| ltem | Requirement | Standard |
| Examination of Product | Product shall meet requirements of applicable product drawing and specification. | Visual, dimensional and functional per applicable quality inspection plan. |
| | ELECTRICA | L |
| ltem | Requirement | Standard |
| Contact Resistance | initial : 20 m Ω Max. after test: 40 m Ω Max. | Test between points A and B of the specimen assembled for actual use shown in the figure on the right side shall be measured under the following conditions and method (voltage: 20 mV max .test current :10mA DC) |
| Insulation Resistance | 1000 m Ω Min. 500 m Ω Min.(Humidity& Thermal Shock test) | Unmated connectors, apply 500 V DC between adjacent terminals. |
| Dielectric Withstanding Voltage | No breakdown. | Test between adjacent contact for 1 minutes. Initial: 500 V AC After test: 500V AC(Humidity & Thermal Shock test). |

| Intel: 2.00MM BATTERY CONN. R/A T/H TYPE RELEASE DATE: 10/01/08 REVISION: 0 ECN No: ECN-0910280 PAGE: 7 of 10 MECHANICAL Item Requirement Standard Item Requirement Standard Durability Contact resistance shall be 40 MΩ Max. after the test. A housing with crimped contacts and a head shall be mated and umated. after repeated 5000 cycles, contact resistance shall be measured. | | | | | | | | | | |
| Item Requirement Standard Durability Contact resistance shall be 40 MΩ Max. after the test. A housing with crimped contacts and a head shall be mated and umated. after repeated 5000 cycles, contact resistance shall be measured. The electrical load condition shall be 100 mA maximum for all contacts. Subject to a simple harmonic motion having amplitude of 0.76mm (1.52mm maximum total excursion) in frequency between the limits of 10 and 55 Hz. The entire frequency range, from 10 to 55 Hz and return to 10 Hz, shall be raversed in approximately 1 minute. This motion shall be applied for 2 hours in each of three mutually perpendicular directions. (EIA-364-28 Condition 1) Subject mated connectors to 50C3 (peak value) half-sine shock pulses of 11 milliseconds duration. Three shocks in each direction shall | | | | | | | | | | |
