which might materially affect shareholders' equity or the price of the company's securities, has occurred during the most recent fiscal year or during the current fiscal year up to the date of publication of the annual report: None.
